How and What Marketing Algorithms Think Roberto Brognara, 2022-10-27 This book argues that the apparent omnipotence of algorithms today is not what it seems particularly in marketing where they actually offer less than they could Considering the reasons behind this it also notes that Big Data has relaunched a kind of data glorification and automated procedures that culturally marketing has already recognized and overcome at least once This first generation of programmatic marketing which the giants of the digital economy launched 15 years ago and consolidated worldwide can be significantly improved with corresponding business results as well but first as this book shows we need to know which strategic and cultural boundaries impact Big Data

*Design Computing and Cognition '12* John S. Gero, 2014-09-03 Design thinking the label given to the acts of designing has become a paradigmatic view that has transcended the discipline of design and is now widely used in business and elsewhere As a consequence there is an increasing interest in design research This is because of the realization that design is part of the wealth creation of a nation and needs to be better understood and taught The continuing globalization of industry and trade has required nations to re-examine where their core contributions lie if not in production efficiency Design is a precursor to manufacturing for physical objects and is the precursor to implementation for virtual objects At the same time the need for sustainable development

requires the design of new products and processes which feeds a movement towards design innovations and inventions The papers in this volume are from the Fifth International Conference on Design Computing and Cognition DCC 12 held at Texas A M University USA They represent the state of the art of research and development in design computing and design cognition They are of particular interest to researchers developers and users of advanced computation in design and those who need to gain a better understanding of designing
