Rational Approaches to Structure, Activity, and Ecotoxicology of Agrochemicals Wilfried Draber, Toshio Fujita, 2024-12-11 This book presents discussions of the most important aspects in the development of agrochemicals. The book covers such broad areas as structure activity and ecotoxicological analyses in comprehensive reviews for general methods and chronicles for individual examples. Topics in structure activity relationships include how to combine submolecular structures of pharmacological interests and modify them according to chemorational models with computer aided procedures such as the traditional Hansch type QSAR, the sequential simplex optimization and molecular modeling. Topics in the ecotoxicology of organophosphorus compounds are discussed in terms of the quantitative structure toxicity relationship (QSTR). Chronicles of molecular orbital methodology in predicting environmental fates of agrochemicals are also provided. This volume will be invaluable for researchers in the agrochemical and pharmaceutical industries.

Soil in Criminal and Environmental Forensics Henk Kars, Lida van den Eijkel, 2016-09-08 This introductory volume to a new series on Soil Forensics gives a kaleidoscopic view of a developing forensic expertise. Forensic practitioners and academic researchers demonstrate by their joint contributions the extent and complexity of soil forensics; their reports exemplify the broad range of sciences and techniques applied in all stages of forensic soil examinations from investigations at crime scenes to providing evidence that can be used in court proceedings. Moreover, the necessity is depicted of co-operation as a condition for any work in soil forensics between scientists of different disciplines but no less between scientists and law enforcers. Soils play a role in environmental crimes and liability as trace evidence in criminal investigations and when searching for and evaluating buried human remains. This book shows soil forensics as practiced in this legal context, emerging and solidifying in many countries all over the world, differing in some respects because of differences in legal systems but ultimately sharing common grounds.
