Macroeconomics Charles Jones:

Macroeconomics Jones, Charles I., 2013-12-13 *Macroeconomics* is the first text to truly reflect today's macroeconomy. In this teachable, coherent book, the author makes complex topics easily understandable for undergraduates and combines innovative treatment of both the short run and the long run with a strong emphasis on problem solving. [Macroeconomics](#) Charles I. Jones, 2014-02-27 Teaches students how macroeconomics is studied and applied in the 21st century.

Macroeconomics Charles I. Jones, 2019-12-13 Chad Jones's *Macroeconomics* teaches students to think like modern macroeconomists with strong and engaging growth coverage and a more intuitive approach to models. Praised by adopters for its clear explanations, flexible organization, timely case studies, data, and emphasis on problem solving, *Macroeconomics* gives students the practical tools they need to understand and analyze the macroeconomy. This innovative text makes macroeconomics less complicated without sacrificing rigor. **Macroeconomics, 5th Edition + Reg Card** Charles I. Jones, 2020-07-29 Modern and practical macroeconomics. Chad Jones's *Macroeconomics* teaches students to think like modern macroeconomists with strong and engaging growth coverage and a more intuitive approach to models. Praised by adopters for its clear explanations, flexible organization, timely case studies, data, and emphasis on problem solving, *Macroeconomics* gives students the practical tools they need to understand and analyze the macroeconomy. This innovative text makes macroeconomics less complicated without sacrificing rigor. [Macroeconomics](#) Charles Irving Jones, 2010 Now updated to include new chapters dedicated to the Global Economic Crisis. The most exciting new text in a generation. Chad Jones's *Macroeconomics* will change the way intermediate macroeconomics courses are taught. It is the first and only undergraduate text to present the Romer model of Endogenous Technological Change, which is integral to the way economists study growth theory today. Other texts stop at the Solow model, an approach first formulated in the 1950s. Jones presents the Romer model at an appropriate level for undergraduates. The text is written in an engaging, conversational style that makes students feel as though they are sitting in on one of Professor Jones's lectures. When introducing new material, he presents it in a careful, patient manner and follows the discussion with case studies and worked examples. Each chapter includes two complete worked examples that walk students step by step through the material covered in that chapter. In addition, this is the first text in the intermediate macroeconomics market to be fully integrated with an online homework management system. The easy-to-use SmartWork homework management system offers extensive answer feedback as students work through a problem. research in 2003 *Insights from Book Translations on the International Diffusion of Knowledge* Isabelle Yin Fong Sin, 2011

Increases in the stock of ideas possessed by societies are central to modern economic growth The implications of idea flows are striking Klenow and Rodriguez Clare 2005 estimate world production would be just 6% of its current level if countries did not share ideas Yet although theoretical economists have studied ideas and their diffusion extensively empirical studies are scarce because ideas are inherently difficult to measure Previous empirical studies of idea flows have tended to use proxies such as trade flows foreign direct investment migration and patent citations However with the exception of the latter these measures are not pure idea flows and do not capture the key properties of ideas namely non rivalry and disembodiedness My research proposes a novel measure of idea flows namely book translations and uses it to study the factors that affect the international diffusion of ideas Book translations are an attractive way to quantify idea flows because they are both non rival and disembodied they are a pure measure of idea flows rather than a by product of a process such as trade or migration and their key purpose is to make the ideas contained in the book accessible to speakers of another language In chapter 2 I outline the economics literature on ideas and their diffusion I motivate and discuss book translations as a measure of idea flows and provide a framework for thinking about when translations are likely to occur I describe the translation data in chapter 3 The source of the data is an international bibliography of translations collected by the United Nations Educational Scientific and Cultural Organization From this bibliography I compile a data set of over 2 million translations published in 80 countries since the 1949 including detailed information on each title translated I then document the main patterns of translation flows In chapter 4 I employ a gravity framework to study how distance affects translation flows between countries This sheds light both on the barriers to international idea diffusion and on the underlying causes of the negative relationship between distance and trade Translations differ from trade in that they have zero transportation costs but they are subject to similar search and information costs and costs of forming contracts I estimate a gravity model where bilateral translation flows vary with the sizes of the countries and the distance between them and find the elasticity of translations with respect to distance to be between 0.3 and 0.5 for the 1990s these values are significantly smaller than the equivalent elasticity for trade found in the literature suggesting a significant role for transportation costs in the distance effect on trade In addition I present several pieces of evidence that suggest supply side frictions play a larger role in the distance effect on translations than do consumer preferences For instance the speed with which titles are translated which is likely to largely capture supply frictions as opposed to demand factors decreases significantly with distance Finally in joint work with Ran Abramitzky chapter 5 I study how the collapse of the Communist regime in Eastern Europe at the close of the 1980s affected the international diffusion of ideas We show that while translations between Communist languages decreased by two thirds with the collapse Western to Communist translations increased by a factor of seven and reached Western levels Convergence was full in economically beneficial fields such as sciences and only partial in culturally beneficial fields such as history The effects were larger for

more Western oriented countries These findings help us understand how institutions shape the international diffusion of knowledge and demonstrate the importance of preferences in determining the type of ideas that diffuse into a country
