When people think of speed reading they often put it down to just speed reading. However, this is only a small part of the overall process. The key to truly effective speed reading is to first be able to determine what you really want to read or what you need and then quickly read through carefully selected material. Take a moment to mentally review all the information that comes your way on a typical day at home at work in the newspapers at the local coffee shop. How much of it do you ignore because it seems like too much to take on instead you leave it to pile up and pile up until you're so far behind that you need days or weeks to catch up. If you had a simple process that allowed you to quickly and easily identify the information you needed and eliminate the ones you didn't you wouldn't have that body of knowledge and you'd have more time to live your life instead of worrying about what you might miss out on because you feel overburdened. The purpose of this book is to give you the tools you need to stay current. With a one week work program and study exercises it allows you to work by solving the exercises by having fun in an easy and understandable way. At first read the information provided for 7 days and then do the exercises as directed.
