Heroic Concrete Architecture And The New Boston:

Heroic Mark Pasnik, Chris Grimley, Michael Kubo, 2015-10-27 Often problematically labeled as Brutalist architecture the concrete buildings that transformed Boston during 1960s and 1970s were conceived with progressive minded intentions by some of the world's most influential designers including Marcel Breuer Le Corbusier I M Pei Henry Cobb Araldo Cossutta Gerhard Kallmann and Michael McKinnell Paul Rudolph Josep Lluís Sert and The Architects Collaborative As a worldwide phenomenon building with concrete represents one of the major architectural movements of the postwar years but in Boston it was deployed in more numerous and diverse civic cultural and academic projects than in any other major U S city After decades of stagnation and corrupt leadership public investment in Boston in the 1960s catalyzed enormous growth resulting in a generation of bold buildings that shared a vocabulary of concrete modernism The period from the 1960 arrival of Edward J Logue as the powerful and often controversial director of the Boston Redevelopment Authority to the reopening of Quincy Market in 1976 saw Boston as an urban laboratory for the exploration of concrete's structural and sculptural qualities What emerged was a vision for the city's widespread revitalization often referred to as the New Boston Today when concrete buildings across the nation are in danger of insensitive renovation or demolition Heroic presents the concrete structures that defined Boston during this remarkable period from the well known Boston City Hall New England Aquarium and cornerstones of the Massachusetts Institute of Technology and Harvard University to the already lost Mary Otis Stevens and Thomas F McNulty's concrete Lincoln House and Studio Sert Jackson essays by architectural historians Joan Ockman Elizabeth Cohen Keith N Morgan and Douglass Shand Tucci and interviews with a number of the architects themselves The product of 8 years of research and advocacy Heroic surveys the intentions and aspirations of this period and considers anew its legacies both troubled and inspired *MIT* Douglass Shand-Tucci, 2016-05-24 The Massachusetts Institute of Technology MIT was founded in 1861 as the cornerstone of Copley Square in Boston's Back Bay then the center of a progressive proto globalist Brahmin culture committed to intellectual modernism and educational innovation MIT founder William Barton Rogers's radical vision to teach by mind and hand was immediately successful In 1916 MIT growing by leaps and bounds moved its campus to the nearby Charles River Basin in Cambridge where it now stretches along the shore overlooking the Back Bay MIT The Campus Guide presents the history of the Institute's founding and its two campuses Today the campus is studded with buildings designed by noted architects such as William Welles Bosworth Alvar Aalto Eero Saarinen I M Pei Steven Holl Charles Correa J Meejin Yoon Frank Gehry and Fumihiko Maki among others Alongside the architecture is a distinguished array of public art including works by Picasso Henry Moore Alexander Calder Louise Nevelson Frank Stella Sol LeWitt and Jaume Plensa *The Architecture of Influence* Amanda Reeser Lawrence, 2023-11-21 How do we create the new from the old The Architecture of Influence explores this fundamental question by analyzing a broad swath of twentieth century architectural works including some of the best known examples of the architectural canon modern and postmodern

through the lens of influence The book serves as both a critique of the discipline's long standing focus on genius and a celebration of the creative act of revisioning and reimagining the past It argues that all works of architecture not only depend on the past but necessarily alter rewrite and reposition the traditions and ideas to which they refer Organized into seven chapters Replicas Copies Compilations Generalizations Revivals Emulations and Self Repetitions the book redefines influence as an active process through which the past is defined recalled and subsequently redefined within twentieth century architecture

Reclaiming Modernity Larry Bennett,2025-02-25 Why do we seek to return to the past or rescue pieces of the past that may have value in the present Why does nostalgia attach to an approach to the world social rules and material products that willfully rejected the past Larry Bennett explores the complexities of nostalgia with considerations of the historic preservation of brutalist architecture specifically Bertrand Goldberg's Prentice Women's Hospital in Chicago the memoirs and recollections of early and mid twentieth century Brooklyn and Detroit and the turntable's rebirth as a musical instrument alongside the vinyl LP's resurgence as a prized way of consuming music Bennett tracks modernity as expressed through ideas artistic products and widespread social practices His consideration of nostalgia focuses on our inclination to rediscover value in people places and social habits diminished by the passage of time Provocative and multidisciplinary Reclaiming Modernity delves into the paradox of how we feel nostalgia for

ideas and times that emerged from an impulse to shun nostalgia **The 99% Invisible City** Roman Mars, Kurt Kohlstedt, 2020 A beautifully designed guidebook to the unnoticed yet essential elements of our cities from the creators of the wildly popular 99% Invisible podcast **Resisting Garbage** Lily Baum Pollans, 2021-11-02 Resisting Garbage presents a new approach to understanding practices of waste removal and recycling in American cities one that is grounded in the close observation of case studies while being broadly applicable to many American cities today Most current waste practices in the United States Lily Baum Pollans argues prioritize sanitation and efficiency while allowing limited post consumer recycling as a way to quell consumers environmental anxiety After setting out the contours of this weak recycling waste regime Pollans zooms in on the very different waste management stories of Seattle and Boston over the last forty years While Boston's local politics resulted in a waste export program with minimal recycling Seattle created new frameworks for thinking about consumption disposal and the roles that local governments and ordinary people can play as partners in a project of resource stewardship By exploring how these two approaches have played out at the national level Resisting Garbage provides new avenues for evaluating municipal action and fostering practices that will create environmentally meaningful change

Architecture and Ugliness Wouter Van Acker, Thomas Mical, 2020-01-09 Whatever ugliness is it remains a problematic category in architectural aesthetics alternately vilified and appropriated used either to shock or to invert conventions of architecture This book presents sixteen new scholarly essays which rethink ugliness in recent architecture from Brutalism to eclectic postmodern architectural productions and together offer a diverse reappraisal of the history and theory of postmodern architecture and design The essays address both broad theoretical questions on ugliness and postmodern aesthetics as well as more specific analyses of significant architectural examples dating from the last decades of the twentieth century The book attends to the diverse relations between the aesthetic register of ugliness and closely connected aesthetic concepts such as the monstrous the ordinary disgust the excessive the grotesque the interesting the impure and the sublime This volume does not simply document the history of a postmodern anti aesthetic through case studies Instead it aims to shed light on aesthetic problems that have been largely overlooked in the agenda of architectural theory This book answers in detail the questions How did postmodern architects appropriate troublesome contradictions bound to the raw ugliness of the real How have the ugly and the antiaesthetic been a productive force in postmodern architecture How can ugliness be of value to architecture And how can architecture make good use of ugliness **Materialized Space: The**
