Psychological Classification and Diagnosis in Asylum Statistics, 1800 - 1948 Kevin Matthew Jones,2025-03-30

This book provides a detailed examination of the questions that preoccupied British alienists throughout the second half of the nineteenth century Was insanity one disorder with different forms or a set of distinct natural kinds that each had different causes symptoms and outlooks Was it possible to devise a standardised classification of the insanities that provides a scientific basis to psychological diagnosis Could statistics on psychological diagnosis provide data to help reveal the nature of insanity The classification at the centre of these debates the Medico Psychological Association's Table of the Forms of Insanity caused deep divisions that took decades to resolve and hampered efforts to develop asylum medical statistics on psychological diagnosis The use of the classification in national medical statistics was tantamount to being the standard classification for the asylum As the appeal of statistics grew within medical circles the debates intensified and the divisions grew deeper Despite lofty aims and years of debate attempts to develop national statistics on psychological diagnosis had achieved very little by the beginning of the twentieth century The failure of these efforts hampered by the unwieldy processes adopted by Lunacy administration led to the Table of the Forms falling into obscurity after its final set of revisions in 1932 In presenting for the first time the debates surrounding the Table of the Forms of Insanity this volume calls for a re evaluation of the history of psychiatric classification through its exploration of the underappreciated links between the standardisation of psychological diagnosis and the development of mental health statistics By interrogating the links between asylum governance and the clinic this book presents considerations on classification that still resound today and provides valuable reading for scholars interested in the social history of medicine the history of psychiatry and the history of science

Belly-Rippers, Surgical Innovation and the Ovariectomy Controversy Sally Frampton, 2018-12-30 This open access book looks at the dramatic history of ovariectomy an operation to remove ovarian tumours first practiced in the early nineteenth century Bold and daring surgeons who performed it claimed to be initiating a new era of surgery by opening the abdomen Ovariectomy soon occupied a complex position within medicine and society as an operation which symbolised surgical progress while also remaining at the boundaries of ethical acceptability This book traces the operation's innovation from its roots in eighteenth century pathology through the denouncement of those who performed it as belly rippers to its rapid uptake in the 1880s when ovariectomists were accused of over operating Throughout the century the operation was never a hair's breadth from controversy

Coercive Treatment in Psychiatry Thomas W. Kallert, Juan E. Mezzich, John Monahan, 2011-04-25 Coercion is one of the most fascinating and controversial subjects in psychiatry It is a highly sensitive and hotly debated topic in which clinical practice ethics the law and public policy converge This book considers coercion within the healing and ethical framework of therapeutic relationships and partnerships at all levels and addresses the universal problem of how to balance safety versus autonomy when dealing with psychiatric treatment Coercive Treatment in Psychiatry is a much needed contribution to the literature The first three sections deal with the conceptual and clinical aspects of coercive treatment the legal aspects and the ethical aspects of coercive treatment In detail these sections cover a broad spectrum of issues coercion in institutions and in the community coercive treatment and stigma the definition of best practice standards for coercive treatment de escalation of risk situations recent developments in mental health legislation mental health care and patients rights cross cultural perspectives on coercive treatment historical injustice in psychiatry and paternalism in mental health The fourth section features users views on coercive treatment giving voice to an often unheeded population Finally the book addresses the original topic of coercion and undue influence in decisions to participate in psychiatric research This book presents the first comprehensive review of the issue of coercion in psychiatry With chapters written by the leading experts in the field many of whom are renowned as clear thinkers and experienced clinicians it may be seen as a starting point for international discussions and initiatives in this field aiming to minimize coercion Highly Commended in the Psychiatry section of the 2012 BMA Book Awards

Becoming Foucault Michael C. Behrent, 2023-12-04 Though Michel Foucault is one of the most important thinkers of the twentieth century little is known about his early life Even Foucault's biographers have neglected this period preferring instead to start the story when the future philosopher arrives in Paris Becoming Foucault is a historical reconstruction of the world in which Foucault grew up the small city of Poitiers France from the 1920s until the end of the Second World War Beyond exploring previously

unexamined aspects of Foucault's childhood including his wartime ordeals it proposes an original interpretation of Foucault's oeuvre Michael Behrent argues that Foucault in addition to being a theorist of power knowledge and selfhood was also a philosopher of experience He was a thinker intent on making sense of the events that he lived through Behrent identifies four specific experiences in Foucault's childhood that exercised a decisive influence on him and that in various ways he later made the subject of his philosophy his family's deep connections to the medical profession his upbringing in a bourgeois household the German Occupation during World War II and his Catholic education Behrent not only reconstructs the specific nature of these experiences but also shows how reference to them surfaces in Foucault's later work In this way the book both sheds light on a formative period in the philosopher's life and offers a unique interpretation of key aspects of his thought

Broken Hearts David S. Jones, 2014-09-01 A history illustrating the complexity of medical decision making and risk Still the leading cause of death worldwide heart disease challenges researchers clinicians and patients alike Each day thousands of patients and their doctors make decisions about coronary angioplasty and bypass surgery In *Broken Hearts* David S. Jones sheds light on the nature and quality of those decisions He describes the debates over what causes heart attacks and the efforts to understand such unforeseen complications of cardiac surgery as depression mental fog and stroke Why do doctors and patients overestimate the effectiveness and underestimate the dangers of medical interventions especially when doing so may lead to the overuse of medical therapies To answer this question Jones explores the history of cardiology and cardiac surgery in the United States and probes the ambiguities and inconsistencies in medical decision making Based on extensive reviews of medical literature and archives this historical perspective on medical decision making and risk highlights personal professional and community outcomes

Inclusion Steven Epstein, 2008-09-15 With *Inclusion* Steven Epstein argues that strategies to achieve diversity in medical research mask deeper problems ones that might require a different approach and different solutions Formal concern with this issue Epstein shows is a fairly recent phenomenon Until the mid 1980s scientists often studied groups of white middle aged men and assumed that conclusions drawn from studying them would apply to the rest of the population But struggles involving advocacy groups experts and Congress led to reforms that forced researchers to diversify the population from which they drew for clinical research While the prominence of these inclusive practices has offered hope to traditionally underserved groups Epstein argues that it has drawn attention away from the tremendous inequalities in health that are rooted not in biology but in society Epstein's use of theory to demonstrate how public policies in the health profession are shaped makes this book relevant for many academic disciplines Highly recommended Choice A masterful comprehensive overview of a wide terrain Troy Duster Biosocieties

In Search of Madness Brendan Kelly, 2022-04-14 Who is Mad Who is Not And Who Decides In this fascinating new exploration of mental illness Professor Brendan Kelly examines madness in history and how we have responded to it over the centuries. We travel from the psychiatric institutions of modern India to scientific studies of the brain in Victorian England. We discover the beginnings of formal asylum care and witness the experimental therapies of the cavernous psychiatric hospitals of the nineteenth and early twentieth centuries in Ireland, England, Belgium, Italy, Germany and the United States. Covering lobotomy and the Nazis Aktion T4 campaign as well as Freud, psychoanalysis, cognitive behavioural therapy and neuroscience, *In Search of Madness* examines the shift in recent times from psychobabble to neurobabble. This is an all encompassing history of one of the most basic fears to haunt the human psyche, madness, and it concludes with a passionate manifesto for change, four proposals to make mental health services more effective, accessible and just. [American Madness](#) Richard Noll, 2011-11-28 In 1895 not a single case of dementia praecox was reported in the United States. By 1912 tens of thousands of people with this diagnosis were locked up in asylums, hospitals and jails. By 1927 it was fading away. This book explains how such a terrible disease could be discovered, affect so many lives and then turn out to be something else. **The Pursuit of the Nazi Mind** Daniel Pick, 2014-05 The remarkable story of how the Allies used psychoanalysis to delve into the motivations of the Nazi leadership and to explore the mass psychology of fascism. **Decriminalizing Mental Illness** Katherine Warburton, Stephen M. Stahl, 2021-01-07 An in depth examination of the factors contributing to the criminalization of mental illness and strategies to combat them. **Circuit Breaking** Robert Youdin, 2023-11-14 Circuit Breaking presents a comprehensive guide for clinicians to help people eliminate their substance abuse problems. Readers will learn that substance abuse is not caused by a disease but is the consequence of their brains being chronically exposed to psychoactive substances that over time create brain circuits that drive compulsive substance abuse. **Transnational Psychiatries** Waltraud Ernst, Thomas Mueller, 2010-05-11 This book offers something new in the history of psychiatry. Within a transnational research framework it presents original historical case studies and conceptual reflections on comparative and related methodologies. Systematic comparison and transfer studies as well as aspects of entangled history are employed in relation to themes such as different cultural meanings pertaining to the same term, transfer of treatment practices and institutional regimes, localised practices and re-emerging forms of patient care, circulation of early anti-psychiatrists' views, impact of war and politics on patients' welfare and on psychiatric discourse and diversification of psychotherapeutic and physical practices. The book includes chapters on the history and historiography of psychiatry and psychotherapy in different

geo cultural regions in South America Asia the Pacific and Europe The contributors present multilayered interpretations emphasising commonalities and interconnections as well as contrasts and discontinuities With its wide ranging geographical focus and attention to conceptual issues this collection will assist to integrate and reconfigure the historiography of psychiatry

Asylum Ways of Seeing Heather Murray, 2022-01-04 Asylum Ways of Seeing uncovers a patient culture within twentieth century American psychiatric hospitals that did not just imbibe ideas from the outside world but generated ones of their own In illuminating seemingly resigned patients in these settings it makes a call to reconsider the philosophical possibilities within resignation

Treatment for Crime David Birks, Thomas Douglas, 2018-10-18 Preventing recidivism is one of the aims of criminal justice yet existing means of pursuing this aim are often poorly effective highly restrictive of basic freedoms and significantly harmful Incarceration for example tends to be disruptive of personal relationships and careers detrimental to physical and mental health restrictive of freedom of movement and rarely more than modestly effective at preventing recidivism Crime

preventing neurointerventions CPNs are increasingly being advocated and there is a growing use of testosterone lowering agents to prevent recidivism in sexual offenders and strong political and scientific interest in developing pharmaceutical treatments for psychopathy and anti social behaviour Future neuroscientific advances could yield further CPNs we could ultimately have at our disposal a range of drugs capable of suppressing violent aggression and it is not difficult to imagine possible applications of such drugs in crime prevention Neurointerventions hold out the promise of preventing recidivism in ways that are both more effective and more humane But should neurointerventions be used in crime prevention And may the state ever permissibly impose CPNs as part of the criminal justice process either unconditionally or as a condition of parole or early release The use of CPNs raises several ethical concerns as they could be highly intrusive and may threaten fundamental human values such as bodily integrity and freedom of thought In the first book length treatment of this topic Treatment for Crime brings together original contributions from internationally renowned moral and political philosophers to address these questions and consider the possible issues recognizing how humanity has a track record of misguided harmful and unwarrantedly coercive use of neurotechnological solutions to criminality The Engaging Philosophy series is a new forum for collective philosophical engagement with controversial issues in contemporary society
