Tissue Mechanics Stephen C. Cowin, Stephen B. Doty, 2007-12-22 I was delighted when I learned in the fall of 2005 that Steve Cowin was working on a textbook in biomechanics Steve and I were in the same department at Tulane University in the 1970s and under his influence I learned the beauty and power of continuum mechanics as a means to better understand the musculoskeletal system When I began teaching courses in biomechanics during that decade it was natural to teach the material from a continuum mechanics perspective Over the years I have used a variety of continuum mechanics texts but for the most part I have had to find the biomedical examples I used directly from the research literature I have now had a chance to review a draft of Tissue Mechanics by Cowin and Doty and it exceeds my high expectations The material includes a rigorous and comprehensive introduction to continuum mechanics oriented toward biomechanics Indeed all of the foundation topics for continuum models of biological materials are covered This material is illustrated through applications to the hard and soft tissues of the human body Steve Cowin is now one of the leading researchers in the mechanics of bone so one would expect the chapters on bone tissue and bone tissue adaptation to be of a very high order But the presentation on collagen and cartilage mechanics is also excellent Their presentation of finite deformation mechanics and its application to tendons and ligaments is one of the most accessible in the literature

Developing Occupation-Centered Programs With the Community Linda Fazio, 2024-06-01 The updated Third Edition of *Developing Occupation Centered Programs With the Community* continues to provide an excellent step by step workbook

approach to designing and implementing a program for the community Inside Developing Occupation Centered Programs With the Community Third Edition Dr Linda Fazio includes the importance of community asset identification and development toward sustainability The Third Edition includes new and updated content on evidence based practice program evaluation at multiple levels funding nonprofits and social entrepreneurship Additionally new trending issues of interest to programmers include human trafficking post combat programming for military veterans and their families arts based programming for all ages and programming to meet current needs of the well elderly Features of the Third Edition Workbook format offers the instructor and the student options for how to use the text in a classroom or independently in an internship or residency The order of the programming process chapter content order summaries and format of exercises has been retained to ease transition for instructors using previous editions of the text The program story section has been retained along with author s notes on what is currently happening with these programs and other related topic areas New content has been added in program sustainability the assessment and building of community assets and consensus organizing in communities More developed content is offered about the structure and function of nonprofit organizations as well as the role and function of the social entrepreneur who does programming for these organizations Included with the text are online supplemental materials for faculty use in the classroom Developing Occupation Centered Programs With the Community Third Edition is an excellent introductory tool and is a valuable resource for occupational therapy students at all levels as well as experienced practitioners in a clinical setting
