Hermes Ecopsychology And Complexity Theory:

Hermes, Ecopsychology, and Complexity Theory Dennis L. Merritt, 2012-11 Who ever does not shy away from dangers of the most profound depths and the newest pathways which Hermes is always prepared to open may follow and reach whether as scholar commentator or philosopher a greater find and a more certain possession Karl Kerenyi An exegesis of the myth of Hermes stealing Apollo's cattle and the story of Hephaestus trapping Aphrodite and Ares in the act are used in *The Dairy Farmer's Guide to the Universe Volume III* to set a mythic foundation for Jungian ecopsychology Hermes Ecopsychology and Complexity Theory illustrates Hermes as the archetypal link to our bodies sexuality the phallus the feminine and the earth Hermes wand is presented as a symbol for ecopsychology The appendices of this volume develop the argument for the application of complexity theory to key Jungian concepts displacing classical Jungian constructs problematic to the scientific and academic community Hermes is described as the god of ecopsychology and complexity theory The front cover image is from a photo taken by the author of detail on an Attic Greek calyx krater by Euxitheos potter and Euphronios painter ca 515 BCE The gap between the horn like extensions atop Hermes staff highlight his domain the exchange and interactive field between things as between people consciousness and the unconscious body and mind and humans and nature *Political Passions and Jungian Psychology* Stefano Carta, Emilija Kiehl, 2020-12-29 In this book a multidisciplinary and international selection of Jungian clinicians and academics discuss some of the most compelling issues in contemporary politics Presented in five parts each chapter offers an in depth and timely discussion on themes including migration climate change walls and boundaries future developments and the psyche Taken together the book presents an account of current thinking in their psychotherapeutic community as well as the role of practitioners in working with the results of racism forced relocation colonialism and ecological damage Ultimately this book encourages analysts scholars psychotherapists sociologists and students to actively engage in shaping current and future political socio economic and cultural developments in this increasingly complex and challenging time *Rethinking Nature* Aurélie Choné, Isabelle Hajek, Philippe Hamman, 2017-05-18 Contemporary ideas of nature were largely shaped by schools of thought from Western cultural history and philosophy until the present day concerns with environmental change and biodiversity conservation There are many different ways of conceptualising nature in epistemological terms reflecting the tensions between the polarities of humans as masters or protectors of nature and as part of or outside of nature The book shows how nature is today the focus of numerous debates calling for an approach which goes beyond the merely technical or scientific It adopts a threefold critical historical and cross disciplinary approach in order to summarise the current state of knowledge It includes contributions informed by the humanities especially history literature and philosophy and social sciences concerned with the production and circulation of knowledge about nature across disciplines and across national and cultural spaces The volume also demonstrates the ongoing reconfiguration of subject disciplines as seen in the recent emergence of new interdisciplinary approaches and the

popularity of the prefix eco e g ecocriticism ecospirituality ecosophy and ecofeminism as well as subdivisions of ecology including urban ecology industrial ecology and ecosystem services Each chapter provides a concise overview of its topic which will serve as a helpful introduction to students and a source of easy reference This text is also valuable reading for researchers interested in philosophy sociology anthropology geography ecology politics and all their respective environmentalist strands Gathering the Light V. Walter Odajnyk, 2011-12 Originally published by Shambhala in 1993

Gathering the Light is a significant contribution to Jungian psychology and to research concerning the relationship between psychological and spiritual development Gathering the Light remains a groundbreaking work that integrates Jungian psychology alchemy and the practice of meditation It is one of very few if not the only Jungian book that demonstrates that the alchemical opus is not only an analogy of the individuation process but also a depiction of various experiential stages encountered in the course of meditation Gathering the Light compares Western and Eastern images of the goal of alchemy and of meditation practice it offers a psychological interpretation of the Zen Ox Herding pictures it argues that in essence both psychological and spiritual development consists of the withdrawal of projections and the appendix offers a critique of Wilber's mistaken view of Jung's conception of archetypes and provides a critical review of Thomas Cleary's translation of The Secret of the Golden Flower **Haruki Murakami and the Search for Self-Therapy** Jonathan Dil, 2022-02-24 Haruki

Murakami a global literary phenomenon has said that he started writing fiction as a means of self therapy What he has not discussed as much is what he needed self therapy for This book argues that by understanding more about why Murakami writes and by linking this with the question of how he writes readers can better understand what he writes Murakami's fiction in other words can be read as a search for self therapy In five chapters which explore Murakami's fourteen novels to date this book argues that there are four prominent therapeutic threads woven through Murakami's fiction that can be traced back to his personal traumas most notably Murakami's falling out with his late father and the death of a former girlfriend and which have also transcended them in significant ways as they have been transformed into literary fiction The first thread looks at the way melancholia must be worked through for mourning to occur and healing to happen the second thread looks at how symbolic acts of sacrifice can help to heal intergenerational trauma the third thread looks at the way people with avoidant attachment styles can begin to open themselves up to love again the fourth thread looks at how individuation can manifest as a response to nihilism Meticulously researched and written with sensitivity the result is a sophisticated exploration of Murakami's published novels as an evolving therapeutic project that will be of great value to all scholars of Japanese literature and culture **Pierre Teilhard de Chardin and Carl Gustav Jung: Side by Side** Fred Gustafson, 2015-03-21 Pierre Teilhard de Chardin and C G Jung Side by Side is an anthology written by authors from different backgrounds sharing how the lives of Pierre Teilhard de Chardin and Carl Gustav Jung impacted them personally and or how they understand the relevance of these two men for our present times Contributors to this fourth volume of the Fisher King

Review include John Dourley Peter Dunlap Barbara Faris Fred R Gustafson John Giannini Richard W Hanhardt Robert Henderson Steven B Herrmann Jane A Kelley Jon Magnuson Francisco Paco Martorell Stan V McDaniel Dennis L Merritt and Laura A Weber Though C G Jung and Pierre Teilhard de Chardin never met their independent intellectual inquiries and courageous researches pushed the personal and collective soul forward and placed both of them at the foreground of needing to understand and integrate on a planetary level the core values of their expansive work Both Jung and de Chardin were concerned with science and religion and operated within these paradigms Both of them shook the world by offering up views on one hand of the profound depths of the human psyche and on the other presenting a profound re consideration of evolution as a process leading toward a social unification of the planet One used the concept of individuation the other spoke of evolution Each took these concepts to a creative depth so much so that the world they lived in either deeply admired or detested them Both had conflicts in their chosen fields Jung was a psychologist who used the field of science to explore the religious depths of the human soul by studying mythology world religions folk tales dreams and human behavior Chardin used the ground of religion to work in the field of science via paleontology geology and physics as he explored a deeper and relevant understanding of evolution Though each began from different intellectual platforms they each crisscrossed into the other s territory of inquiry and related their ideas to include the full scope of humanity One went deeply into soul and found matter whereas the other went deeply into matter and found soul In their own ways both spent their careers trying to heal the split between spirit and matter in the weltanschauung of their times reflected in the human psyche and in the general religious views permeating most of Western culture *The Cry of Merlin* Dennis L. Merritt, 2012-06-28 Carl Jung can be seen as the prototypical ecopsychologist Volume II of *The Dairy Farmer s Guide to the Universe* explores how Jung s life and times created the context for the ecological nature of Jungian ideas It is an ecopsychological exercise to delineate the many dimensions of Jung s life that contributed to creation of his system his basic character nationality family of origin difficulties in childhood youthful environment period in Western culture and his pioneering position in the development of modern psychology Jung said every psychology is a subjective confession making it important to discover the lacuna in Jung s character and in his psychological system particularly in relation to Christianity Archetypically redressing the lacuna leads to the creation of a truly holistic integrated ecological psychology that can help us live sustainably on this beautiful planet Front Cover Jung s relief carving on the side of his Bollingen Tower a place he associated with Merlin The inscription reads May the light arise which I have borne in my body The woman reaching out to milk the mare is Jung s anima as a millennia old ancestress The image is an anticipation of the Age of Aquarius which is under the constellation of Pegasus The feminine element is said to receive a special role in this new eon Jung imagined the inspiring springs that gush forth from the hoof prints of Pegasus the fount horse to be associated with the Water Bearer the symbol of Aquarius Volume II is to Volume I as *Memories Dreams Reflections* is to *Man and His Symbols* it makes the basic premises more convincing and understandable

by illustrating how they evolved out of Jung's lived experience. It reveals the author's thoughts concerning a lacuna in Jung's system based on an analysis of his life from the perspective of attachment theory. The problem is immediately remedied by employing a particular archetype.

Land, Weather, Seasons, Insects Dennis L. Merritt, 2013. *The Dairy Farmer's Guide to the Universe Volume IV* explores the environment with the Midwest as an example using traditional Jungian and Hillmanian approaches to deepen our connection with the land, the seasons, and insects. The Dalai Lama said how we relate to insects is very important for what it reveals much about a culture's relationship with the psyche and nature. I had several Big Dreams in my last year of training at the Jung Institute in Zurich, including a single image dream of a typical Wisconsin pasture or meadow scene. This was the most beautiful landscape I have ever seen because it was shown with an inner light, what Jung called a numinous or sacred dream. Since returning to Wisconsin, I have let the mystery and power of that dream inspire me to learn and experience as much as possible about the land and the seasons of the upper Midwest, a process of turning a landscape into a soulscape. The means of doing this are presented in *Land, Weather, Seasons, Insects: An Archetypal View*, volume IV of *The Dairy Farmer's Guide to the Universe*. Jung, Hermes, and Ecopsychology. This involves the use of science, myths, symbols, dreams, Native American spirituality, imaginal psychology, and the I Ching. It is an approach that can be used to develop a deep connection with any landscape, meeting one of the goals of ecopsychology. Carl Sagan believed that unless we can re-establish a sense of the sacred about the earth, the forces leading to its destruction will be too powerful to avert.

This King of the Butterflies is probably the best known of the North American butterflies and is the chosen image for the Entomological Society of America. The caterpillar feeds on the lowly milkweed, genus *Asclepias*, named after the Greek god of healing. The plant and the insect are toxic to most organisms. The insect is known for its uniquely long and complicated migrations. Photo by Chuck Heikkinen.

Jungian Psychoanalysis Mark Winborn, 2023-08-31. *Jungian Psychoanalysis: A Contemporary Introduction* provides a concise overview of analytical psychology as developed by Carl Jung. Mark Winborn offers a succinct introduction to the key elements of Jung's conceptual model and method, as well as an outline of the major transitions, critiques, and debates that have emerged in the evolution of analytical psychology. Similarities and differences between analytical psychology and other psychoanalytic orientations are also identified. This approach allows those who already have familiarity with the Jungian model to expand their understanding while also providing an accessible map of the field to those with limited exposure to these concepts. Psychoanalysts, therapists, students, and instructors of all levels of experience will benefit from this unique introduction to the Jungian model of psychoanalysis.

Field, Form, and Fate Michael Conforti, 2019-11-28. C. G. Jung emphasized the deep link to the physical world that exists for the collective unconscious and its archetypes. Our dreams and symbols, as well as the patterns of our behavior, are shaped by the fact that we are creatures of a material universe. Michael Conforti's research has been directed to understanding the nature of these links and patterns in

the light of the new sciences quantum theory chaos theory self organization and the new biology Conforti's book successfully integrates this material to offer a new exciting challenge to psychotherapy It demonstrates that the study of consciousness cannot neglect the insights of the sciences and in doing so promises a unified view of mind and matter **Creases in**

Culture Dennis Patrick Slattery, 2014-01-15 This collection of essays written over a period of years entertains the shared place of psyche and poetics Dr Slattery has explored the manner in which the psyche is poetic and how poetry is deeply psycho mythical Influenced in part by the archetypal psychologist James Hillman's idea of the poetic basis of mind that comprises the soul's foundation Slattery's writing moves into the interactive field in which myth is the ground for both psyche and poetry The essays develop a further understanding of what has been called mythopoiesis the fundamental myth making and shaping capacity of the soul *Celibacy and Soul* Susan J. Pollard, 2015-01-15

Celibacy and Soul Exploring the Depths of Chastity is for women and men who have chosen to live into celibate chastity It is also for those people who live celibate love and though not vowed to a religious calling know the way of celibate love as their path You may find yourself celibate not by choice or you may hope it is a temporary stage Perhaps life interrupted your plans with the death of a loved one the loss of a relationship the situation of illness the trauma of abuse or you simply didn't settle with the desired partner and you want to find meaning in your life as a celibate person *Celibacy and Soul* is also useful for those in the helping professions as the work of a therapist asks a celibate kind of loving that can be catalyst for change in both clients and practitioners The Orphan Audrey Punnett, 2014-06-21 *The Orphan* A Journey to Wholeness addresses loneliness and the feeling of being alone in the world two distinct characteristics that mark the life of an orphan Regardless if we have grown up with or without parents we are all too likely to meet such experiences in ourselves and in our daily encounters with others With numerous case examples Dr Punnett describes how loneliness and the feeling of being alone tend to be repeated in later relationships and may eventually lead to states of anxiety and depression The main purpose of this book is not to just stay within the context of the literal orphan but also to explore its symbolic dimensions in order to provide meaning to the diverse experiences of feeling alone in the world In accepting the orphan within we begin to take responsibility for our own unique life journey a privileged journey in which one can at some point in time say with pride I am an orphan **The Dream and**

Its Amplification Nancy Swift Furlotti, Erel Shalit, 2013 *The Dream and Its Amplification* unveils the language of the psyche that speaks to us in our dreams We all dream at least 4-6 times each night yet remember very few Those that rise to the surface of our conscious awareness beckon to be understood like a letter addressed to us that arrives by post Why would we not open it The difficulty is in understanding what the dream symbols and images mean Through amplification C G Jung formulated a method of unveiling the deeper meaning of symbolic images This becomes particularly important when the image does not carry a personal meaning or significance and is not part of a person's everyday life Fourteen Jungian Analysts from around the world have contributed chapters to this book on areas of special interest to them in their work with dreams

This offers the seasoned dream worker as well as the novice great insight into the meaning of the dream and its amplification. Contributors to this edition of the Fisher King Review include Erel Shalit, Nancy Swift, Furlotti Thomas, Singer Michael Conforti, Ken Kimmel, Gotthilf Isler, Nancy Qualls Corbett, Henry Abramovitch, Kathryn Madden, Ron Schenk, Naomi Ruth Lowinsky, Christian Gaillard, Monika Wikman, and Gilda Frantz. *The Water of Life* David Hart, 2013-06-14. The intensive study of Jungian psychology was amplified by another subject taught continuously while I was a student at the Jung Institute in Zurich, Switzerland: the psychology of fairy tales. The study of fairy tales was the specialty of a fairly young single woman, Dr. Marie Louise von Franz. She lectured to us English-speaking students in well-spoken English, and the conviction and power of her voice made me feel how deep and meaningful these stories were to her. Not only that, I myself was immediately deeply affected by the convincing spiritual reality that was being presented to me in the stories themselves. It was as if the reality of life came out here in a wholly new form, untouched by the standard accepted form of common life. What most struck me, I think now, was the following realization: here in this story is a completely insoluble problem. I want to follow it all the way through, and to my surprise, finally feel that this problem has been solved. This outcome has been both essential and unbelievable to me. As one who felt that life posed just such an insoluble problem, I found the typical fairy tale both impossible and incredible. I found in fairy tales a healing presence and possibility for the terror of my own early life. This is the unexpressed feeling that kept me fastened on the totally unexpected subject of fairy tales. **Jungian Child Analysis** Audrey Punnett, 2018-05-21. Jungian Child Analysis brings together ten certified Child Foreword by Wanda Grosso. Contributors include Margo M. Leahy, Liza J. Ravitz, Brian Feldman, Lauren Cunningham, Patricia L. Speier, Maria Ellen Chiaia, Audrey Punnett, Susan Williams, Robert Tyminski, and Steve Zimmelman. *The Dream: The Vision of the Night* Max Zeller, 2015-06-01. A classic in the field of dream analysis, *The Dream: The Vision of the Night* is a collection of essays, lectures, and vignettes by Max Zeller, whose career included a law degree, a brief imprisonment in a Nazi Concentration Camp, study at the Jung Institute in Zurich, Switzerland, and thirty years of in-depth work as a Jungian analyst. In the eighteen pieces of this collection, Zeller intersperses theoretical writings, compassionate and incisive case studies, and powerful, almost haiku-like reminiscences of certain incidences in his life, from his meetings with C. G. Jung to his impressions of life in pre-war Nazi Germany. *The Dream: The Vision of the Night* is the best example of amplification of Jungian principles that can be found. Neither pure research nor pure memoir, the collection is an affective combination of both and, as such, best portrays the spirit of its author: always restless and searching, always compassionate and open-minded, and above all, always fascinated by the mystery and power of our dreams. **Shared Realities** Mark Winborn, 2014-06-01. *Shared Realities: Participation Mystique and Beyond* brings together Jungian analysts and psychoanalysts from across the United States, the United Kingdom, and France. Carl Jung's concept of participation mystique is used as a starting point for an in-depth exploration of shared realities in the analytic setting and beyond. The clinical narrative and theoretical discussions move through such related areas as

projective identification negative coniunctio reverie intersubjectivity the interactive field phenomenology neuroscience the transferential chimera shamanism shared reality of place borderland consciousness and mystical participation This unique collection of essays bridges theoretical orientations and includes some of the most original analytic writers of our time An essential read for psychoanalysts Jungian analysts psychotherapists and analytic candidates **The Rabbi, the Goddess, and Jung** Naomi Ruth Lowinsky, 2016-11-01 A sanctuary for the soul In *The Rabbi the Goddess and Jung* Naomi Ruth Lowinsky shows us how to create a sacred space by cultivating one's inner life Admitting that this is not an easy practice in our hectic fearful times she demonstrates how the word from within orients whether it comes as gift or disturbance guest or ghost riddle or revelation It may force a confrontation with one's worst fears It may visit in nightmare images such as the enormous spider with hairy legs and eight baleful eyes that appeared in a dream come to warn it would seem of the perils facing human nature and Mother Nature It is essential especially in difficult times to make space for what the Kabbalah calls the beyond that lies within the still small voice of the Self the long view of the wisdom traditions In this collection of poetic visionary essays Lowinsky tells stories of the Lady Tree who showed up when she was six and has wandered in and out of her life revealing her Goddess nature Active imagination enables her to work out unfinished business with ancestors including her father and Jung Dreams introduce her to her spirit guides and to a dancing rabbi who insists she study Kabbalah And that scary spider turns out to be Grandmother Spider a creator goddess who has the power if we recognize Her to help us reweave our relationship with earth
