Sharp,Martin G. Levine,Richard M. Sharp,2002 Unschooled Kerry McDonald,Peter Gray,2019-05-07 Education has become synonymous with schooling but it doesn't have to be As schooling becomes increasingly standardized and test driven occupying more of childhood than ever before parents and educators are questioning the role of schooling in society Many are now exploring and creating alternatives In a compelling narrative that introduces historical and contemporary research on self directed education

Unschooler also spotlights how a diverse group of individuals and organizations are evolving an old schooling model of education. These innovators challenge the myth that children need to be taught in order to learn. They are parents who saw firsthand how schooling can dull children's natural curiosity and exuberance and others who decided early on to enable their children to learn without school. Educators who left public school classrooms discuss launching self-directed learning centers to allow young people's innate learning instincts to flourish and entrepreneurs explore their disillusionment with the teach and test approach of traditional schooling. This is much more than a book about math. This is a book about hope. Imagine failing 11th grade math twice and going on to be known affectionately as The Lady Gaga of Math. That is the story of author Vanessa The Math Guru Vakharia. Thanks to an inspiring teacher who helped Vanessa heal her own relationship with math, Vanessa was then able to see math in a way that literally changed the trajectory of her life. Most people have experienced math trauma at least once, but by early mid-elementary school, many students have gotten the message that either they are a math person or they are not. In Math Therapy™, Vanessa shows that with the right tools and strategies, teachers can foster a culture in which every student is capable of building a better relationship with math and with themselves. Through the five M's of Math Therapy™: Mythbust, Moderate, Motivate, Makeover, and Measure, teachers can help their students overcome math trauma, cultivate a positive math identity, and develop a mathematical mindset. Written in a fun and conversational style and grounded in research on math education and neuropsychology, this book provides practical, hands-on strategies and tools that make it easy and fun for teachers to implement each step of Math Therapy™ in their classroom. Helps teachers unpack their own math history before diving in to what they can do to help their students. Addresses the trauma-induced stumbling blocks that many students face when tackling mathematics. Includes humorous and engaging real-life vignettes from celebrating Pi Day by visiting a prison to setting off a confetti cannon to celebrate a student's milestone to the time Vanessa's band opened for Bon Jovi and more. Much more than a book about

helping students kick butt in math class this book is about empowering students to develop the skills they need to live a life in which they truly believe that anything is possible even a better relationship with math
