Macroanalysis Digital Methods And Literary History Matthew L Jockers:

Macroanalysis Matthew L. Jockers, 2013-04-15 In this volume Matthew L Jockers introduces readers to large scale literary computing and the revolutionary potential of macroanalysis a new approach to the study of the literary record designed for probing the digital textual world as it exists today in digital form and in large quantities Using computational analysis to retrieve key words phrases and linguistic patterns across thousands of texts in digital libraries researchers can draw conclusions based on quantifiable evidence regarding how literary trends are employed over time across periods within regions or within demographic groups as well as how cultural historical and societal linkages may bind individual authors texts and genres into an aggregate literary culture Moving beyond the limitations of literary interpretation based on the close reading of individual works Jockers describes how this new method of studying large collections of digital material can help us to better understand and contextualize the individual works within those collections Macroanalysis Matthew L.

Burton, Peter Eisenstadt, 2022-05-18 In his Gettysburg Address Abraham Lincoln promised that the nation's sacrifices during the Civil War would lead to a new birth of freedom Lincoln's Unfinished Work analyzes how the United States has attempted to realize or subvert that promise over the past century and a half The volume is not solely about Lincoln or the immediate unfinished work of Reconstruction or the broader unfinished work of America coming to terms with its tangled history of race it investigates all three topics The book opens with an essay by Richard Carwardine who explores Lincoln's distinctive sense of humor Later in the volume Stephen Kantrowitz examines the limitations of Lincoln's Native American policy while James W Loewen discusses how textbooks regularly downplay the sixteenth president's antislavery convictions Lawrence T McDonnell looks at the role of poor Blacks and whites in the disintegration of the Confederacy Eric Foner provides an overview of the Constitution shattering impact of the Civil War amendments Essays by J William Harris and Jerald Podair examine the fate of Lincoln's ideas about land distribution to freedpeople Gregory P Downs focuses on the structural limitations that Republicans faced in their efforts to control racist violence during Reconstruction Adrienne Petty and Mark Schultz argue that Black land ownership in the post Reconstruction South persisted at surprisingly high rates Rhondra Robinson Thomas examines the role of convict labor in the construction of Clemson University the site of the conference from which this book evolved Other essays look at events in the twentieth and twenty first centuries Randall J Stephens analyzes the political conservatism of white evangelical Christianity Peter Eisenstadt uses the career of Jackie Robinson to explore the meanings of integration Joshua Casmir Catalano and Briana Pocratsky examine the debased state of public history on the

airwaves particularly as purveyed by the History Channel Gavin Wright rounds out the volume with a striking political and economic analysis of the collapse of the Democratic Party in the South Taken together the essays in this volume offer a far reaching thought provoking exploration of the unfinished work of democracy particularly as it pertains to the legacy of slavery and white supremacy in America [Close Reading with Computers](#) Martin Paul Eve,2019-06-04 Most contemporary digital studies are interested in distant reading paradigms for large scale literary history This book asks what happens when such telescopic techniques function as a microscope instead The first monograph to bring a range of computational methods to bear on a single novel in a sustained fashion it focuses on the award winning and genre bending Cloud Atlas 2004 Published in two very different versions worldwide without anyone taking much notice David Mitchell s novel is ideal fodder for a textual genetic publishing history reflections on micro tectonic shifts in language by authors who move between genres and explorations of how we imagine people wrote in bygone eras Though Close Reading with Computers focuses on but one novel it has a crucial exemplary function author Martin Paul Eve demonstrates a set of methods and provides open source software tools that others can use in their own literary critical practices In this way the project serves as a bridge between users of digital methods and those engaged in more traditional literary critical endeavors [Unfelt](#) James Noggle,2020-03-15 Unfelt offers a new account of feeling during the British Enlightenment finding that the passions and sentiments long considered as preoccupations of the era depend on a potent insensibility the secret emergence of pronounced emotions that only become apparent with time Surveying a range of affects including primary sensation love and self love greed happiness and patriotic ardor James Noggle explores literary evocations of imperceptibility and unfeeling that pervade and support the period s understanding of sensibility Each of the four sections of Unfelt on philosophy the novel historiography and political economy charts the development of these idioms from early in the long eighteenth century to their culmination in the age of sensibility From Locke to Eliza Haywood Henry Fielding and Frances Burney and from Dudley North to Hume and Adam Smith Noggle s exploration of the insensible dramatically expands the scope of affect in the period s writing and thought Drawing inspiration from contemporary affect theory Noggle charts how feeling and unfeeling flow and feed back into each other identifying emotional dynamics at their most elusive and powerful the potential the incipient the emergent the virtual Open Access edition funded by the National Endowment for the Humanities [The Cambridge Companion to Literature and Science](#) Steven Meyer,2018-05-03 In 1959 C P Snow lamented the presence of what he called the two cultures the apparently unbridgeable chasm of understanding and knowledge between modern literature and modern science In recent decades scholars have worked diligently and often with great ingenuity to interrogate claims like Snow s that represent twentieth and twenty first century literature and science as radically alienated from each other The Cambridge Companion to Literature and Science offers a roadmap to developments that have contributed to the demonstration and emergence of reciprocal connections between the two domains of inquiry Weaving together theory and

empiricism individual chapters explore major figures Shakespeare Bacon Emerson Darwin Henry James William James Whitehead Einstein Empson and McClintock major genres and modes of writing fiction science fiction non fiction prose poetry and dramatic works and major theories and movements pragmatism critical theory science studies cognitive science ecocriticism cultural studies affect theory digital humanities and expanded empiricisms This book will be a key resource for scholars graduate students and undergraduate students alike **Virtual Victorians** Veronica Alfano,Andrew Stauffer,2016-01-18 Exploring how scholars use digital resources to reconstruct the 19th century this volume probes key issues in the intersection of digital humanities and history Part I examines the potential of online research tools for literary scholarship while Part II outlines a prehistory of digital virtuality by exploring specific Victorian cultural forms The Routledge Handbook of Literature and Space Robert Tally Jr.,2017-01-06 The spatial turn in literary studies is transforming the way we think of the field The Routledge Handbook of Literature and Space maps the key areas of spatiality within literary studies offering a comprehensive overview but also pointing towards new and exciting directions of study The interdisciplinary and global approach provides a thorough introduction and includes thirty two essays on topics such as Spatial theory and practice Critical methodologies Work sites Cities and the geography of urban experience Maps territories readings The contributors to this volume demonstrate how a variety of romantic realist modernist and postmodernist narratives represent the changing social spaces of their world and of our own world system today The Grammar of Genres and Styles Dominique Legallois,Thierry Charnois,Meri Larjavaara,2018-04-09 The book provides new findings about the grammar of genres and styles It combines new methods with different kinds of empirical material from social reports to live TV sports commentaries or 16th century newspapers in English French Latin and Spanish The study of non discrete units suggests new ways of seeing the linguistic variation between genres and styles and the ways in which belonging to a genre predetermines linguistic choices Shakespeare's Queer Analytics Don Rodrigues,2022-01-27 What led Shakespeare to write his most cryptic poem The Phoenix and Turtle Could the Phoenix represent Queen Elizabeth on the verge of death as Shakespeare wrote Is the Earl of Essex recently executed for treason the Turtledove lover of the Phoenix Questions such as these dominate scholarship of both Shakespeare s poem and the book in which it first appeared Robert Chester s enigmatic collection of verse Love s Martyr 1601 where Shakespeare s allegory sits next to erotic love lyrics by Ben Jonson George Chapman and John Marston as well as work by the much lesser known Chester Don Rodrigues critiques and revises traditional computational attribution studies by integrating the insights of queer theory to a study of Love s Martyr A book deeply engaged in current debates in computational literary studies it is particularly attuned to questions of non normativity deviation and departures from style when assessing stylistic patterns Gathering insights from decades of computational and traditional analyses it presents most radically data that supports the once outlandish theory that Shakespeare may have had a significant hand in editing works signed by Chester At the same time this book insists on the fundamentally collaborative

nature of production in Love's Martyr Developing a compelling account of how collaborative textual production could work among early modern writers Shakespeare's Queer Analytics is a much needed methodological intervention in computational attribution studies It articulates what Rodrigues describes as queer analytics an approach to literary analysis that joins the non normative close reading of queer theory to the distant attention of computational literary studies highlighting patterns that traditional readings often overlook or ignore **The Cambridge Companion to British Fiction, 1945-2010** David James, 2015-10-06 The Cambridge Companion to British Fiction since 1945 provides insight into the critical traditions shaping the literary landscape of modern Britain Futures of Comparative Literature Ursula Heise, 2017-03-27 Futures of Comparative Literature is a cutting edge report on the state of the discipline in Comparative Literature Offering a broad spectrum of viewpoints from all career stages a variety of different institutions and many language backgrounds this collection is fully global and diverse The book includes previously unpublished interviews with key figures in the discipline as well as a range of different essays short pieces on key topics and longer in depth pieces It is divided into seven sections Futures of Comparative Literature Theories Histories Methods Worlds Areas and Regions Languages Vernaculars Translations Media Beyond the Human and contains over 50 essays on topics such as Queer Reading Human Rights Fundamentalism Untranslatability Big Data Environmental Humanities It also includes current facts and figures from the American Comparative Literature Association as well as a very useful general introduction situating and introducing the material Curated by an expert editorial team this book captures what is at stake in the study of Comparative Literature today

Unthought N. Katherine Hayles, 2017-04-05 N Katherine Hayles is known for breaking new ground at the intersection of the sciences and the humanities In Unthought she once again bridges disciplines by revealing how we think without thinking how we use cognitive processes that are inaccessible to consciousness yet necessary for it to function Marshalling fresh insights from neuroscience cognitive science cognitive biology and literature Hayles expands our understanding of cognition and demonstrates that it involves more than consciousness alone Cognition as Hayles defines it is applicable not only to nonconscious processes in humans but to all forms of life including unicellular organisms and plants Startlingly she also shows that cognition operates in the sophisticated information processing abilities of technical systems when humans and cognitive technical systems interact they form cognitive assemblages as found in urban traffic control drones and the trading algorithms of finance capital for instance and these assemblages are transforming life on earth The result is what Hayles calls a planetary cognitive ecology which includes both human and technical actors and which poses urgent questions to humanists and social scientists alike At a time when scientific and technological advances are bringing far reaching aspects of cognition into the public eye Unthought reflects deeply on our contemporary situation and moves us toward a more sustainable and flourishing environment for all beings Theory in the "Post" Era Christian Moraru, Andrei Terian, Alexandru Matei, 2021-08-26 Shortlisted for the AATSEEL 2022 Award for Best Edited Multi Author Scholarly Volume

AATSEEL is The American Association of Teachers of Slavic and East European Languages Theory in the Post Era brings together the work and perspectives of a group of Romanian theorists who discuss the morphings of contemporary theory in what the editors call the post era Since the Cold War s end and especially in the third millennium theorists have been exploring the aftermath and sometimes just the after of whole paradigms the crisis or passing of anthropocentrism the twilight of an entire ontological and cultural condition as well as the corresponding rise of an antagonist model of an anti meta or neo alternative with examples ranging from posthumanism and post postmodernism to post aesthetics postanalog interpretation or digicriticism post presentism post memory post or neo critique and so forth It is no coincidence the contributors to this volume argue that this post moment is also a time when theory is practiced as a world genre If theory has always been a worlded enterprise a quintessentially communal cross cultural and international project this is truer at present than ever Perhaps more than other humanist constituencies today s theorists work and belong in a theory commons that is transnational if still uneven economically politically and otherwise Theory in the Post Era reports the results of Romanian theory experiments that join efforts made in other places to foster a theory for the post age *Counting Paul* Benjamin L. White, 2025-04-15 Who wrote the Pauline Epistles For nearly 1 700 years the answer seemed fairly straightforward The New Testament canon set the boundary at thirteen or fourteen including Hebrews Pauline Epistles alongside an uncontroversial biographical framework within which to imagine them in Acts In the early nineteenth century the identification of the historical Paul with the canonical Paul was severed when theologian Ferdinand Christian Baur of the University of Tübingen laid the groundwork for the fundamental historiographical moves that still orient Pauline Studies as a critical discipline by both delimiting the number of authentic Pauline Epistles and highlighting the tendentious character of Acts portrayal of Paul Given the highly uncertain and subjective nature of so much of the argumentation over the authenticity of the Pauline Epistles as it developed in the nineteenth century the analysis of authorial style took on increasing weight as a way out of so many special decisions The linguistic features of texts were counted averaged and compared In measuring one text against another the Pauline stylome emerged as the incontrovertible standard for uncovering canonical forgeries in the Apostle s name Tracing the long history of the computational approach to the Pauline authorship problem *Counting Paul* exposes the ideological foundations and questionable science of much of the work and argues that Pauline biography ought not be written from fewer sources than what the New Testament has given us but rather more It advocates for a more expansive vision of what might count as Pauline by reorienting our focus away from internal criteria like appeals to style and toward external criteria like the reception of Paul in the generations after his death *Building Personality-Driven Language Models* Karol Przysalski, Jan K. Argasiński, Natalia Lipp, Dawid Pacholczyk, 2025-03-22 This book provides an innovative exploration into the realm of artificial intelligence AI by developing personalities for large language models LLMs using psychological principles Aimed at making AI interactions feel more human like the book guides you through the process of applying psychological

assessments to AIs enabling them to exhibit traits such as extraversion openness and emotional stability Perfect for developers researchers and entrepreneurs this work merges psychology philosophy business and cutting edge computing to enhance how AIs understand and engage with humans across various industries like gaming and healthcare The book not only unpacks the theoretical aspects of these advancements but also equips you with practical coding exercises and Python code examples helping you create AI systems that are both innovative and relatable Whether you re looking to deepen your understanding of AI personalities or integrate them into commercial applications this book offers the tools and insights needed to pioneer this exciting frontier

Uncharted Erez Aiden, Jean-Baptiste Michel, 2014-12-02 One of the most exciting developments from the world of ideas in decades presented with panache by two frighteningly brilliant endearingly unpretentious and endlessly creative young scientists Steven Pinker author of *The Better Angels of Our Nature* Our society has gone from writing snippets of information by hand to generating a vast flood of 1s and 0s that record almost every aspect of our lives who we know what we do where we go what we buy and who we love This year the world will generate 5 zettabytes of data That s a five with twenty one zeros after it Big data is revolutionizing the sciences transforming the humanities and renegotiating the boundary between industry and the ivory tower What is emerging is a new way of understanding our world our past and possibly our future In *Uncharted* Erez Aiden and Jean Baptiste Michel tell the story of how they tapped into this sea of information to create a new kind of telescope a tool that instead of uncovering the motions of distant stars charts trends in human history across the centuries By teaming up with Google they were able to analyze the text of millions of books The result was a new field of research and a scientific tool the Google Ngram Viewer so groundbreaking that its public release made the front page of *The New York Times* *The Wall Street Journal* and *The Boston Globe* and so addictive that *Mother Jones* called it the greatest timewaster in the history of the internet Using this scope Aiden and Michel and millions of users worldwide are beginning to see answers to a dizzying array of once intractable questions How quickly does technology spread Do we talk less about God today When did people start having sex instead of making love At what age do the most famous people become famous How fast does grammar change Which writers had their works most effectively censored by the Nazis When did the spelling donut start replacing the venerable doughnut Can we predict the future of human history Who is better known Bill Clinton or the rutabaga All over the world new scopes are popping up using big data to quantify the human experience at the grandest scales possible Yet dangers lurk in this ocean of 1s and 0s threats to privacy and the specter of ubiquitous government surveillance Aiden and Michel take readers on a voyage through these uncharted waters
