**Car and Driver** ,1999-07      *The Cars of Trans-Am Racing: 1966-1972* David Tom,2020-04-23 The legendary history of

the pony car wars comes to life in this softcover edition of *The Cars of Trans Am Racing*. The SCCA Trans Am Racing Series launched in 1966 and was designed to showcase a new class of sporty domestic cars racing on road courses. Each major automotive manufacturer participated heavily in the Trans Am Series and in a few short years it became the ultimate American automobile showdown. When the modified muscle cars of the series were seen performing well on the country's finest tracks, fans wanted a model of their own in the driveway. These pony cars boasted a new look and style not seen before, and their all-around performance eclipsed anything accomplished by production-based American GT cars up to that point. This softcover edition of *The Cars of Trans Am Racing* is unique in that it focuses on the cars used in this legendary series. These vintage Mustangs, Camaros, Challengers, Barracudas, Firebirds, Cougars, and Javelins all are extremely popular with collectors and enthusiasts today. Seeing them in their full competition versions when they were new will bring back many fond memories for those who were fans of this series. In addition, enthusiasts who enjoy these cars today look to the Trans Am Series cars for styling inspiration and performance hints as part of the growing Pro Touring trend. Many of these historic cars have been restored to race-ready condition. Additional insight and interviews from the original builders and the teams that maintained the cars provide an insider's viewpoint never before seen in print.

*American Auto Racing* J.A. Martin, Thomas F. Saal, 2004-03-19. As soon as there were automobiles there was racing. The first recorded race, an over-road event from Paris to Rouen, France, was organized by the French newspaper *Le Petit Journal* in 1894. Seeing an opportunity for a similar event, Hermann H. Kohlsaat, publisher of the *Chicago Times Herald*, sponsored what was hailed as the Race of the Century, a 54-mile race from Chicago's Jackson Park to Evanston, Illinois, and back. Frank Duryea won in a time of 10 hours and 23 minutes, of which 7 hours and 53 minutes were actually spent on the road. Race cars and competition have progressed continuously since that time, and today's 200 mph races bear little resemblance to the event Duryea won. This work traces American auto racing through the 20th century, covering its significant milestones, developments, and personalities. Subjects included are Bill Elliott, dirt track racing, board track racing, Henry Ford, Grand Prix races, Dale Earnhardt, the Vanderbilt Cup, Bill France, Gordon Bennett, the Indianapolis Motor Speedway, the Mercer, the Stutz, Duesenberg, Frank Lockhart, drag racing, the Trans Am, Paul Newman, vintage racing, land speed records, Al Unser, Wilbur Shaw, the Corvette, the Cobra, Richard Petty, NASCAR, Can-Am, Mickey Thompson, Roger Penske, Mario Andretti, Jeff Gordon, and Formula One. Through interviews with participants and track records, this text shows where, when, and how racing changed. It describes the growth of each different form of auto racing as well as the people and technologies that made it ever faster.

**Shelby Cobra Fifty Years** Colin Comer, **The History of AMC Motorsports** Bob McClurg, 2016-01-15. When thinking of a manufacturer's racing involvement, AMC is not a manufacturer that immediately comes to mind. Yet even from the very beginning of American motorsports, the companies that became AMC had some serious involvement in motorsport. From the early Nash and Hudson models all the way through the muscle car era, AMC had direct involvement in racing. The success of Nash and Hudson in early NASCAR racing, AMC Javelins

in Trans Am racing and AMC's involvement with Mark Donahue and Roger Penske in both their Trans Am and 1970s NASCAR teams prove that AMC was in it to win it. The History of AMC Motorsports from veteran racing journalist Bob McClurg covers it all from a Nash American Motors corporate history the first years of NASCAR the 1960s efforts that included Trans Am and drag racing Super Stock programs to the Craig Breedlove land speed record efforts when 106 world records were shattered and covered by Hot Rod magazine. And let's not forget the 1970s Trans Am championships with Donahue and Penske and finally the NASCAR success with Bobby Allison in the always curious looking Matador which is also covered here. Never before has a single volume chronicled the events that encompass AMC racing history. Whether a hardcore racing history fan or a casual enthusiast of the AMC street offerings, The History of AMC Motorsports provides a unique showcase vital to every enthusiast's library.

**Lime Rock Park** Terry O'Neil, 2022-03-31. A look at the tumultuous early years of America's oldest continuously operated road racecourse. Lime Rock Park in Connecticut, America's oldest continuously operated road course, came about more by accident than design. Construction of the course began in 1955 when open road racing had been banned in many states and the use of military and civil airport runways for racing was losing favor with audiences. Dubbed the Road Racing Center of the East, the park has a turbulent history bedeviled by financial crises, discord with racing organizers, and extensive legal troubles, but it managed to prevail against steep odds. Terry O'Neil's book details this history of mixed fortunes during the first twenty years of the park's existence. Containing more than a thousand images, hundreds of race results, and a wealth of previously unseen material, Lime Rock Park is a thorough, deep dive into the rocky beginnings of a crucial site in the history of American automobile racing.

**Inside IMSA's Legendary GTP Race Cars** J. A. Martin, Michael J. Fuller. Professional automobile racing has always been dominated by sanctioning bodies whose main goal was to ensure competition. That has meant seeing that cars are well matched in body shape or chassis/engine combinations or engine size. But what about an all-out competition in which one team's idea of the fastest race car could be pitted against another's regardless of mechanical parity? This was what the International Motor Sports Association's IMSA Grand Touring Prototypes (GTP) race series was about. The Series ran from 1981 to 1993 and it was one of the most exhilarating racing experiences of all time. This book is the first to profile the amazing machines that resulted from the GTP's flat-out competition among different and passionate ideas about what might be the fastest way around a track: the V-12 with its better ground effect tunnels but higher center of gravity (CG); the flat six with its low CG but severely restricted ground effect tunnels; and others that employed elaborate wings and air dams. Here are the people behind this engineering, free for all, the culmination of almost a century of automobile racing experience. And here are eighteen of the most competitive vehicles they designed. Using photography, diagrams, drawings, and first-person accounts from the men who built them, Inside IMSA's Legendary GTP Race Cars offers a detailed look at the technology that drove some of the world's most exciting race cars, the likes of which may never be seen again.
