Inflammatory Bowel Disease Nursing Manual Andreas Sturm, Lydia White, 2025-07-25 Building on the success of the first edition this new and expanded edition explores the complexities of inflammatory bowel disease IBD with an expanded focus on the viewpoint and experience of those living with IBD and the interface of clinical care and research opportunities With cases of ulcerative colitis UC and Crohn s disease CD rising worldwide the need for informed patient centered care has never been greater Despite their profound impact on daily life and healthcare systems these conditions remain challenging to diagnose and treat IBD nurses are increasingly recognised as key clinicians within the multidisciplinary team caring for people with IBD Through experience and specialist knowledge IBD nurses provide timely support advice and treatment for people living with this unpredictable condition IBD nurses are also well placed to liaise with the wider team developing patient centred services which best fit their local health framework This updated manual brings together international expertise and practical insights to support nurses and clinicians in optimizing IBD management Whether you re a seasoned professional or looking to expand your expertise this resource equips you with the knowledge and confidence to enhance care and improve outcomes for people living with IBD wherever in the world you work

Therapeutic Advances in

Inflammatory Bowel Disease: Current Therapies and Future Directions Giulia Roda, Marjorie Argollo, 2023-10-23

Inflammatory bowel diseases IBD are chronic and progressive diseases Long term complications are demolition surgery and colon rectal cancer CRC A treat to target approach aims to modify the natural course of these diseases Targets are pre defined therapeutic goals demonstrated to prevent end organ disfunction and disability in the long term period According to the Selecting Therapeutic Targets in Inflammatory Bowel Disease STRIDE indications mucosal healing MH and clinical remission are the main targets in IBDs Recently the concept of remission and evidence on new targets included histological remission and transmural healing as future new targets It remains controversial whether achieving these targets is associated with significantly better long term disease outcomes In this Research Topic we aim to systematically review current evidence and future perspectives on therapeutic targets in IBD including mucosal and transmural healing
