Books in Print ,1991 **The New Beacon** ,1985 *Contract Governance* Stefan Grundmann,Florian Möslin,Karl Riesenhuber,2015-07-23 This book introduces and develops Contract Governance as a new approach to contract theory While the concept of governance has already been developed in Williamson's seminal article it has ironically not received much attention in general contract law theory Indeed Contract Governance appears to be an important and necessary complement to corporate governance and in fact as the second equally important pillar of governance research in the core of private law With this in mind Grundmann Möslin and Riesenhuber provide a novel approach in setting an international and interdisciplinary research agenda for developing contract law scholarship Contract Governance focuses particularly on the ways in which a governance perspective leads to research questions that have been neglected in traditional contract law scholarship and how from a governance perspective the questions are dealt with in a different manner and style Combining substantive chapters and commentaries this collection of essays addresses an array of topics including third party impact and contract governance problems in herd behaviour governance of networks of contracts governance in long term contractual relationships contract governance and rule setting and contract governance and political dimensions

The State of Food and Agriculture 2019 Food and Agriculture Organization of the United Nations,2019-10-14 The need to reduce food loss and waste is firmly embedded in the 2030 Agenda for Sustainable Development Food loss and waste reduction is considered important for improving food security and nutrition promoting environmental sustainability and lowering production costs However efforts to reduce food loss and waste will only be effective if informed by a solid understanding of the problem This report provides new estimates of the percentage of the world s food lost from production up to the retail level The report also finds a vast diversity in existing estimates of losses even for the same commodities and for the same stages in the supply chain Clearly identifying and understanding critical loss points in specific supply chains where considerable potential exists for reducing food losses is crucial to deciding on appropriate measures The report provides some guiding principles for interventions based on the objectives being pursued through food loss and waste reductions be they in improved economic efficiency food security and nutrition or environmental sustainability
