Studies in Leadership and Culture is the seventh in a series on research and theory dedicated to advancing our
understanding of schools through empirical study and theoretical analysis This book is organized around two broad concepts
leadership and culture which have important implications for improving schools The book begins with an analysis of the
saliency of trust in the culture of schools In the first chapter Patrick Forsyth s review of the consequences of school trust sets
the tone for seeking and developing school cultures that enhance high academic performance of students The investigation of
school trust is traced over several decades at four research universities as scholars at each institution conceptualized refined
