intertemporal choice **Research and Innovation Forum 2022** Anna Visvizi, Orlando Troisi, Mara Grimaldi, 2023-03-14

This book features research presented and discussed during the Research Innovation Forum Rii Forum 2022. As such, this book offers a unique insight into emerging topics, issues, and developments pertinent to the fields of technology, innovation, and education, and their social impact. Papers included in this book apply inter- and multi-disciplinary approaches to query such issues as technology-enhanced teaching and learning, smart cities, information systems, cognitive computing, and social networking. What brings these threads of the discussion together is the question of how advances in computer science, which are otherwise largely incomprehensible to researchers from other fields, can be effectively translated and capitalized on so as to make them beneficial for society as a whole. In this context, Rii Forum and Rii Forum proceedings offer an essential venue where diverse stakeholders, including academics, the think tank sector, and decision makers, can engage in a meaningful dialogue with a view to improving the applicability of advances in computer science. *The Athenæum*, 1852 The Athenæum, 1852 *Behavioral Processes in Online Identity-Related Issues* Xi Chen, Ivan Wen, Qixing Qu, Wenjing Chen, 2024-07-11

With the development of advanced media technologies, cyberspace is gradually transforming from temporal immersion into a state of new normal. An increasing proportion of our daily lives has become a mix of physical and virtual worlds. As a complex social psychological phenomenon, online social identity has attracted widespread attention from academia to industry. Identity-related issues have been noted as an important subject of Internet interdisciplinary research, including social psychology, sociology, personality psychology, and health psychology. Communication in cyberspace always carries some degrees of anonymity; for users, present virtual identities constructed by themselves in cyberspace, hiding their real identities and constructing their online identities as a form of social identity enactment. On the other hand, online media provides tools and environments for virtual identity building. Although the anonymity of the Internet facilitates the subjects' construction of their virtual identity, their online virtual identity is not completely anonymous and can be identified and authenticated online, thereby meaning we can research how online identity relates to real-world identity. Identification is a social process that matches internal self-identity with external identity types, and it is also a process and a reflection of internal perceptions. And mere identification with a group has been shown to dramatically affect behavior, as per social identity theory.
