O'Shea's Guide to Spain and Portugal Henry O'Shea,1905 *Ready Reckoner of Leading Listed Companies* ,2006
Chiefly statistical data with reference to some listed companies from India Balancing Cultural and Corporate Identity
Aspects in Standardising and/or Localising Websites Constantin Meissner,2006-01-27 Inhaltsangabe Abstract The worldwide
economy is currently in a state of upheaval For decades the traditional marketplace was the common way to buy goods
services and to do business People set up shops and met in conference rooms to negotiate big business deals However since
the middle of the 90 s the business world has been undergoing a tremendous change While the basic rules for doing business
have not altered conditions and terms have changed significantly The emergence of the Internet was the main catalyst for
this drastic change in the business world At first the Internet was considered to be merely another medium with which
people had to deal with It was regarded as a concomitant which did not necessarily have to be used in companies But the
possibilities the Internet offered were and are tremendous Both private people and companies discovered the opportunities
harboured by the Internet Firms quickly realised that the Internet can and must be a medium which was worth taking a
closer look at The same applied for individuals However the very purpose of its work which is communication between
private people over the Internet can be overlooked and neglected in this context The first part of the present thesis focuses
on the Internet and how companies and individuals use the digital environment to do business The objective of firms is
mainly to do business either with other firms or with private people The Internet is considered to be a medium and an
interface both parties have to use With the help of the Internet companies are expected to increase their efficiency and
reduce transaction costs The unique characteristics of the Internet such as its omnipresence promise both parties an
increase in their business activities Furthermore the Internet has to be perceived as a great parallel world to the traditional
existing one Of course companies can exclusively exist and compete on the Internet But what they must not neglect is the
fact that individuals are people that communicate interact and perform everywhere on the Internet The human aspect is still
one of the central factors when looking at the relatively new phenomenon of the Internet Nevertheless this human factor has
somehow been neglected by web designers and marketers for several years Companies set up web pages filled them with
content and thought that someone might hopefully visit the page and buy a product online Every visitor to a website **The**
New Maharajahs Claudia Cragg,1996 Until India gained its independence from Britain in 1947 one third of the country was
ruled by a lazy pampered group of 565 maharajahs or princes They led hedonistic lives with scores of wives and concubines
palaces and jewels and spent much of their time playing polo and tiger hunting The late Prime Minister Indira Gandhi taxed
the maharajahs almost out of existence and few physical traces of their former glory remain However a new breed of
commercial princes has sprung up in their place **Outlook** ,2003 **The Official Railway Guide** ,1895
