

The main extension of most 095-A cranes is hydraulic, retractable at almost 75 metres.

The design solution includes bending the oil for the hydraulic extension through the cylinder system, which minimises oil volume needed in piping on the outer boom.

HSB 095 – the strong choice in the 10 tm class

The HSB 095 is a further development of the popular HSB 090, but it does everything better. Both cranes look very similar, but that's where the similarities cease.

The HSB 095 features a new, low-headroom boom system with a separate telescopic cylinder on each extension. We have done away with all hoisting on the outer boom and extensions and reduced the need for a hook attachment to just one – on the outer extension. All that leads to easier handling in confined areas. And new larger slides, considerably reduce friction and give smoother boom action.

The HSB 095's working geometry has been optimised, resulting in better lifting capacity – in the upper lifting range. Capacity has been boosted by over 20%. And at the same time, the crane has an amazing close-in lifting height.

The HSB 095 is a modern general cargo crane in the 10 tm capacity class. It offers excellent manoeuvrability. Chosen between cable controls, HSB's well-known joysticks version with the new computerised 3D or the more advanced combination with HSB's video and 3D-view of control elements.
