SmartBook™ is the first and only adaptive reading experience designed to change the way students read and learn It creates a personalized reading experience by highlighting the most impactful concepts a student needs to learn at that moment in time As a student engages with SmartBook the reading experience continuously adapts by highlighting content

based on what the student knows and doesn't know. This ensures that the focus is on the content he or she needs to learn while simultaneously promoting long-term retention of material. Use SmartBook's real-time reports to quickly identify the concepts that require more attention from individual students or the entire class.

Additionally, this text contains an activity set that corresponds to each section of the companion text *Mathematics for Elementary Teachers: An Activity Approach*, also by the Bennett, Burton, and Nelson team. *Mathematics for Elementary Teachers: An Activity Approach* can be used independently or along with its companion *Mathematics for Elementary Teachers: A Conceptual Approach*.

Loose Leaf for Mathematics for Elementary Teachers: A Conceptual Approach Albert B. Bennett, Jr., Professor, Ted Nelson, Laurie J. Burton, 2015-01-22. *Assessment and Learning in Knowledge Spaces* is a web-based, artificially intelligent assessment and learning system. ALEKS uses adaptive questioning to quickly and accurately determine exactly what a student knows and doesn't know in a course. ALEKS then instructs the student on the topics she is most ready to learn. As a student works through a course, ALEKS periodically reassesses the student to ensure that topics learned are also retained. ALEKS courses are very complete in their topic coverage, and ALEKS avoids multiple-choice questions. A student who shows a high level of mastery of an ALEKS course will be successful in the actual course she is taking.
