The industrial inverter Chloride® CP70i is a DC/AC converter combining IGBT/PWM technology with proven digital control to offer the best performances under any electrical and environmental conditions.

## Range Overview

Chloride® CP70i inverter converts a DC input voltage (from batteries or from a DC bus) into a perfect sinusoidal output voltage to provide power to critical AC loads.

It uses the patented digital Vector Control technology which increases the performances of power components, enables an active conditioning of the load and allows personalized system settings. The result is improved reliability for the process and enhanced safety for the personnel.

Chloride® CP70i range offers a wide choice of DC input voltages (from 125 Vdc to 220 Vdc) and of output voltages. It is available from 5 kVA to 250 kVA in single-phase output configuration, and from 5 kVA to 320 kVA in three-phase output configuration.

Chloride® CP70i inverter is also available with 400 Vdc input. This configuration can be combined with a CP70R rectifier-charger in order to design specific high ratings double conversion AC UPS systems, up to 500 kVA.

To further improve load availability and process reliability, Chloride® CP70i is able to operate in dual parallel configuration, with centralized or distributed reserve line, and can include an AC bus-tie.
