

FERGUSON TRACTOR OPERATOR'S MANUAL

The Ferguson Tractor is a precision built machine designed for efficient performance, economy, and ease of operation. Although it is unusually rugged and capable of giving outstanding service, it should not be abused or neglected. To obtain the high outstanding service for which the tractor has been designed and developed, the operator is recommended to note the following points:

1. Keep a new tractor on light work for fifty hours.
2. Do not attempt to turn sharply using one brake when traveling at high speed.
3. Do not attempt to pull from the top link connection.
4. Drive slowly in difficult going.
5. Do not carry anything on the implement.
6. Keep all nuts and bolts tight. This precaution is a general practice with all good operators, who have found that it prolongs the life of the tractor by keeping all parts in perfect alignment.
7. Use an adequate shield to protect the power take-off universal joints.
8. Do not use the drawbar without the drawbar stays.

Neufeld, 1969-12-15 The international or multi national corporation has become an important phenomenon in today's business world and Massey Ferguson is an ideal example of such an organization Through its predecessor companies it can train its history to 1847 and so it has encountered virtually all the difficulties and developments of the last hundred years in business organization and management science The development has not been straightforward for it has been much more than the growth of a single company in an expanding market Management reorganization and the introduction of new management planning and control techniques contributed a good deal to the company's expansion and because mergers played a vital role the history of other companies is also involved Dr Neufeld's study concentrates on the years after the Second World War a period in which the company's international operations

became increasingly complex He records the events that helped to shape the company s character and structure and at the same time investigates the company s successes and failures in adjusting to a changing national and international business environment His study reveals why Massey Ferguson developed into a global corporation an organization that considers the whole of the international environment when making decisions relating to the allocation of its marketing purchasing manufacturing and engineering activities *Massey-Ferguson* ,1989 *Farm Engines and Tractors* Harold E.
