Mathematical Analysis Of Viscoelastic Flows Classics In Applied Mathematics:

Mathematical Analysis of Viscoelastic Flows Michael Renardy, 2000-01-01 This monograph is based on a series of lectures presented at the 1999 NSF CBMS Regional Research Conference on Mathematical Analysis of Viscoelastic Flows It begins with an introduction to phenomena observed in viscoelastic flows the formulation of mathematical equations to model such flows and the behavior of various models in simple flows It also discusses the asymptotics of the high Weissenberg limit the analysis of flow instabilities the equations of viscoelastic flows jets and filaments and their breakup as well as several other topics **Mathematical Reviews** ,2007 Creep and Relaxation of Nonlinear Viscoelastic Materials William Nichols

Findley, James S. Lai, Kasif Onaran, 1989-01-01 Pioneering book presents basic theory experimental methods and results and solution of boundary value problems Topics include creep stress and strain deformation analyses multiple integral representation of nonlinear creep and relaxation and much more Appendices Bibliography *Defence Science Journal* ,1982

Nonlinear Inclusions and Hemivariational Inequalities Stanisław Migórski, Anna Ochal, Mircea Sofonea, 2012-09-18 This book introduces the reader the theory of nonlinear inclusions and hemivariational inequalities with emphasis on the study of contact mechanics The work covers both abstract results in the area of nonlinear inclusions hemivariational inequalities as well as the study of specific contact problems including their modelling and their variational analysis Provided results are based on original research on the existence uniqueness regularity and behavior of the solution for various classes of nonlinear stationary and evolutionary inclusions In carrying out the variational analysis of various contact models one systematically uses results of hemivariational inequalities and in this way illustrates the applications of nonlinear analysis in contact mechanics New mathematical methods are introduced and applied in the study of nonlinear problems which describe the contact between a deformable body and a foundation Contact problems arise in industry engineering and geophysics Their variational analysis presented in this book lies the background for their numerical analysis This volume will interest mathematicians applied mathematicians engineers and scientists as well as advanced graduate students **Applied**
