IS-LM and Modern Macroeconomics Warren Young, Ben-Zion Zilberfarb, 2012-12-06 IS LM is perhaps the prime example of cognitive dissonance in economics and is problematic to many economists On the one hand the IS LM model is still taught by many academic economists or they use it to derive the AD AS approach On the other hand the same economists realize the limitations of the basic IS LM model and would not now use it for policy analysis as they did in the past The distinction between pedagogical and analytical efficacy is made by all the authors in this volume regarding the IS LM model Indeed even those who would reject using the model for modern policy analysis still see the basic model as useful for teaching purposes Moreover in an augmented form some of the authors in this volume would even see fit to use IS LM for modern policy analysis As will be seen therefore the IS LM model is not yet dead Rather the model's plasticity has enabled it to undergo a metamorphosis into augmented form enabling its continuing utilization in economics accordingly

Macroeconomics, Theories & Policies Richard T. Froyen, 1996 The author explains the differences among macroeconomists on issues of theory and policy while comparing and contrasting modern macroeconomic theory

Human Progress Amid Resistance to Change Joseph E. Pluta, 2011-04 In building their profession around carefully selected interpretations of the work of Adam Smith Alfred Marshall and others mainstream economists have embraced such concepts as the invisible hand equilibrium consumer rationality the marginal productivity theory the inevitability of diminishing returns and the fiction of pure competition In contrast the evolutionary economics of Thorstein Veblen and Clarence Ayres challenges all of these concepts as unproven and capable of telling us little or nothing about the actual operation of the economy Using the evolutionary framework Human Progress Amid Resistance to Change argues that all cultures since prehistory have faced two opposing forces technology including human knowledge and institutions rooted in ceremonialism The former is dynamic forward looking accepting of change cumulative one discovery builds on another and the major cause

of human progress The latter is static and consists of all customs traditions superstitions rituals ceremonies taboos and past binding religious beliefs that resist change The book illustrates in detail how these competing forces have interacted throughout the history of the human race and how mainstream economics fails to grasp the significance of their combined effects Макроэкономика.
