Cruel Harvest Julien Mercille,2012-12-09 This book lifts the lid on the reality of Afghanistan s growing drug trade and the role played by the US military in its trajectory Where conventional accounts blame the Taliban for the expansion of drug production Cruel Harvest shows that the US shares responsibility by supporting drug lords refusing to adopt effective drug control policies and failing to crack down on drug money laundered through Western banks Julien Mercille argues that the best way to address drug problems is by reducing demand in consumer countries not by conducting fruitless and damaging counter narcotics missions in Afghanistan Encyclopedia of Forensic Science, Third Edition

Cannabis Britannica James H. Mills,2003-09-11 Cannabis Britannica explores the historical origins of the UK s legislation and regulations on cannabis preparations before 1928 It draws on published and unpublished sources from the seventeenth century onwards from archives in the UK and India to show how the history of cannabis and the British before the twentieth century was bound up with imperialism James Mills argues that until the 1900s most of the information and experience gathered by British sources were drawn from colonial contexts as imperial administrators governed and observed populations where use of cannabis was extensive and established This is most obvious

in the 1890s when British anti opium campaigners in the House of Commons seized on the issue of Government of India excise duties on the cannabis trade in Asia in order to open up another front in their attacks on imperial administration The result was that cannabis preparations became a matter of concern in Parliament which accordingly established the Indian Hemp Drugs Commission The story in the twentieth century is of the momentum behind moves to include cannabis substances in domestic law and in international treaties The latter was a matter of the diplomatic politics of imperialism as Britain sought to defend its cannabis revenues in India against American and Egyptian interests The domestic story focuses on the coming together of the police the media and the pharmaceutical industry to form misunderstandings of cannabis that forced it onto the Poisons Schedule despite the misgivings of the Home Office and of key medical professionals The book is the first full history of the origins of the moments when cannabis first became subjected to laws and regulations in Britain

Dancing with the Unconscious Danielle Knafo,2012-04-23 In writing and lecturing over the past two decades on the relationship between psychoanalysis and art Danielle Knafo has demonstrated the many ways in which these two disciplines inform and illuminate each other This book continues that discussion emphasizing how the creative process in psychoanalysis and art utilizes the unconscious in a quest for transformation and healing Part one of the book presents case studies to show how free association transference dream work regression altered states of consciousness trauma and solitude function as creative tools for analyst patient and artist Knafo uses the metaphor of dance to describe therapeutic action the back and forth movement between therapist and patient past and present containment and release and conscious and unconscious thought The analytic couple is both artist and medium and the dance they do together is a dynamic representation of the boundless creativity of the unconscious mind Part two of the book offers in depth studies of several artists to illustrate how they employ various media for self expression and self creation Knafo shows how artists though mostly creating in solitude are frequently engaged in significant relational processes that attempt rapprochement with internalized objects and repair of psychic injury Dancing with the Unconscious expands the theoretical dimension of psychoanalysis while offering the clinician ways to realize greater creativity in work with patients

Dallery, Charles E. Scott, Director of the Vanderbilt Center for Ethics and Distinguished Professor of Philosophy Charles E Scott, P. Holley Roberts, 1992-01-01 Ethics and Danger examines Heidegger s association with German National Socialism and attempts to understand both the question of politics in Heidegger s thought and the thought that gives rise to that question It explores the contribution of Heidegger s work to issues of ethics technology and social theory as well as his relationship to other thinkers such as Parmenides Aristotle Hegel Husserl Benjamin Levinas Rorty Foucault and Derrida Finally it addresses the more general question of the future of ethical thought within continental philosophy In order to engage the ethical issues surrounding Heidegger s life and thought the authors speak of dangers such as facism and the facile self congratulatory moral stance that Heidegger exemplifies The question of how to speak in the wake of Heidegger s thought takes many forms and the answers represent a diversity of viewpoints from both American and continental thinkers *The New Russia* ,1920 Bulletin on Narcotics ,1951

Drugging France Sara E. Black, 2022-09-15 In the nineteenth century drug consumption permeated French society to produce a new norm the chemical enhancement of modern life French citizens empowered themselves by seeking pharmaceutical relief for their suffering and engaging in self medication Doctors and pharmacists meanwhile fashioned themselves as gatekeepers to these potent drugs claiming that their expertise could shield the public from accidental harm Despite these efforts the unanticipated phenomenon of addiction laid bare both the embodied nature of the modern self and the inherent instability of the notions of individual free will and responsibility *Drugging France* explores the history of mind altering drugs in medical practice between 1840 and 1920 highlighting the intricate medical histories of opium morphine ether chloroform cocaine and hashish While most drug histories focus on how drugs became regulated and criminalized as dangerous addictive substances Sara Black instead traces the spread of these drugs through French society demonstrating

how new therapeutic norms and practices of drug consumption transformed the lives of French citizens as they came to expect and even demand pharmaceutical solutions to their pain Through self experimentation doctors developed new knowledge about these drugs transforming exotic botanical substances and unpredictable chemicals into reliable pharmaceutical commodities that would act on the mind and body to modify pain sensation and consciousness From the pharmacy counter to the boudoir from the courtroom to the operating theatre from the battlefield to the birthing chamber *Drugging France* explores how everyday encounters with drugs reconfigured how people experienced their own minds and bodies
