Department of Public Instruction,1900 *StarBriefs* 2001 ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions *Embedded Robotics* Thomas Bräunl,2008-09-20 The EyeBot controller and mobile robots have evolved over more than a decade This book gives an in depth introduction to embedded systems and autonomous mobile robots using the EyeBot controller EyeCon and the EyeBot mobile robot family as application examples This book combines teaching and research material and can be used for courses in Embedded Systems as well as in Robotics and Automation We see labs as an essential teaching and learning method in this area and encourage everybody to reprogram and rediscover the algorithms and systems presented in this book Although we like simulations for many applications and treat them in quite some depth in several places in this book we do believe that students should also be exposed to real hardware in both areas embedded systems and robotics This will deepen the understanding of the subject area and of course create a lot more fun especially when experimenting with small mobile robots The original goal for the EyeBot project has been to interface an embedded system to a digital camera sensor EyeCam process its images locally in real time for robot navigation and display results on a graphics LCD All of this started at a time before digital cameras came to the market in fact the EyeBot controller was one of the first embedded vision systems

Secret Science María M. Portuondo, 2013-04-18 The discovery of the New World raised many questions for early modern scientists What did these lands contain Where did they lie in relation to Europe Who lived there and what were their inhabitants like Imperial expansion necessitated changes in the way scientific knowledge was gathered and Spanish cosmographers in particular were charged with turning their observations of the New World into a body of knowledge that could be used for governing the largest empire the world had ever known As María M Portuondo here shows this cosmographic knowledge had considerable strategic defensive and monetary value that royal scientists were charged with safeguarding from foreign and internal enemies Cosmography was thus a secret science but despite the limited dissemination of this body of knowledge royal cosmographers applied alternative epistemologies and new methodologies that changed the discipline and in the process how Europeans understood the natural world
