will help those interested in not only developing a comprehensive collection in these subject areas but get an understanding of what materials are being collected and housed in specific map libraries geospatial centers and their related websites Of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level This volume combines the traditional and historical collections of cartography with the modern applications of GIS based maps and geospatial datasets ICE Manual of Geotechnical Engineering Volume 1 Hilary Skinner,D G Toll,Kelvin Higgins,Mike Brown,John Burland,2023-11-17 ICE Manual of Geotechnical Engineering Second edition brings together an exceptional breadth of material to provide a definitive reference on geotechnical engineering solutions Written and edited by leading specialists each chapter provides contemporary guidance and best practice knowledge for civil and structural engineers in the field *The Extreme Searcher's Internet Handbook* Randolph Hock,2007 A guide to effectively searching the Internet covers such topics as search engines directories newsgroups image resources and reference resources *Handbook of Engineering Hydrology* Saeid Eslamian,2014-03-21 While most books examine only the classical aspects of hydrology this three volume set covers multiple aspects of hydrology It examines new approaches addresses growing concerns about hydrological and ecological connectivity and considers the worldwide impact of climate change It also provides updated material on hydrological science and engine **The Hasselblad Manual** Ernst Wildi,2012-09-10 Discover the great advantages and benefits of working in the medium film format or with the large digital sensor units in Hasselblad digital cameras and digital backs Presented in an easily accessible format this book shows the working and manipulation of the various cameras Detailed illustrations dissect the equipment and provide insight into the ways in which these superb cameras and lenses are best utilized to create professional quality images This edition of the Manual will bring you up to date with the latest features available within the popular Hasselblad camera systems emphasizing that camera and lens are the most important tools for creating exciting images whether you work digitally or with film The complete Hasselblad camera system is discussed by renowned author and Hasselblad insider Ernst Wildi who provides a solid foundation of both traditional photography and digital capture techniques Inside you ll also find inspiring photographs from well known photographers illustrating a variety of photographic techniques using a Hasselblad camera *A User's Guide to the Meade LXD55 and LXD75 Telescopes* Martin Peston,2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade s Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55 com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use

them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXDM55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXDM telescope

The Oxford Handbook of the Archaeology of the Contemporary World Paul Graves-Brown, Rodney Harrison, Angela Piccini, 2013-10-17 It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social cultural and historical circumstances archaeology is always carried out in the present More recently however many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself how we might undertake archaeologies of as well as in the present This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past In addition to detailed archaeological case studies it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world including anthropology psychology philosophy historical geography science and technology studies communications and media ethnoarchaeology forensic archaeology sociology film performance and contemporary art This volume seeks to explore the boundaries of an emerging sub discipline to develop a tool kit of concepts and methods which are applicable to this new field and to suggest important future trajectories for research It makes a significant intervention by drawing together scholars working on a broad range of themes approaches methods and case studies from diverse contexts in different parts of the world which have not previously been considered collectively
