A View of Operations Research Applications in Italy, 2018 Mauro Dell'Amico,Manlio Gaudio,Giuseppe Stecca,2019-09-10 This book presents expert descriptions of the successful application of operations research in both the private and the public sector including in logistics transportation product design production planning and scheduling and areas of social interest Each chapter is based on fruitful collaboration between researchers and companies and company representatives are among the co authors The book derives from a 2017 call by the Italian Operations Research Society AIRO for information from members on their activities in promoting the use of quantitative techniques and in particular operations research techniques in society and industry A booklet based on this call was issued for the annual AIRO conference but it was felt that some of the content was of such interest that it deserved wider dissemination in more detailed form This book is the

outcome It equips practitioners with solutions to real life decision problems offers researchers examples of the practical application of operations research methods and provides Master s and PhD students with suggestions for research development in various fields Stochastic and Statistical Methods in Hydrology and Environmental Engineering Keith W. Hipel,2012-12-06 Objectives The current global environmental crisis has reinforced the need for developing flexible mathematical models to obtain a better understanding of environmental problems so that effective remedial action can be taken Because natural phenomena occurring in hydrology and environmental engineering usually behave in random and probabilistic fashions stochastic and statistical models have major roles to play in the protection and restoration of our natural environment Consequently the main objective of this edited volume is to present some of the most up to date and promising approaches to stochastic and statistical modelling especially with respect to groundwater and surface water applications Contents As shown in the Table of Contents the book is subdivided into the following main parts GENERAL ISSUES PART I PART II GROUNDWATER PART III SURFACE WATER PART IV STOCHASTIC OPTIMIZATION PART V MOMENT ANALYSIS PART VI OTHER TOPICS Part I raises some thought provoking issues about probabilistic modelling of hydro logical and environmental systems The first two papers in Part I are in fact keynote papers delivered at an international environmetrics conference held at the University of Waterloo in June 1993 in honour of Professor T E Unny In his keynote pa per Dr S J Burges of the University of Washington places into perspective the historical and future roles of stochastic modelling in hydrology and environmental engineering Additionally Dr Burges stresses the need for developing a sound scien tific basis for the field of hydrology Professor P E Scientific and Technical Aerospace Reports ,1985
