Androids, Humanoids, and Other Science Fiction Monsters Per Schelde, 1994-07 Unlike science fiction literature science fiction film has until now been largely neglected as a genre worthy of study and scholarship **Androids Humanoids and Other Folklore Monsters** explores science fiction sf film as the modern incarnation of folklore emblematic of the struggle between nature and culture but with a new twist

NeuroScience Fiction Rodrigo Quiroga, 2020-04-28 What if science fiction stopped being fiction Developments in neuroscience are turning sci fi scenarios into reality and causing us to revisit some of the philosophical questions we have been asking ourselves for centuries Science fiction often takes its inspiration from the latest science and our oldest questions After all the two are inextricably linked At a time when advances in artificial intelligence are genuinely leading us closer to a computer that thinks like a human we can't help but wonder What makes a person a person Countless writers and filmmakers have created futuristic scenarios to explore this issue and others like it But these scenarios may not be so futuristic after all In the movie *Inception* a group of conspirators implants false memories in *Until the End of the World* a mad scientist is able to read dreams in 2001 *A Space Odyssey* a supercomputer feels and thinks like a person And in recent years the achievements described in leading scientific journals have included some that might sound familiar implanting memories using optogenetics reading the mind during sleep thanks to advanced decoding algorithms and creating a computer that uses deep neural networks to surpass the abilities of human thought In **NeuroScience Fiction** neuroscientist and author Rodrigo Quiroga reveals the futuristic present we are living in showing how the far out premises of 10 seminal science fiction movies are being made possible by discoveries happening right now on the cutting edge of neuroscience He also explores the thorny philosophical problems raised as a result diving into *Minority Report* and free will *The Matrix* and the illusion of reality *Blade Runner* and android emotion and more A heady mix of science fiction neuroscience and philosophy **NeuroScience Fiction** takes us from *Vanilla Sky* to neural research labs and from *Planet of the Apes* to what makes us human This is a book you'll be thinking about long after the last page and once you've read it you'll never watch a sci fi blockbuster the same way again
