

Fuel Filter Replacement

We suggest you perform this procedure when the fuel tank is nearly empty.

1. Remove the rear cover and move the fuel valve to ON (page 14). Locate the carburetor near the lower right side of the engine. There are two bolts on the round carburetor bowl. The angled screw is used for fuel draining, while the other is to remove the bowl itself.

DRAIN BOLT

2. Drain any remaining fuel from the riding mower into an approved container by removing the angled carburetor drain bolt.

3. Locate the fuel supply line between the carburetor and fuel tank. Loosen the hose clamp where the fuel supply line connects to the fuel tank and disconnect the fuel line from the tank.

4. The fuel filter is a white plastic piece inside the fuel line. The filter partially sticks out of the fuel line. Note how the fuel filter is installed when you remove it from the fuel line.
5. Install a new fuel filter into the fuel line.
6. Dispose of the old filter and any spilled fuel properly.
