ROCHESTER CARBURETOR

2 BARREL •

Type M2MC-M2ME-E2ME

Carefully read the text in the following paragraphs to become familiar with the contents of this worksheet before performing carburetor overhaul.

1. The steps of disassembly are shown on the Parts List in a descending order sequence. Parts are illustrated in the exploded view and identified numerically. To reassemble, proceed from the bottom of the list and work toward the top.

NOTE: For some carburetors, specification data may not be available. Since the Float Level Setting is an essential adjustment, it is recommended that Float Level Setting be measured and recorded before disassembling Float Assy.

2. Parts List shown DOES NOT reflect the contents of the kit.

3. This sheet will service most carburetors of this type. The illustration

#### TYPICAL ILLUSTRATION

included view is typical and although minor variations occur among the different parts numbers, procedures will be essentially as described and the differences will be easily recognized.

4. Kit may contain extra parts, intended for other carburetors within this group. Substitute identical replacement parts for original worn parts found in carburetor.

5. Cover opening on intake manifold after carburetor is removed. Place carburetor parts in cleaning solvent. Remove all loose particles using a stiff bristle brush. Do not use any abrasives to clean carburetor parts. Also, do not insert wires to clean out passages and jets. Brushes made of rubber, leather, nylon or plastic are not to be used in carburetor cleaning.

6. Remove parts from solvent and clean out all passages and jets with air gun.
