Mutti,2000 This introduction has been designed for students who have no more than a basic knowledge of economic theory Key sections on international finance international trade and open economy macroeconomics develop both the theory and the applications of particular policy issues As national economies have become more integrated through trade and capital flows international economics has come to be central to any economics curriculum This new edition of a classic introduction to the study of the topic has been designed to reflect this development in the economics curriculum The fifth edition has been thoroughly revised to take into account the latest issues and controversies New issues covered include New developments in regional trade blocks International Public Finance and trade policy Financial derivatives The Asian crisis European Monetary Union Accessible to students with economics only at an introductory level this text develops the intermediate micro and macro tools necessary for a rigorous understanding of trade and finance International Economics 5th Edition will thus enable the student to apply the set of theoretical tools necessary to explaining current events and policy proposals A variety of real world examples are employed to illustrate the relevance and policy implications of key economic concepts Written in a clear and readable manner International Economics 5th Edition includes a range of features designed to aid student learning The Publishers' Trade List Annual ,1887

Crime and Economics Kevin Albertson,Chris Fox,2011-10-05 Crime and Economics provides the first comprehensive and accessible text to address the economics of crime within the study of crime and criminology The economics of crime is an

area of growing activity and concern increasingly influential both to the study of crime and criminal justice and to the formulation of crime reduction and criminal justice policy As well as providing an overview of the relationship between economics and crime this book poses key questions such as What is the impact of the labour market and poverty on crime Can society decrease criminal activity from a basis of economic disincentives What forms of crime reduction and methods of reducing re offending are most cost beneficial Can illicit organised crime and illicit drug markets be understood better through the application of economic analysis For those interested in economic methods but without previous economic training this book also provides an accessible overview of key areas such as cost benefit analysis econometrics and the debate around how to estimate the costs of crime This book will be key reading for undergraduate and postgraduate students of criminology and economics and those working in the criminal justice system including practitioners managers and policy makers

International Economics II Giancarlo Gandolfo, 2013-03-09 There is no lack of good international economics textbooks ranging from the elementary to the advanced so that an additional drop in this ocean calls for an explanation In the present writer's opinion there seems still to be room for a textbook which can be used in both undergraduate and graduate courses and which contains a wide range of topics including those usually omitted from other textbooks These are the intentions behind the present book which is an outcrop from undergraduate and graduate courses in international economics that the author has been holding at the University of Rome since 1974 and from his on going research work in this field Accordingly the work is organized as two books in one by distributing the material between text and appendices The treatment in the body of this book is directed to undergraduate students and is mainly confined to graphic analysis and to some elementary algebra but it is assumed that the reader will have a good knowledge of basic microeconomics and macroeconomics so that the usual review material on production functions indifference curves standard Keynesian model etc etc has been omitted Each chapter is followed by an appendix in which the treatment is mainly mathematical and where i the topics explained in the text are treated at a level suitable for advanced undergraduate or first year graduate students and ii generalizations and or topics not treated in the text including some of those at the frontiers of research are formally examined
