Treat Your Own Spinal Stenosis Jim Johnson, 2010-04 Spinal stenosis usually brings to mind images of bone spurs pinched nerves a worn out spine and pain However few people know that scientific studies have shown up to 69% of people over the age of 55 to have spinal stenosis on an MRI exam but no pain Clearly radiographic pictures of one's spine do not tell the whole tale as there are many people that are able to live pain free with spinal stenosis But if having a horrible looking spine on an MRI doesn't necessarily mean you'll have pain then what does Well consider the study that checked out the back muscles of spinal stenosis patients with an EMG and found that 17 out of 22 of them had abnormalities Apparently there are other factors involved that might determine if one will have pain or not Treat Your Own Spinal Stenosis will answer these kinds of questions and more It will teach you what spinal stenosis is and how it got there Then you will learn what you can do about it by putting your spine through a series of Tune Ups Based on rely on randomized controlled trials Treat Your Own Spinal Stenosis is a simple yet effective program that can be done in the privacy of your home with minimal cost or equipment Exercise sheets are included to help guide you step by step through a sixweek program Jim Johnson P T is a physical

The Bad Back Manual Peter Scholten, 2016-03-23 This book enables the reader to implement a systemic and effective action plan to fight mechanical back pain Two major strategic differences set this book apart and make it essential reading for back pain sufferers The 24/7 approach The first step in fighting mechanical back pain is making simple but critical daily lifestyle changes The mattress we sleep on the shoes we wear and the chairs we sit on have tremendous influence on our posture and well being Getting those basics right will ensure fast and sustainable progress in terms of improving posture and eliminating back pain The Brain not Muscle approach Most posture improvement methods proscribe muscle strengthening and stretching exercises to deal with poor posture Overly influenced by the fitness industry such methods fail to take into account the fact that posture and movement are created in the brain and that it is therefore first and foremost the brain that needs to be trained Whilst it might be useful to have strong thighs for cycling it's your brain that tells you how to keep your balance and steer Learning good posture requires exactly the same principle to be applied It is 99% brain power and only 1% muscle strength This book and the exercises it recommends reflect this reality Because the Brain not Muscle approach focuses on re-educating your brain to enable you to adopt the right posture it is particularly effective and sustainable There is no need to perform endless repetitions of certain exercises once you have learned how to cycle you do not have to go back to using stabilizers In the same way once your brain has learned how sit stand and walk

correctly your posture will have improved permanently Correcting posture is often the single most important step for permanent back pain relief
