Charatan,Aaron Kans,2024-12-01 This introductory textbook covers all the mathematical concepts necessary for a computing
degree limiting coverage only to the material needed for the fundamentals of computing rather than delving into the higher
mathematical concepts Key features include Gears content toward students who are less confident in mathematics Provides
exercises with solutions at the end of each chapter Teaches topics using everyday language Includes numerous worked
examples in every chapter Uses familiar scenarios to introduce mathematical concepts Discusses the relevance of each
chapter topic to the world of computing Core topics covered include Set and groups Matrices Relations and functions Logic
and proofs Combinatorics Probability Graph theory The book is written for students embarking on an undergraduate or
foundation degree course in computer science or related discipline and aims to provide the basic skills and knowledge of
discrete mathematics required for such a course Whereas many textbooks tend to teach this subject in a way that is more
suitable for mathematicians this text specifically targets first year students on computing courses and aims to teach only the
basic material that they will need for their computing degree Dr Quentin Charatan is a former Principal Lecturer and now
visiting lecturer at the University of East London UK Dr Aaron Kans is the Head of the Computer Science and Digital
Technologies Department in the School of Architecture Computing Engineering at the same institution *The Oxford Guide*
