**Fundamentals of Tool Design, Fifth Edition** David Spitler, John G. Nee, David Alkire Smith, 2003-12-08 The creation of a Fifth Edition is proof of the continuing vitality of the book's contents including tool design and materials jigs and fixtures workholding principles die manipulation inspection gaging and tolerances computer hardware and software and their applications joining processes and pressworking tool design To stay abreast of the newer developments in design and manufacturing every effort has been made to include those technologies that are currently finding applications in tool engineering For example sections on rapid prototyping hydroforming and simulation have been added or enhanced The basic principles and methods discussed in Fundamentals of Tool Design can be used by both students and professionals for designing efficient tools

**Engineering Formulas for Metalcutting** Edmund Isakov, 2004 A unique and handy resource Engineering Formulas for Metalcutting will enable users to calculate necessary speeds feeds and required machining power in order to maximize the productivity of cutting Providing information on formulas and their applications in a concise and clearly arranged format it describes mechanical properties of the most popular work materials such as steels cast irons and nonferrous alloys And it offers numerous formulas for calculating speeds feeds cutting forces and machining power What's more practical examples of calculating the variety of such cutting parameters will make this a valuable source of knowledge in training and practice Features Linear regression equations for converting Rockwell Vickers Knoop and Scleroscope hardness numbers into Brinell hardness numbers Formulas and linear regression equations for calculating ultimate tensile strength of the most commonly used work materials in relationship with their hardness Formulas for calculating the number of inserts simultaneously engaged with the workpiece depending on milling conditions Formulas to calculate machining time when facing cutoff and deep grooving and for feed and radial forces in relationship with tangential force Set of formulas to calculate overhang of boring bars made of tungsten heavy alloys and cemented carbides in comparison with a boring bar made of steel Formulas for metal removal rate and for calculating tangential and axial forces Establishes power constant values for most commonly used work materials

Information Security Management Handbook on CD-ROM, 2006 Edition Micki Krause, 2006-04-06

The need for information security management has never been greater. With constantly changing technology, external intrusions and internal thefts of data, information security officers face threats at every turn. The Information Security Management Handbook on CD ROM 2006 Edition is now available. Containing the complete contents of the Information Security Management Handbook, this is a resource that is portable, linked, and searchable by keyword. In addition to an electronic version of the most comprehensive resource for information security management, this CD ROM contains an extra volume's worth of information that is not found anywhere else, including chapters from other security and networking books that have never appeared in the print editions. Exportable text and hard copies are available at the click of a mouse. The Handbook's numerous authors present the ten domains of the Information Security Common Body of Knowledge (CBK). The CD ROM serves as an everyday reference for information security practitioners and an important tool for anyone preparing for the Certified Information System Security Professional (CISSP) examination. New content to this Edition: Sensitive Critical Data, Access Controls, Role Based Access Control, Smartcards, A Guide to Evaluating Tokens, Identity Management Benefits and Challenges, An Examination of Firewall Architectures, The Five W's and Designing a Secure Identity Based Self Defending Network, Maintaining Network Security Availability via Intelligent Agents, PBX Firewalls Closing the Back Door, Voice over WLAN, Spam Wars, How to Deal with Junk E Mail, Auditing the Telephony System, Defenses against Communications Security Breaches and Toll Fraud, The Controls Matrix, Information Security Governance.
