Family Psychoeducation for Serious Mental Illness Harriet P. Lefley, 2009-07-17 Research shows that many American adults with serious mental illness live with or maintain contact with their families but families are rarely given information about their relative s illness their own needs for support are ignored Harriet Lefley traces the history of family psychoeducation in the U S Handbook of Community Psychiatry Hunter L. McQuistion, Wesley E. Sowers, Jules M. Ranz, Jacqueline Maus Feldman, 2012-06-05 During the past decade or more there has been a rapid evolution of mental health services and treatment technologies shifting psychiatric epidemiology changes in public behavioral health policy and increased understanding in medicine regarding approaches to clinical work that focus on patient centeredness These contemporary issues need to be articulated in a comprehensive format The American Association of Community Psychiatrists AACP a professional organization internationally recognized as holding the greatest concentration of expertise in the field has launched a methodical process to create a competency certification in community psychiatry As a reference for a certification examination that effort will benefit enormously from a comprehensive handbook on the subject **The American Psychiatric Association Practice Guidelines for the Psychiatric Evaluation of Adults** American Psychiatric Association, 2015-07-29 Since the publication of the Institute of Medicine IOM report Clinical Practice Guidelines We Can Trust in 2011 there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy developed in a transparent fashion and based on a systematic review of the available research evidence To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality AHRQ American Psychiatric Association APA has adopted a new process for practice guideline development Under this new process APA s practice guidelines also seek to provide better clinical utility and usability Rather than a broad overview of treatment for a disorder new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies The quality of the overall body of evidence is also rated and is summarized in the practice guideline With the new process recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context Clear concise and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice with the goal of improving quality of care The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions Each module has a consistent organization which will assist users in finding clinically useful and relevant information quickly and easily This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA s guidelines developed under the new guideline development process These guidelines address the following nine topics in the context of an initial psychiatric evaluation review of psychiatric symptoms trauma history and treatment history

substance use assessment assessment of suicide risk assessment for risk of aggressive behaviors assessment of cultural factors assessment of medical health quantitative assessment involvement of the patient in treatment decision making and documentation of the psychiatric evaluation Each guideline recommends or suggests topics to include during an initial psychiatric evaluation Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions In addition to reviewing the available evidence on psychiatry evaluation each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care

Principles and Practice of Psychiatric Rehabilitation Patrick W. Corrigan, Kim T. Mueser, Gary R. Bond, Robert E. Drake, Phyllis Solomon, 2012-08-22 This comprehensive authoritative text provides a state of the art review of current knowledge and best practices for helping adults with psychiatric disabilities move forward in their recovery process The authors draw on extensive research and clinical expertise to accessibly describe the whats whys and how tos of psychiatric rehabilitation Coverage includes tools and strategies for assessing clients needs and strengths integrating medical and psychosocial interventions and implementing supportive services in such areas as housing employment social networks education and physical health Detailed case examples in every chapter illustrate both the real world challenges of severe mental illness and the nuts and bolts of effective interventions

Treatment Collaboration Ronald J Diamond, Patricia L Scheifler, 2007-03-27 This book is a guide for three groups of people the psychologists and social workers who send clients to psychiatrists the psychiatrists who prescribe the drugs and the clients who are often caught in the middle A guiding principle is that collaboration rather than coercion is most likely to promote achieve and sustain recovery Diamond and Scheifler discuss the often competing agendas of these groups of people what does everyone want out of this relationship and how can we make these relationships easier and more beneficial for the client The book will also speak to each group of readers explaining how they can participate more effectively in the process For example what questions should a therapist be asking of the psychiatrist how is the best way to communicate What is the best way to forge a strong relationship What should the consumer do to make sure that she is getting the best treatment Important topics addressed include how to set goals with clients so that everyone is on the same page with the treatment regimen how to manage inevitable conflicts that will arise helping clients deal with medication side effects working with clients to choose when medication is changed how to focus on recovery as a goal and not just medication management
