### ABSTRACT

**Objective:** We adapted the MacArthur Competence Assessment Tool for Treatment (MacCAT-T) to Brazilian Portuguese, pilot testing it on mild and moderate patients with Alzheimer's disease (AD). **Methods:** The cross-cultural process required six steps. Sixty-six patients with AD were assessed for competence to consent to treatment, global cognition, working memory, awareness of disease, functionality, depressive symptoms and dementia severity. **Results:** The items had semantic, idiomatic, conceptual and experiential equivalence. We found no difference between mild and moderate patients with AD on the MacCAT-T domains. The linear regressions showed that reasoning ( $p = 0.000$ ) and functional status ( $p = 0.003$ ) were related to understanding. Understanding ( $p = 0.000$ ) was related to appreciation and reasoning. Awareness of disease ( $p = 0.001$ ) was related to expressing a choice. **Conclusions:** The MacCAT-T adaptation was well-understood and the constructs of the original version were maintained. The results of the pilot study demonstrated an available Brazilian tool focused on decision-making capacity in AD.

### RESUMO

**Objetivo:** Adaptamos o MacArthur Competence Assessment Tool for Treatment (MacCAT-T) para o português brasileiro, realizando estudo piloto em amostra de pessoas com doença de Alzheimer (DA) leve e moderada. **Métodos:** O processo transcultural apresentou seis passos. Posteriormente, avaliamos competência para consentimento do tratamento, cognição global, memória de trabalho, consciência da doença, funcionalidade, sintomas depressivos e gravidade da doença de 66 pessoas com DA. **Resultados:** Os itens apresentaram equivalência semântica, idiomática, conceitual e experiencial. Não encontramos diferenças entre pessoas com DA leve e moderada nos domínios do MacCAT-T. Regressões lineares demonstraram que raciocínio ( $p = 0.000$ ) e funcionalidade ( $p = 0.003$ ) estavam relacionados à compreensão. Compreensão ( $p = 0.000$ ) estava relacionada ao julgamento e raciocínio. Consciência da doença ( $p = 0.001$ ) estava relacionada à expressão da escolha. **Conclusões:** A adaptação da MacCAT-T foi bem compreendida e os construtos da versão original mantidos. Resultados do estudo piloto apontaram disponibilidade de ferramenta brasileira sobre tomada de decisões na DA.

**Palavras-chave:** tomada de decisões; competência mental; avaliação geriátrica; doença de Alzheimer; tradução.

Competence to consent to treatment is the ability to accept a treatment, refuse it or select among alternatives<sup>1</sup>. It relies on four abilities: understanding the information about diagnosis and treatment, appreciating the situation and its consequences, reasoning about treatment options regarding

consequences for everyday life, and expressing a choice<sup>2</sup>. Any degree of interference on each of these four abilities may lead to impaired competence to consent to treatment<sup>3</sup>.

Previous research among patients with AD has shown that decreased cognitive function and the presence of

**Principles of Forensic Mental Health Assessment** Kirk Heilbrun, 2006-04-11

Most of the literature in forensic mental health assessment is organized around the particular legal issue that is the focus of a given assessment tool or research study This book starts with a different assumption There are broad principles of forensic assessment that are applicable across different legal issues If such principles exist they should be derived from and supported by sources of authority in ethics law science and professional practice This is what I seek to do in this book with each of the 29 broad principles of forensic mental health assessment described and analyzed from the perspective of these sources of authority There are a number of individuals who have contributed in various ways to making this a better book It seems best to begin with a general acknowledgment Those interested in forensic mental health assessment particularly my colleagues from the American Psychology Law Society and the American Board of Forensic Psychology have been an extraordinarily helpful and congenial group I have learned a great deal from them over the years and they challenged me to undertake the daunting task of trying to capture the broad views of the field in this book Schizophrenia Bulletin, 2009
