As warfighting demands on SOCOM have intensified SOCOM's needs for significantly improved radio frequency RF systems have increased. Toward a Universal Radio Frequency System for Special Operations Forces examines the current state of the art for both handheld and manpackable platform mounted RF systems and determines which frequencies could be provided by handheld systems. The book also explores whether or not a system that fulfills SOF's unique requirements could be deployed in a reasonable time period. Several recommendations are included to address these and other issues. Military Cost-Benefit Analysis Francois Melese, Anke Richter, Binyam Solomon, 2015-03-27 This is the first comprehensive book on Military Cost Benefit Analysis and provides novel approaches to structuring cost benefit and affordability analysis amidst an uncertain defense environment and cloudy fiscal prospects. Lifting the veil on military Cost Benefit Analysis, this volume offers several new practical tools designed to guide defense investments and divestments combined with a selection of real world applications. The widespread employment of Cost Benefit Analysis offers a unique opportunity to transform legacy defense forces into efficient, effective, and accountable 21st century organizations. A synthesis of economics, statistics, and decision theory, CBA is currently used in a wide range of defense applications in countries around the world: i) to shape national security strategy; ii) to set acquisition policy; and iii) to inform critical investments in people, equipment, infrastructure, services, and supplies. As sovereign debt challenges squeeze national budgets and emerging threats disrupt traditional notions of security, this volume offers valuable tools to navigate the political landscape, meet calls for fiscal accountability, and boost the effectiveness of defense investments to help guarantee future peace and stability. A valuable resource for scholars, practitioners, novices, and experts, this book offers a comprehensive overview of Military Cost Benefit Analysis and will appeal to anyone interested or involved in improving national security and will also be of general interest to those responsible for major government programs, projects, or policies. *Technological Innovation and Defence: The Forza NEC Program in the Euro-Atlantic Framework* Alessandro Marrone, Michele Nones, Alessandro R. Ungaro, 2016-04-30 Technological innovation and the military have always been in a state of constant interaction, fostered especially during the post Cold War period. In this context, the present study focuses on the relationship of Italian, American, British, French, and German Armed Forces with Information Communication Technology (ICT). The aim is to analyse, in a Euro Atlantic perspective, the path undertaken by the Italian Army to develop Network Enabled Capabilities (NEC) through the Forza NEC Program. The acronym NEC refers to the interconnection of different elements of the Armed Forces in a single broad network, making them interact in order to achieve a strategic superiority. The book is composed of three chapters which offer, respectively, an analysis of the American case, an overview of recent developments in France, Germany, and the UK, and a discussion of the

situation in Italy The volume which comes four years after the IAI publication The Transformation of Armed Forces The Forza NEC Program aims at analysing state of the art of the evolving relationship between technological innovation and the Armed Forces This evolution is hindered by the fact that efforts to digitize and interconnect land forces and their equipment by using ICT sometimes clash with both operational difficulties and budget constraints Such a clash poses challenges and roadblocks on the way towards NEC undertaken by the Armed Forces of the countries discussed in this book Jane's International Defense Review ,2009 **Ranger Knowledge** Erik Larsen,Jack Murphy,SOFREP,Brandon Webb,2013-08-06 Filled with entertaining anecdotes and an insider s knowledge Ranger Knowledge is a must read for prospective rangers and armchair military enthusiasts everywhere Written by a former 75th Ranger Regiment soldier Marty will take you inside the Ranger Assessment and Selection Program and the Special Forces Assessment and Selection Program to teach prospective Special Operations soldiers the ins and outs of each unit s selection program As someone who also runs a train up program for soldiers going into the military on Ranger and Special Forces contracts Marty is uniquely suited to write a program of instruction which walks would be Special Operations troops through the course and tells them how to get from A to B and achieve their goals in the Special Operations community **Department of Defense Appropriations for Fiscal Year 2011** United States.
