Targeting Maths for Victoria Robyn Hurley,2006 *Mathematical Thinking and Problem Solving* Alan H.

Schoenfeld,Alan H. Sloane,2016-05-06 In the early 1980s there was virtually no serious communication among the various groups that contribute to mathematics education mathematicians mathematics educators classroom teachers and cognitive scientists Members of these groups came from different traditions had different perspectives and rarely gathered in the same place to discuss issues of common interest Part of the problem was that there was no common ground for the discussions given the disparate traditions and perspectives As one way of addressing this problem the Sloan Foundation funded two conferences in the mid 1980s bringing together members of the different communities in a ground clearing effort designed to establish a base for communication In those conferences interdisciplinary teams reviewed major topic areas and put together distillations of what was known about them A more recent conference upon which this volume is based offered a forum in which various people involved in education reform would present their work and members of the broad communities gathered would comment on it The focus was primarily on college mathematics informed by developments in K 12 mathematics The main issues of the conference were mathematical thinking and problem solving Queensland Targeting Maths: Teaching guide Garda Turner,Gloria Harris,Robyn Hurley,2004
