Information, Communication, and Space Technology Mohammad Razani,2017-12-19 Many books have covered the rapidly evolving fields of information and communication technology ICT and space technology separately However no single book has ever focused on how the integration of these two areas is creating a stronger platform for various scientific advancements including some research work that cannot be performed on Earth To fill the void Information Communication and Space Technology provides a novel illustration of that connection Dividing content into sections that cover ICT existing and future space technologies and satellites the author demonstrates the individual and combined power of each of these parts of the overall system He explores how the combination of concepts from each of these interrelated fields is creating massive potential for broader advances in areas such as robotics communications navigation agriculture health care and nanotechnology The book introduces particular potential innovations including rocket less spacecraft launches and development of a global system to balance energy distribution by using satellites that would collect solar energy and transmit it via microwave beams to different locations around the world Equally useful to students and professionals this work is a culmination of the domestic and international experience that the author has acquired throughout more than three decades as an instructor and researcher Emphasizing the strong need to incorporate ICT and space technology into the general university curriculum the book starts with basic explanations of key concepts and theories building toward more concrete application oriented examples that reveal the importance and impact of new technologies This includes coverage of how satellites transfer voice video and other data across continents as well as techniques used to obtain very high resolution images from space for use in agricultural and environmental sciences This timely work employs a logical practically structured approach that will help readers to better understand existing and emerging ICT and space technologies including the most recent developments and achievements in the field

Information Communication Technologies: Concepts, Methodologies, Tools and Applications Craig Van Slyke,Mehdi Khosrow-Pour,2008-04 [Information Communication Technology and Poverty Alleviation](#) Jack J. Barry,2018-07-24 Despite global economic disparities recent years have seen rapid technological changes in developing countries as it is now common to see people across all levels of society with smartphones in their hands and computers in their homes However does access to Information Communication Technologies ICTs actually improve the day to day lives of low income citizens This book argues that access to the internet can help alleviate poverty improve development

outcomes and is now vital for realizing many human rights This book posits that good governance is essential to the realization of inclusive pro poor development goals and puts forward policy recommendations that aim to mitigate the complex digital divide by employing governance as the primary actor In making his argument the author provides a quantitative analysis of developing countries conjoined with a targeted in depth study of Mexico This mixed method approach provides an intriguing case for how improvements in the quality of governance impacts both ICT penetration and poverty alleviation Overall the book challenges the neoliberal deterministic perspective that the open market will solve technology diffusion and argues instead that good governance is the lynchpin that creates conducive conditions for ICTs to make an impact on poverty alleviation In fact the digital divide should not be considered binary rather it is a multifaceted problem where income education and language all need to be considered to address it effectively This book will be useful for researchers students of development communication technologies and comparative politics as well as for development practitioners and policy makers with an interest in how modern technology is impacting the poor in the developing world
