Mathematics Paper 1 June 2014:

A Level Further Mathematics for OCR A Mechanics Student Book (AS/A Level) Jess Barker, Nathan Barker, Michele Conway, Janet Such, 2017-12-14 New 2017 Cambridge A Level Maths and Further Maths resources to help students with learning and revision Written for the OCR AS A Level Further Mathematics specification for first teaching from 2017 this print Student Book covers the Mechanics content for AS and A Level It balances accessible exposition with a wealth of worked examples exercises and opportunities to test and consolidate learning providing a clear and structured pathway for progressing through the course It is underpinned by a strong pedagogical approach with an emphasis on skills development and the synoptic nature of the course Includes answers to aid independent study **Cambridge International AS and A Level Mathematics: Pure Mathematics 2 & 3 Coursebook** Sue Pemberton, Julianne Hughes, 2018-03-15 This series has been developed specifically for the Cambridge International AS A Level Mathematics 9709 syllabus to be examined from 2020 Cambridge International AS A Level Mathematics Pure Mathematics 2 3 matches the corresponding units of the syllabus It clearly indicates materials required for P3 study only and contains materials on topics such as logarithmic and exponential functions trigonometry differentiation integration numerical solutions of equations vectors and complex numbers This coursebook contains a variety of features including recap sections for students to check their prior knowledge detailed explanations and worked examples end of chapter and cross topic review exercises and Explore tasks to encourage deeper thinking around mathematical concepts Answers to coursebook questions are at the back of the book **Literacy as Numbers Teacher's Book** Mary Hamilton, Bryan Maddox, Camilla Addey, 2015-03-05 A collaborative series with the University of Cambridge Faculty of Education highlighting leading edge research across Teacher Education International Education Reform and Language Education UGC NET History Solved Previous Year Papers | 25+ Papers | 2012 Onwards | On Page Solutions Mocktime Publication, UGC NET History Solved Previous Year Papers 25 Papers 2012 Onwards On Page Solutions **Executive Function and Education** Mariëtte Huizinga, Dieter Baeyens, Jacob A. Burack, 2018-09-21 Executive function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment The development of executive function relies on the maturation of associated brain regions as well as on stimulation in the child's social contexts especially the home and school Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting planning and organizing in academic success Accordingly in initiating this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators The contributors to this volume who hail from several different countries in Europe and North

America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success

Mathematical Models for the Design of Electrical Machines Frédéric Dubas,Kamel Boughrara,2021-03-15 This book is a comprehensive set of articles reflecting the latest advances and developments in mathematical modeling and the design of electrical machines for different applications The main models discussed are based on the i Maxwell Fourier method i e the formal resolution of Maxwell s equations by using the separation of variables method and the Fourier s series in 2 D or 3 D with a quasi Cartesian or polar coordinate system ii electrical thermal and magnetic equivalent circuit iii hybrid model In these different papers the numerical method and the experimental tests have been used as comparisons or validations

Unconventional Oil and Gas Resources Usman Ahmed,D. Nathan Meehan,2016-04-05 As the shale revolution continues in North America unconventional resource markets are emerging on every continent In the next eight to ten years more than 100 000 wells and one to two million hydraulic fracturing stages could be executed resulting in close to one trillion dollars in industry spending This growth has prompted professionals ex

CMBEBIH 2017 Almir Badnjevic,2017-03-14 This volume presents the proceedings of the International Conference on Medical and Biological Engineering held from 16 to 18 March 2017 in Sarajevo Bosnia and Herzegovina Focusing on the theme of Pursuing innovation Shaping the future it highlights the latest advancements in Biomedical Engineering and also presents the latest findings innovative solutions and emerging challenges in this field Topics include Biomedical Signal Processing Biomedical Imaging and Image Processing Biosensors and Bioinstrumentation Bio Micro Nano Technologies Biomaterials Biomechanics Robotics and Minimally Invasive Surgery Cardiovascular Respiratory and Endocrine Systems Engineering Neural and Rehabilitation Engineering Molecular Cellular and Tissue Engineering Bioinformatics and Computational Biology Clinical Engineering and Health Technology Assessment Health Informatics E Health and Telemedicine Biomedical Engineering Education Pharmaceutical Engineering

Cambridge O Level Mathematics Coursebook Audrey Simpson,2016-03-17 Cambridge O Level Mathematics is a resource to accompany the revised 4024 syllabus This coursebook provides a complete course for developing and practising the skills required for the O Level Mathematics qualification The content has been written to offer a range of tasks that support all aspects of the Cambridge O Level Mathematics syllabus 4024 giving students the confidence to use the mathematical techniques required to solve the range of maths problems required With detailed explanations of concepts worked examples and exercises this coursebook can be used as a classroom text and for self study

Computational Intelligence in Photovoltaic Systems Emanuele Ogliari,Sonia Leva,2019-09-05 Photovoltaics among the different renewable energy sources RES has become more popular In recent years however many research topics have arisen as a result of the problems that are constantly faced in smart grid and microgrid operations such as forecasting of the output of power plant production storage sizing modeling and control

optimization of photovoltaic systems Computational intelligence algorithms evolutionary optimization neural networks fuzzy logic etc have become more and more popular as alternative approaches to conventional techniques for solving problems such as modeling identification optimization availability prediction forecasting sizing and control of stand alone grid connected and hybrid photovoltaic systems This Special Issue will investigate the most recent developments and research on solar power systems This Special Issue Computational Intelligence in Photovoltaic Systems is highly recommended for readers with an interest in the various aspects of solar power systems and includes 10 original research papers covering relevant progress in the following non exhaustive fields Forecasting techniques deterministic stochastic etc DC AC converter control and maximum power point tracking techniques Sizing and optimization of photovoltaic system components Photovoltaics modeling and parameter estimation Maintenance and reliability modeling Decision processes for grid operators

Landscape Architecture and Digital Technologies Jillian Walliss, Heike Rahmann, 2016-02-12 Landscape Architecture and Digital Technologies explores how digital technologies are reshaping design and making in landscape architecture While the potentials of digital technologies are well documented within landscape planning and visualisation their application within design practice is far less understood This book highlights the role of the digital model in encouraging a new design logic that moves from the privileging of the visual to a focus on processes of formation bridging the interface of the conceptual and material the virtual and the physical Drawing on interviews and projects from a range of international designers including Sn hetta Arup Gustafson Porter ASPECT Studios Grant Associates Catherine Mosbach Philippe Rahm PARKKIM LAAC and PEG office of landscape architecture among others the authors explore the influence of parametric modelling scripting real time data simulation prototyping fabrication and Building Information Modelling on the design and construction of contemporary landscapes This engagement with practice is expanded through critical reflection from academics involved in landscape architecture programs around the world that are reshaping their research and pedagogy to reflect an expanded digital realm Crossing critical theory technology and contemporary design the book constructs a picture of an emerging twenty first century practice of landscape architecture practice premised on complexity and performance It also highlights the disciplinary demands and challenges in engaging with a rapidly evolving digital context within practice and education The book is of immense value to professionals and researchers and is a key publication for digital landscape courses at all levels

Fuzzy Logic Augmentation of Neural and Optimization Algorithms: Theoretical Aspects and Real Applications Oscar Castillo, Patricia Melin, Janusz Kacprzyk, 2018-01-10 This book comprises papers on diverse aspects of fuzzy logic neural networks and nature inspired optimization meta heuristics and their application in various areas such as intelligent control and robotics pattern recognition medical diagnosis time series prediction and optimization of complex problems The book is organized into seven main parts each with a collection of papers on a similar subject The first part presents new concepts and algorithms based on type 2 fuzzy logic for dynamic parameter adaptation in meta heuristics The

second part discusses network theory and applications and includes papers describing applications of neural networks in diverse areas such as time series prediction and pattern recognition The third part addresses the theory and practice of meta heuristics in different areas of application while the fourth part describes diverse fuzzy logic applications in the control area which can be considered as intelligent controllers The next two parts explore applications in areas such as time series prediction and pattern recognition and new optimization and evolutionary algorithms and their applications respectively Lastly the seventh part addresses the design and application of different hybrid intelligent systems

Distributed Denial of Service Attacks Rajeev Singh, Mangey Ram, 2021-07-19 This book presents new concepts against Distributed Denial of Service DDoS attacks It follows a systematic approach providing cryptographic and mathematical solutions that include aspects of encryption decryption hashing techniques digital signatures authentication probability statistical improvements to machine learning and soft computing as well as latest trends like blockchains to mitigate DDoS attacks

Full-Spectrum Thinking Bob Johansen, 2020-03-20 Leading futurist Bob Johansen shows how a new way of thinking enhanced by new technologies will help leaders break free of limiting labels and see new gradients of possibility in a chaotic world The future will get even more perplexing over the next decade and we are not ready The dilemma is that we are restricted by rigid categorical thinking that freezes people and organizations in neatly defined boxes that often are inaccurate or obsolete Categories lead us toward certainty but away from clarity and categorical thinking moves us away from understanding the bigger picture Sticking with this old way of thinking and seeing isn't just foolish it's dangerous Full spectrum thinking is the ability to seek patterns and clarity outside across beyond or maybe even without any boxes or categories while resisting false certainty and simplistic binary choices It reveals our commonalities that are hidden in plain view Bob Johansen lays out the core concepts of full spectrum thinking and reveals the role that digital media including gameful engagement big data analytics visualization blockchain and machine learning will play in facilitating and enhancing it He offers examples of broader spectrums and new applications in a wide range of areas that will become possible first then mandatory This visionary book provides powerful ways to make sense of new opportunities and see the world as it really is

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as

alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Technical System Maintenance Sylwia Werbińska-Wojciechowska, 2019-01-09 This book provides a detailed introduction to maintenance policies and the current and future research in these fields highlighting mathematical formulation and optimization techniques It comprehensively describes the state of art in maintenance modelling and optimization for single and multi unit technical systems and also investigates the problem of the estimation process of delay time parameters and how this affects system performance The book discusses delay time modelling for multi unit technical systems in various reliability structures examining the optimum maintenance policies both analytically and practically focusing on a delay time modelling technique that has been employed by researchers in the field of maintenance engineering to model inspection intervals It organizes the existing work into several fields based mainly on the classification of single and multi unit models and assesses the applicability of the reviewed works and maintenance models Lastly it identifies potential future research directions and suggests research agendas This book is a valuable resource for maintenance engineers reliability specialists and researchers as it demonstrates the latest developments in maintenance inspection and delay time based maintenance modelling issues It is also of interest to graduate and senior undergraduate students as it introduces current theory and practice in maintenance modelling issues especially in the field of delay time modelling

Dimensions of Uncertainty in Communication Engineering Ezio Biglieri, 2022-07-06 Dimensions of Uncertainty in Communication Engineering is a comprehensive and self contained introduction to the problems of nonaleatory uncertainty and the mathematical tools needed to solve them The book gathers together tools derived from statistics information theory moment theory interval analysis and probability boxes dependence bounds nonadditive measures and Dempster Shafer theory While the book is mainly devoted to communication engineering the techniques described are also of interest to other application areas and commonalities to these are often alluded to through a number of references to books and research papers This is an ideal supplementary book for courses in wireless communications providing techniques for addressing epistemic uncertainty as well as an important resource for researchers and industry engineers Students and researchers in other fields such as statistics financial mathematics and transport theory will gain an overview and understanding on these methods relevant to their field Uniquely brings together a variety of tools derived from

statistics information theory moment theory interval analysis and probability boxes dependence bounds nonadditive measures and Dempster Shafer theory Focuses on the essentials of various wide ranging methods with references to journal articles where more detail can be found if required Includes MIMO related results throughout *Student-generated Digital Media in Science Education* Garry Hoban, Wendy Nielsen, Alyce Shepherd, 2015-07-03 This timely and innovative book encourages us to flip the classroom and empower our students to become content creators Through creating digital media they will not only improve their communication skills but also gain a deeper understanding of core scientific concepts This book will inspire science academics and science teacher educators to design learning experiences that allow students to take control of their own learning to generate media that will stimulate them to engage with learn about and become effective communicators of science Professors Susan Jones and Brian F Yates Australian Learning and Teaching Council Discipline Scholars for Science Represents a giant leap forward in our understanding of how digital media can enrich not only the learning of science but also the professional learning of science teachers Professor Tom Russell Queen s University Ontario Canada This excellent edited collection brings together authors at the forefront of promoting media creation in science by children and young people New media of all kinds are the most culturally significant forms in the lives of learners and the work in this book shows how they can move between home and school and provide new contexts for learning as well as an understanding of key concepts Dr John Potter London Knowledge Lab Dept of Culture Communication and Media University College London UK Student generated Digital Media in Science Education supports secondary school teachers lecturers in universities and teacher educators in improving engagement and understanding in science by helping students unleash their enthusiasm for creating media within the science classroom Written by pioneers who have been developing their ideas in students media making over the last 10 years it provides a theoretical background case studies and a wide range of assignments and assessment tasks designed to address the vital issue of disengagement amongst science learners It showcases opportunities for learners to use the tools that they already own to design make and explain science content with five digital media forms that build upon each other podcasts digital stories slowmotion video and blended media Each chapter provides advice for implementation and evidence of engagement as learners use digital tools to learn science content develop communication skills and create science explanations A student team s music video animation of the Krebs cycle a podcast on chemical reactions presented as commentary on a boxing match a wiki page on an entry in the periodic table of elements and an animation on vitamin D deficiency among hijab wearing Muslim women are just some of the imaginative assignments demonstrated Student generated Digital Media in Science Education illuminates innovative ways to engage science learners with science content using contemporary digital technologies It is a must read text for all educators keen to effectively convey the excitement and wonder of science in the 21st century
