Silander, Brigitte Pircher**

Innovation Employment And Growth Policy Issues In The Eu And The Us:

Innovation, Employment and Growth Policy Issues in the EU and the US Paul J.J. Welfens, John T.

Addison, 2009-07-21 Economic development has cyclical dynamics and long term dynamics the latter are typically related to demographical changes innovation and long term institutional changes in open economies Financial markets that means mainly capital markets and labor markets are affected in OECD countries both by innovations and institutional reforms As regards demographics ageing is a typical challenge on both sides of the Atlantic and pension reforms in industrialized countries have placed greater emphasis on capital markets than in previous decades Innovation dynamics certainly are also quite important for all high wage OECD countries The Lisbon Agenda has put particular emphasis on more growth higher innovation dynamics and better exploitation of the advantages of a digitally networked society Traditionally the US has a lead in global innovations and the US policy certainly has contributed to the American technological leadership There still is a per capita income gap in favor of the US and the US labor market situation also looks relatively favorable but in the ve years since 2001 employment growth in the euro area was higher than that of the US The euro area is however a rather heterogeneous set of countries which differ in terms of institutions attitudes and reform progress and everywhere governments are aware that there have to be reforms not least in the context of globalization which bring a more complex and dynamic spatial structure of value added

Financial Market Integration and Growth Paul J.J. Welfens, Cillian Ryan, 2011-02-14 Financial capital whether mediated through the financial market or Foreign Direct Investment has been a key factor in European economic growth This book examines the interaction between European and global financial integration and analyses the dynamics of the monetary sector and the real economy in Europe The key analytical focus is on the theoretical and empirical dynamics of financial markets in Europe however it also provides regional case studies of key institutional developments and lessons from foreign direct investment There is a broad range of findings for Central Eastern and Western Europe as well as EU Partner Countries Crucially the analysis includes new approaches and options for solving the transatlantic banking crisis and suggests policy innovations for a world with unstable financial markets

Proceedings of the International Conference Theory and Applications in the Knowledge Economy Eduardo Tomé, 2016-07-08

Foreword TAKE 2016 is a dream that came true In about six months a group of friends and colleagues put together in an upcoming and very dynamic university a conference with 9 streams 3 keynotes and 3 special sessions 60 papers presented 6 posters and around 80 participants from 20 countries This is awesome I would like to deeply thank Aveiro University the GOVCOPP research centre the conference committee the keynote speakers the special session convenors the stream leaders the reviewers the authors and the administrative people for all their work and support I want to have two special words one for Blazenka Knezevic without whom the website would not have been possible the other for Gaby Neumann for work in these Proceedings Scientifically TAKE seems to be as important and new and far reaching We don't have shortage of models

regarding the knowledge economy but we decisively lack to explore the relation between theory and practice TAKE is a step in exploring that difference We know that Exact sciences find the best answers and social sciences give the best questions J C Spender and we also know that Knowledge Management is more preached by scholars than done by practitioners Aino Kianto We assume the first idea and try to overcome the second Hopefully TAKE 2016 will be a great success Thank you for everything

Management and Conservation of Mediterranean Environments Castanho, Rui Alexandre, Martín Gallardo, José, 2021-01-29 To achieve desired territorial sustainability it is necessary to fully understand all three spheres of sustainable development from different perspectives The territories ecosystems and environments involved in Mediterranean landscapes environments are not an exception In this regard specific fields within this main subject should be studied in more detail such as management and conservation strategies methods for environmental planning environmental rights and legislation provided ecosystems services natural based solutions among many other areas Management and Conservation of Mediterranean Environments is a powerful scientific contribution to the issue of territorial sustainability and dynamics challenges and opportunities ongoing in Mediterranean landscapes Chapters cover research in the fields of territorial governance and management ecosystems economic growth sustainability environmental pollution and more This book is a valuable reference tool for academicians researchers technicians decision makers policymakers students and any readers interested in sustainable development and the management of Mediterranean environments

Towards Glocal Social Work in the Era of Compressed Modernity Timo Harrikari, Pirkko-Liisa Rauhala, 2018-10-03 This book addresses the change of social work in the frame of modernisation Through Mary Richmond s classical idea of social work the book seeks to set current societal trends affecting social work into the context of a long historical line opening spaces for the new debates within the social work discipline as well as proposing and taking some new directions in the current era of compressed modernity From the viewpoint of social work there still is an individual in a situation however the situation has profoundly changed during the past hundred years Divided into seven chapters topics covered include firstly the rethinking of Richmond s original idea revisiting the modernisation theories and social transformations as well as discussion on the social work theories and mandates according to the chosen classics Secondly the book continues with sketching the pillars of compressed modernity and rethinking the global and local relations During the era of glocalisation polycentrism digitalisation and hybridisation the previous conceptualisations of social theory have to be reconsidered Finally a proposal for glocal social work vision is represented by setting questions which should be taken under scrutiny Academics researchers practising social workers and students of social work as well as of social policy administration social law and other social sciences will find this book to be an essential text for understanding the current societal changes trends and tendencies The book provides a lot of information for policymakers and citizens interested in the background knowledge for the contemporary societal situation

A European Strategy for Jobs and Growth Great Britain: Parliament: House of Lords: European Union

Committee,2006-03-16 This report by the European Union Committee examines the progress of the European Union in initiating a strategy for jobs and growth across the Community as a whole The background to this report stems from the Spring European Council meeting in 2000 in Lisbon and the launch of an economic reform agenda The Committee observes that since the Lisbon Agenda little progress has been made and the performance of many of the larger European economies has been poor The Committee has noted that certain worrying signs of protectionist behaviour have developed especially regarding barriers of cross border mergers The EU has recognized this weak performance and the Agenda was relaunched in 2005 with a greater focus on the key economic priorities of more growth and jobs Also all Member States are now required to produce an annual National Action Plan highlighting the policies being pursued to improve economic growth and increase employment The Committee sets out a number of recommendations to further push forward the priorities of growth and jobs including that the Commission should seek to complete the progress towards an internal market that Member States should influence one another in the development of good practice through statistical comparison of their economic progress and agree on quantifiable targets that the format of the National Action Plans should include not only the successes but where countries are underperforming that the Agenda be given a higher public profile The New Economy and Economic Growth in Europe and the US David B. Audretsch,Paul J.J. Welfens,2013-06-29

The strong productivity growth of the US and Scandinavian countries in Europe in the 1990s has raised the question whether the ICT sector information and communication technology that is computers plus telecommunications plus digital services is the new driving engine of high growth in leading OECD countries Judging by the empirical evidence for the US including a new study by McKinsey which gives mixed evidence it is still too early to clearly dismiss Robert G Gordon s hypothesis that the acceleration of US output growth is due regarding quality problems of price measurement exclusively due to cyclical factors and increased productivity growth in the computer sector The counter hypothesis is associated with research by Stiroh and others who argue that there are positive productivity spillover effects from ICT to other sectors Indeed it is not clear ex ante whether mainly the Old Economy or the so called New Economy stands to benefit most from high innovation rates and strong productivity shifts associated with the spreading of digital services Interestingly the increased economic role of the internet also contributes to the internationalization of the economy since more services have become tradable and growing import competition itself could stimulate productivity growth and thus contribute to higher growth If ICT plays a key role in the new economy there are important implications in the differential degree to which Germany and the US have implemented ICT **Networked Governance and Transatlantic Relations**

Gabriella Paar-Jakli,2014-04-29 In today s complex and interconnected world scholars of international relations seek to better understand challenges spurred by intensified global communication and interaction The complex connectedness of modern society and politics compels us to investigate the pattern of interconnections among actors who inhabit social and political spaces Gabriella Paar-Jakli s study aims to advance theory and

practice by examining the networks used by specialists in North America and Europe to achieve their policy goals in the area of science and technology Her book suggests that to overcome policy problems transnationally three critical factors should be considered First as science and technology policy becomes increasingly critical to resolving global issues it should be regarded as an integral element of the foreign policy process Second as liberal international relations theory argues the increasing role of NGOs must be taken seriously alongside states as vital agents of policy reform Third as transatlantic relations remain center to maintaining the global order they must be reconsidered Paar Jakli assesses the role of digital networks as facilitators of regional cooperation Utilizing various techniques of social network analysis her research indicates an active and structurally discernible network in cyberspace among transatlantic organizations and demonstrates the role of virtual networks as facilitators of cooperative arrangements in transatlantic relations Paar Jakli's original research uses social network analysis to investigate transatlantic cooperation a new approach that will be noteworthy to network and transatlantic scholars as well as policymakers

Economic Policy Issues for the Next Decade Karl Aiginger, G. Hutschenreiter, 2013-03-09 There are several reasons why it has become important to rethink economic policy Out of the European perspective it is the new currency the enlargement towards Central and Eastern European countries the sluggish growth and the end of productivity convergence towards the USA and the insufficient creation of employment From the transatlantic perspective increasing differences in the economic policy and the potential rise of conflicts between Europe and the USA for example in trade competition and health issues are important The current volume touches most but not all of these topics It starts with the overview by Joseph Stiglitz on policy issues Then macroeconomics policy is discussed followed by the problem of an ageing society and European enlargement Differences between Europe and the USA are large in taxation and in the role of public finance The relative competitiveness of countries as well as of Europe will be decided by investments into new technologies and progression towards the Science Based Economy In the final section the role of economists in shaping the economic agenda and giving policy advice is discussed

The Empirical and Institutional Dimensions of Smart Specialisation Philip McCann, Frank van Oort, John Goddard, 2016-11-25 Smart specialisation is the new policy approach to the development of regional innovation systems across Europe and it involves fostering innovative and entrepreneurial initiatives which are well tailored to the local context The different technologies skills profiles business activities institutions and sectors which reflect a region's economic strengths and potential are to be fostered and encouraged to diversify in ways which also exploit the region's linkages with broader global value chains Yet the ideas contained in the smart specialisation agenda have until now been primarily conceptual in nature The Empirical and Institutional Dimensions of Smart Specialisation draws together some of the leading regional economists and scientists in Europe to analyse how smart specialisation is working in practice This book investigates different dimensions of the agenda as it is developing across parts of Europe from both quantitative and qualitative perspectives The quantitative analysis

examines the nature of the diversification processes undertaken by regions and the interplay between the chosen local regional development priorities and the wider global value chain impacts of these choices Meanwhile the qualitative analysis examines the institutional opportunities and challenges facing policy makers and the key elements most likely to provide the underpinnings of a workable set of policy settings The book is aimed both at academic researchers interested in the interface between economic geography and regional innovation systems as well as at policy makers making public policy decisions related to regional development at the local city regional or national levels *Fiscal Policy in the European Union* J.

Ferreiro,G. Fontana,F. Serrano,2008-11-27 This book provides a comprehensive analysis of national fiscal policies in the European Union and in the European Monetary Union Adopting a critical perspective the book offers a deep insight into the consequences of the current strategy of national fiscal policies on economic activity *Technology, Globalization, and Sustainable Development* Nicholas A Ashford,Ralph P Hall,2018-08-06 Technology Globalization and Sustainable Development offers a unified transdisciplinary approach for transforming the industrial state in order to promote sustainable development The authors present a deep analysis of the ways that industrial states both developed and developing are currently unsustainable and how economic and social welfare are related to the environment to public health and safety and to earning capacity and meaningful and rewarding employment The authors offer multipurpose solutions to the sustainability challenge that integrate industrial development employment technology environment national and international law trade finance and public and worker health and safety The authors present a compelling wake up call that warns of the collision course set between the current paths of continued growth and inevitable unsustainability in the world today Offering clear examples and real solutions this textbook illustrates how the driving forces that are currently promoting unsustainability can be refocused and redesigned to reverse course and improve the state of the world This book is essential reading for those teaching and studying sustainable development and the critical roles of the economy employment and the environment

The European Union in the Twenty-First Century Altuğ GÜNAR,Didem SAYGIN,2023-04-20 The European Union in the Twenty First Century Major Political Economic and Security Policy Trends unpacks some of the most prominent issues faced by the EU over the last two decades and considers how they may shape its future as well as the future of international politics *Globalization of the Economy, Unemployment and Innovation* Paul J.J. Welfens,2012-12-06 Economic globalization has intensified since the 1980s and created faster channels of international interdependence and an accelerating technology race In this new asymmetric world economy the EU is facing a dynamic and flexible US system which takes advantage of the global quest for foreign direct investment Innovation policies in the EU in particular in Germany are found to be rather inadequate There are also new theoretical challenges where a structural macro model and a Schumpetrian model of innovation and full employment are presented as new approaches Besides theoretical challenges the increasing global dynamics raise new problems of international policy coordination which could lead to unsustainable economic globalization

OECD Science, Technology and Industry Outlook 2014 OECD,2014-11-12 The OECD Science Technology and Industry Outlook 2014 reviews key trends in science technology and innovation STI policies and performance in more than 45 economies including OECD countries and major emerging economies *Europe-US Relations Handbook* Aarav Chandrasekaran,2025-02-20 Europe US Relations Handbook offers an authoritative and comprehensive guide that delves into the intricate dynamics between Europe and the United States Edited by prominent scholars this book examines the political economic cultural and strategic dimensions defining the transatlantic partnership We provide a rich historical context tracing the evolution of Europe US relations from the aftermath of World War II to the present day Key milestones such as NATO s establishment the Marshall Plan and the European Union are explored highlighting the interconnectedness between Europe and the United States With contributions from leading experts the handbook covers topics including diplomatic engagements trade agreements security alliances cultural exchanges and strategic partnerships Readers gain insights into the complexities of transatlantic cooperation and the challenges faced in an interconnected world Our multidisciplinary approach offers diverse perspectives on Europe US relations delving into defense cooperation economic integration human rights advocacy and environmental diplomacy We address contemporary challenges like cybersecurity threats climate change populism and shifts in global power dynamics highlighting how both regions adapt to these challenges Europe US Relations Handbook is an invaluable resource for policymakers scholars students and anyone interested in understanding the complex relationship between Europe and the United States With comprehensive coverage and analytical depth this handbook is essential for navigating transatlantic diplomacy and cooperation **Industries in Europe** P. S. Johnson,2003-01-01 This book is to be recommended as a valuable reference source the self contained chapters provide well written and informative introductions to the industries covered and the authors also give helpful guidance to further reading Eleanor J Morgan The Economic Journal This important book presents an authoritative up to date examination of a number of major industries in Europe It offers valuable insights into the nature of industrial activity in Europe as well as providing comprehensive introductions to a series of key industries such as defence construction tourism and biotechnology **Smart, Sustainable and Inclusive Growth** Charlie Karlsson,Daniel Silander,Brigitte Pircher,2019 This study explores the Europe 2020 strategy and the role of European political entrepreneurship in debating shaping and implementing this strategy within the EU The book sets out to explore the content conditions and consequences of Europe 2020 by analysing the plan for a future prosperous EU economy The main focus is on European political entrepreneurship and how the strategy has been debated and decided on and then implemented from a governance perspective with multiple European actors Innovations in Macroeconomics Paul J.J. Welfens,2009-12-23 Modern macroeconomics suffers from an unclear link between short term Keynesian analysis and long term growth modelling This book presents a new link between monetary analysis and growth modelling in open economies Structural change innovations and growth are considered from a new perspective With respect

to economic policy in particular innovation policy the analysis implies major changes concerning both EU countries and other leading OECD economies *European Science and Technology Policy* Henri Delanghe,Ugur Muldur,Luc Soete,2011-01-01
This title is about the most important concept underpinning current European Union research policy It focuses on the notion of the European Research Area a European internal market for research whose achievement will become the main objective of EU research policy once the Lisbon Treaty enters into force
