Design Recommendations for Intelligent Tutoring Systems: Volume 9 - Competency-Based Scenario Design Anne Sinatra, Arthur C. Graesser, Xiangen Hu, Benjamin Goldberg, Andrew J. Hampton, Joan H. Johnston, 2022-02-02 This book focuses on the topic of competency based scenario design as it relates to Intelligent Tutoring Systems ITSs The current book is the ninth in a series of books that examine key topics in ITSs The chapters in this book specifically relate the work presented to applications for the Generalized Intelligent Framework for Tutoring GIFT Sottolare Brawner Goldberg Sottolare Brawner Sinatra Johnston 2017 GIFT is an open source domain independent service oriented modular architecture for ITSs GIFT has specifically been designed to allow for reusability of the GIFT architecture GIFT tools and instructional content materials Further GIFT has been designed with the goals of reducing the amount of time necessary to author ITSs and reducing the skill level required for the authoring process GIFT can be used to create ITSs that can be distributed both locally on a computer and virtually in the Cloud In addition to creating ITSs GIFT can be used to examine instructional outcomes and conduct research The topic of this book Competency Based Scenario Design is highly relevant to the development of ITSs Scenarios are information rich task problem contexts that are closely aligned with real world situations that professionals face in their jobs The tasks problems exhibit ecological validity rather than stripped down abstract simplifications Developers of ITSs and other adaptive instructional systems need to have principled guidance on how to design these scenarios An example scenario may be a close match to a particular situation in the past but not be representative of a large range of situations that professionals experience in their job An example scenario may be very realistic but not provide reliable and valid assessments of the learners performance to guide assessments summative formative or stealth Research teams that build high quality scenarios need to include expertise in the targeted profession assessment learning science and computer science The current book brings together experts on ITSs to discuss their work as it applies to Competency Based Scenario Design We believe that this book can be used as a resource for those who have an interest in developing Scenarios for ITSs and who want to learn more about how to do so

Assessing Writing to Support Learning Sandra Murphy, Peggy O'Neill, 2022-11-08 In this book authors Murphy and O'Neill propose a new way forward moving away from high stakes test based writing assessment and the curriculum it generates and toward an approach to assessment that centers on student learning and success Reviewing the landscape of writing assessment and existing research based theories on writing the authors demonstrate how a test based approach to accountability and current practices have undermined effective teaching and learning of writing This book bridges the gap between real world writing that takes place in schools college and careers and the writing that students are asked to do in standardized writing assessments to offer a new ecological approach to writing assessment Murphy and O'Neill's new way forward turns accountability inside out to help teachers understand the role of formative assessments and assessment as inquiry It also

brings the outside in by bridging the gap between authentic writing and writing assessment Through these two strands readers learn how assessment systems can be restructured to become better aligned with contemporary understandings of writing and with best practices in teaching With examples of assessments from elementary school through college chapters include guidance on designing assessments to address multiple kinds of writing integrate reading with writing and incorporate digital technology and multimodality Emphasizing the central role that teachers play in systemic reform the authors offer sample assessments developed with intensive teacher involvement that support learning and provide information for the evaluation of programs and schools This book is an essential resource for graduate students instructors scholars and policymakers in writing assessment composition and English education
