God The Pattern The Universe:

God, the Pattern, the Universe T. Alexander, 2014-08-28 The Pattern reveals the truth of our past in a way no other book before it has been able to do It is proof positive that we have been lied to about our past It is proof that the ancients understood the fundamental nature of the universe in which we live It also proves that they hid what they knew The most important question in our world today might be Why did they hide this most sacred knowledge **An Actological Theology** Malcolm Torry, 2024-05-30 An actology introduced by the first book in this series Actology Action Change and Diversity in the Western Philosophical Tradition understands reality as action in changing patterns Actological Readings in Continental Philosophy reads a number of continental philosophers through this lens and An Actology of the Given explores the concepts of the gift givenness and giving in the light of reality understood as action in changing patterns Mark s Gospel An Actological Reading is what it says it is An Actological Metaphysic is a more systematic treatment of cosmology and of such concepts as truth knowledge causality time space life and society to see what happens when they are understood actologically that is with reality understood as action in changing patterns An Actological Theology similarly asks what Christian theology might look like if God the universe ourselves and everything else is understood as action in changing patterns **God and His Children** George Hayes, 2020-12-30 This book is the result of God s mysterious activities on George Hayes s behalf George has been beholden to God throughout his life He continues to return God s love with a second book resuming the exposition of God and the Western World that divulged the works of God as He spread Christianity worldwide The focus here is an understanding of mankind s advance to high intelligence and a comparison of man s technologies to God s technologies God s technologies include dark matter dark energy DNA and RNA Included in this discussion are more details on the creation and sustenance of the universe An example of the information discussed is the interplay of dark matter and dark energy just prior to and during the Big Bang A discussion of the climate change problems we are experiencing is presented including a list of major cities worldwide that may be submerged by a minimum two hundred foot rise in sea level There is a presentation of changes to Earth as Pangea broke up eventually forming the continents we know and how life on Earth changed as God affected evolution to bring mammals upon Earth and then manipulated DNA to give rise to modern man A discussion of mankind s religions is conducted Important findings in the garden continent of Africa regarding distribution of languages are discussed as well as a finding that may lead to the original language used by God to converse with Adam and Eve as well as used by God to direct dark matter and dark energy when He spoke our universe into existence In conclusion firstly God s works from before the Big Bang until the coming of Jesus Christ is summarized Secondly a briefing on God s march through time is displayed as the word of Jesus Christ is spread worldwide Thirdly the efforts are listed for avoidance of leaving a badly damaged Earth with our coasts and their infrastructures becoming submerged There are two distinct audiences for whom George has developed both books The first is the scientific community The second audience is the average person

living on Earth and there may be passages that confuse them due to technical detail You may want to skip those passages and you can You will still have an engrossing read But if you reread them you may develop a complete understanding of the marvels God Almighty has accomplished to bring Earth's human beings to the status we have reached today **Mark's Gospel: An Actological Reading** Malcolm Torry, 2022-05-19 This might look like an ordinary commentary on Mark's Gospel but it isn't one It understands reality as Action actions change diversity movement and the dynamic rather than as Being beings the unchanging the unitary rest and the static and it reads Mark's Gospel in the light of that distinctive understanding of reality It is all about action change and diversity and it understands God Jesus and ourselves as action change and diversity The initial chapter introduces the action based understanding of reality as action in changing patterns an actology rather than an ontology Then follows a section by section close study of the Gospel The result is a unique and somewhat unexpected reading of the text and a distinctive theology to match **Alternative Concepts of God** Andrei Buckareff, Yujin Nagasawa, 2016-01-21

The concept of God according to traditional Judeo Christian Islamic theism minimally includes the following theses i There is one God ii God is an omniscient omnipotent and morally perfect agent iii God is the creator ex nihilo of the universe and the sustainer of all that exists and iv God is an immaterial substance that is ontologically distinct from the universe Proponents of alternative concepts of God such as pantheism panentheism religious anti realism developmental theism and religious naturalism exclude at least one of these claims A number of prominent philosophers and scientists have expressed sympathy with alternative concepts of the divine However voices raised in defense of these concepts tend not to be taken seriously in contemporary analytic philosophy of religion This volume aims to shed light on alternative concepts of God and to thoroughly consider their merits and demerits The contributors are leading analytic philosophers of religion including critics of these views as well as sympathizers This is the first contemporary edited collection featuring the work of analytic philosophers of religion covering such a wide range of alternative concepts of God

The God Secret Mike Hockney, 2013-09-30 Even God has an ultimate secret and since the dawn of time humanity has sought to discover it Our finest minds noblest souls and most adventurous spirits have quested for the Holy Grail the Philosopher's Stone and the mystical Blue Flower of transcendent perfection Prometheus stole the fire of the gods to give to humanity and suffered a terrible punishment for his beneficence and audacity Faust obsessively pursued the infinite and unreachable and was willing to pay any price even if it cost him his soul Lowest humanity gets on its knees and belly to God Highest humanity will never rest until it knows the Mind of God and takes possession of the key to the innermost secrets of existence This book provides the astonishing answer to the supreme question what is the meaning of life The answer is as wondrous as it ought to be Despite appearances we really do live in the best of all possible worlds one that is gradually turning us into exactly what we want to be the Gods themselves **Through Science to God** Floyd Lavern Darrow, 1925

God, Science, and Religious Diversity Robert T. Lehe, 2018-07-24 Two major obstacles to belief in God in the twenty first

century are the idea that science is incompatible with religious faith and the idea that the diversity of religions undermines the credibility of belief that any one religion could be truer than the others This book addresses both of these challenges to belief in God and explores a connection between them It argues that science and religion are not only compatible but that some recent scientific discoveries actually support belief in the existence of the Creator God The diversity of religions is widely believed to undermine the credibility of religious truth claims because of the assumed lack of any way to settle disagreements between different religions This book argues that one rational way to adjudicate disagreements between the claims of diverse religions is to assess their consistency with contemporary science The book considers how Christian theism and Buddhism fare in harmonizing their metaphysical frameworks with contemporary scientific cosmology Although both theistic and Buddhist worldviews resonate with many recent scientific discoveries the Big Bang theory and cosmic fine tuning favor the Christian doctrine of creation

The God Problem Howard Bloom, 2012-08-30 God's war crimes Aristotle's sneaky tricks Einstein's pajamas information theory's blind spot Stephen Wolfram's new kind of science and six monkeys at six typewriters getting it wrong What do these have to do with the birth of a universe and with your need for meaning Everything as you're about to see How does the cosmos do something it has long been thought only gods could achieve How does an inanimate universe generate stunning new forms and unbelievable new powers without a creator How does the cosmos create That's the central question of this book which finds clues in strange places Why A does not equal A Why one plus one does not equal two How the Greeks used kickballs to reinvent the universe And the reason that Polish born Benoît Mandelbrot the father of fractal geometry rebelled against his uncle You'll take a scientific expedition into the secret heart of a cosmos you've never seen Not just any cosmos An electrifyingly inventive cosmos An obsessive compulsive cosmos A driven ambitious cosmos A cosmos of colossal shocks A cosmos of screaming stunning surprise A cosmos that breaks five of science's most sacred laws Yes five And you'll be rewarded with author Howard Bloom's provocative new theory of the beginning middle and end of the universe the Bloom toroidal model also known as the big bagel theory which explains two of the biggest mysteries in physics dark energy and why if antimatter and matter are created in equal amounts there is so little antimatter in this universe Called truly awesome by Nobel Prize winner Dudley Herschbach *The God Problem* will pull you in with the irresistible attraction of a black hole and spit you out again enlightened with the force of a big bang Be prepared to have your mind blown From the Hardcover edition

Trans-Dimensional Unified Field Theory George James Ducas, 2011-06-06 The concept of a First Cause of all reality or God can be arrived at through science metaphysics and philosophy This book establishes unification by defining parameters of equivalency through mathematics with the conclusion that all reality is consciousness The keys to the universe and description of equivalency are defined God can be known though works in creation when the true nature of being is understood truth known and the universe becomes an analogy of truth All reality is consciousness established through patterns of hierarchy and symmetry proceeding from God Action is

known by equivalency and love is received in Creation **God** John Middleton Murry,1929 **The Physics of God** Gary Nickolaus,2012-11-08 The author has spent his life in an obsessive quest to understand the nature of reality and the purpose of existence Many would say this is a symptom of Asperger s syndrome a high functioning form of autism While I certainly fit this profile I believe there is a different more amazing reason If an individual actualizes their potential in this space time it is also actualized in the Singularity the space less time less part of the dual universe at the quantum level Each step of my life has led to find the answers because in the Singularity I had already found them Here are the answers to God the universe and everything I give them to you now because you are in desperate need of them do with them what you will Buy the book or not read the book or not I do not care for I have completed my task and fulfilled my destiny and that is all that matters But if you do read the book be prepared for a remarkable vision of the nature of reality and a magnificent purpose of existence illustrated with poetry and painting *A God Who Cares?* Ernst Conradie,2025-02-26 This monograph may be read as a constructive supplement to Volume 4 of the series entitled An Earthed Faith Telling the Story amid the Anthropocene Volume 4 of this series is on the Christian doctrine of providence and is entitled Making Room for the Story to Continue In addition to an extended introduction on the state of the debate in the field this monograph includes three constructive essays on the doctrine of providence employing the traditional Reformed distinction between conservatio gubernatio and concursus as aspects of God s providence as well as a concluding essay provocatively entitled Who Cares a Damn The argument of this contribution may be captured in the following way 1 That God s providence is best understood in terms of the deeply held Christian conviction that God cares for every creature and not in terms of Greek assumptions around a pervading rational world order 2 That conservatio and gubernatio have found rough secular equivalents in global debates on sustainability mitigation and adaptation in the context of climate change 3 That conservatio and gubernatio are typically in tension with each other when it comes to the question whether God maintains order in nature and society or whether God transforms unjust orders the call for ecojustice 4 That concursus is not only an implication of conservatio and gubernatio but also captures the heart of the problem posed by the advent of the Anthropocene namely that some humans have become a geological force of nature while God s agency has become sidelined or usurped by the Promethean quest to become divine In each of these essays a highly constructive contribution is offered that advances the debate in eco theology by placing providence in the context of the shift from the Holocene to the Anthropocene The method adopted is a constructive argument based on a critical review of the available literature This monograph is scholarly and is addressed to other scholars in the fields of eco theology systematic theology and Reformed theology Belonging to God William Keepin, PhD,2016-06-23 A breathtaking exploration of divine love in Christianity Islam and Hinduism and the writings of leading mystics from these traditions culminating in a glorious universal path of love that is illuminated equally by modern science and ancient wisdom There is a unified call from all religions for the human soul to follow a profound path of love that leads to union with God

Belonging to God examines the commonalities in the scriptures writings of key mystics and core practices of Christianity Islam and Hinduism in order to illuminate a clear universal path of divine love It weaves the common spiritual threads into an elegant theological framework drawing on recent scientific advances in fractal geometry and quantum physics to emphasize the transforming fire that burns on every level from macrocosm to the microcosm thereby uniting the human soul with the heart of God Combining decades of Eastern and Western contemplative practice with scientific research Belonging to God concludes with twelve principles of divine love that point toward a universal spiritual path of the heart both within and beyond the religions Easy to comprehend and uplifting to read this interfaith journey will appeal to seekers of all faiths interested in the path of love that bridges the world religions as well as to believers within the Christian Hindu and Islamic traditions who are eager to learn exactly how their particular faith intersects in a deep way with other religions Belonging to God will also inspire students of perennial wisdom comparative mysticism and the new science and the large number of spiritual but not religious seekers who yearn for a universal path of divine love that honors yet transcends traditional religions

Problems of Evil and the Power of God James A. Keller, 2007-01-01 Why do bad things happen even to good people If there is a God why aren't God's existence and God's will for humans more apparent And if God really does miracles for some people why not for others This book examines these three problems of evil suffering divine hiddenness and unfairness if miracles happen as believers claim to explore how different ideas of God's power relate to the problem of evil

God, the Creator and Lord of All Samuel Harris, 1896 **God and the Multiverse** Klaas Kraay, 2014-11-13 In recent decades scientific theories have postulated the existence of many universes beyond our own The details and implications of these theories are hotly contested Some philosophers argue that these scientific models count against the existence of God Others however argue that if God exists a multiverse is precisely what we should expect to find Moreover these philosophers claim that the idea of a divinely created multiverse can help believers in God respond to certain arguments for atheism These proposals are of course also extremely controversial This volume collects together twelve newly published essays two by physicists and ten by philosophers that discuss various aspects of this issue Some of the essays support the idea of a divinely created multiverse others oppose it Scientific philosophical and theological issues are considered

Psychanics For Conversations With God: The Technology to Return to the ONE Thomas Michael Powell, **Following the Cloud - A Vision of the Convergence of Science and the Church** Harold Curtis, 2006-09-21 Following the footsteps of The Elijah Task and The Eternal Church Following the Cloud presents a prophetic vision of the convergence of Science the World and the Church which reveals the Hand of God in all Creation Page 4 of cover approximately mid page [God in Us](#) Anthony Freeman, 2001 This text is a radical representation of the Christian faith for the 21st century It overturns received ideas about God God is not an invisible person out there somewhere but lives in the human heart and mind as the sum of all our values and ideals guiding and inspiring our lives
