Research-Based Learning: Case Studies from Maastricht University Ellen Bastiaens, Jonathan van Tilburg, Jeroen van

Merriënboer,2017-03-20 This book describes lessons learned from the implementation of research based learning at Maastricht University Well known for its problem based learning PBL educational model Maastricht University implemented research based learning RBL as a new educational concept in addition to PBL around 2009 The model has taken the shape of an excellence programme offering third year bachelor students an opportunity to conduct academic research together with academic staff The introduction of the research based learning concept into the programmes of all Maastricht University s faculties has resulted in a range of RBL models that vary to fit the various disciplines and programmes offered by the faculties The book first presents theoretical models and a description of the concepts of research based learning and undergraduate research UGR Next by means of case studies it describes the formulas developed to suit the various programmes the challenges encountered the initial reservations on the part of the staff the limitations caused by regulations and demands of the curricula as well as the successes and results of the excellence programme The disciplines described in the case studies include psychology and neuroscience knowledge engineering social and cultural sciences law and business and economics     The Paradox of Fiscal Austerity Justin Vélez-Hagan,2019-12-12 If governments followed the optimal fiscal policy path surpluses in good times would counter necessary deficits during economic downturns leading to worldwide balance The world however has chosen to go in a different direction in recent decades avoiding thrift in light of a decidedly more indebted future When financial crises kicked off a global recession in 2008 the spotlight placed on countries fiscal conditions put pressure on policymakers around the globe to find a way to slow the growth of deficits and debt by imposing fiscal consolidations or more simply austerity How have these policies fared across the developed world Were they even necessary to begin with This book examines the many factors that have contributed to the success or failure of such policies including timing magnitude accompanying policies composition and more while explaining the economic rationale behind their choices     **The Economic Superorganism** Carey W. King,2020-10-07 Energy drives the economy economics informs policy and policy affects social outcomes Since the oil crises of the 1970s pundits have debated the validity of this sequence but most economists and politicians still ignore it Thus they delude the public about the underlying influence of energy costs and constraints on economic policies that address such pressing contemporary issues as income inequality growth debt and climate change To understand why Carey King explores the scientific and rhetorical basis of the competing narratives both within and between energy technology and economics Energy and economic discourse seems to mirror Newton s 3rd Law of Motion For every narrative there is an equal and opposite counter narrative The competing energy narratives pit drill baby drill against renewable technologies such as wind and solar Both claim to provide secure reliable clean and affordable energy to support economic growth with the most benefit to society but how To answer this question we need to understand the competing economic narratives techno optimism and techno realism Techno optimism claims that innovation overcomes any physical resource constraints and enables the social outcomes and economic growth we desire Techno realism in contrast

states that no matter what energy technologies we use feedbacks from physical growth on a finite planet constrain economic growth and create an uneven distribution of social impacts In *The Economic Superorganism* you will discover stories data science and philosophy to guide you through the arguments from competing narratives on energy growth and policy You will be able to distinguish the technically possible from the socially viable and understand how our future depends on this distinction

**The Publishers' Trade List Annual** ,1995      **Lectures on Macroeconomics** Olivier Blanchard,Stanley Fischer,1989-03-21 The main purpose of *Lectures on Macroeconomics* is to characterize and explain fluctuations in output unemployment and movement in prices *Lectures on Macroeconomics* provides the first comprehensive description and evaluation of macroeconomic theory in many years While the authors perspective is broad they clearly state their assessment of what is important and what is not as they present the essence of macroeconomic theory today The main purpose of *Lectures on Macroeconomics* is to characterize and explain fluctuations in output unemployment and movement in prices The most important fact of modern economic history is persistent long term growth but as the book makes clear this growth is far from steady The authors analyze and explore these fluctuations Topics include consumption and investment the Overlapping Generations Model money multiple equilibria bubbles and stability the role of nominal rigidities competitive equilibrium business cycles nominal rigidities and economic fluctuations goods labor and credit markets and monetary and fiscal policy issues Each of chapters 2 through 9 discusses models appropriate to the topic Chapter 10 then draws on the previous chapters asks which models are the workhorses of macroeconomics and sets the models out in convenient form A concluding chapter analyzes the goals of economic policy monetary policy fiscal policy and dynamic inconsistency Written as a text for graduate students with some background in macroeconomics statistics and econometrics *Lectures on Macroeconomics* also presents topics in a self contained way that makes it a suitable reference for professional economists      [Whitaker's Books in Print](#) ,1998      **Canadian Books in Print. Author and Title Index** ,1975      **The Global Economic Crisis** Emiliano Brancaccio,Giuseppe Fontana,2013-03-01 Why did the economists of the so called mainstream seem to fail to foresee the global economic crisis that exploded in 2008 And why do they appear to have difficulty in putting forward an interpretation of it that is consistent with the theoretical foundations of their models These two questions have echoed insistently since the outbreak of the crisis not only in academic circles but also in the mass media and appear to reflect increasingly widespread dissatisfaction with the dominant paradigm of economic theory Many believe that the global recession now underway may constitute an historic watershed for the evolution of economics and therefore that an authentic change of paradigm is called for rather than only minor adjustments to the dominant approach Since the start of the crisis there has indeed been a profusion of contributions from alternative areas of economic study and in particular from those adopting a critical stance with respect to mainstream economic theory This collection puts forward promising reinterpretations of the primary schools of heterodox political economy stringent critiques of the conventional readings of the recession new schemes of theoretical

and empirical analysis of the crisis and proposals for economic policies alternative to those hitherto adopted This book contains a selection of some of the most recent contributions to the critique of mainstream economic theory and policy and discusses the origins and possible evolutions of the current economic crisis The collection should be of interest to students and researchers focussing on macroeconomics monetary economics political economy and financial economics *Innovative Fiscal Policy and Economic Development in Transition Economies* Aleksandr Gevorkyan, 2013-07-03 This book explores the problems of fiscal policy as an instrument of economic and social development in the modern environment primarily focusing on the transition economies of Eastern Europe Caucasus and Central Asia Evaluating the transformational experience in these countries this work meets a need for a critical analysis in the aftermath of the 1990s market liberalization reforms of current trends and to outline the roadmap for future development *Macroeconomics* William Scarth, 2014-01-31 This important textbook offers a comprehensive look into the two main traditions in contemporary macroeconomics \_ New Classical and Keynesian \_ and examines the work of economists who have drawn on principles from both traditions to form a new integr
