Tippet, Todd M. Milford,2023-04-01 This edited volume showcases current science education research in Canada from pre Kindergarten to Grade 7 conducted in Canada by a diverse group of researchers from across the country We draw on the themes that emerged from our previous book Science Education in Canada Consistencies Commonalities and Distinctions to guide the structure of this book on elementary science education research In particular chapters on science teacher preparation Indigenous perspectives environmental education science technology engineering and mathematics STEM and science technology society and the environment STSE reflect a Canadian perspective However these themes are of global interest and authors include ideas for how science education research in Canada might be used by academics and researchers in other countries This book builds a cohesive picture of current elementary science education research in Canada highlighting themes that will resonate with international readers *The Kindergarten-primary Magazine* Bertha Johnston,E. Lyell Earle,1892 **The Kindergarten for Teachers and Parents** ,1892 *Developing Culturally and Developmentally Appropriate Early STEM Learning Experiences* Philip Hui Li,Anne Forbes,Weipeng Yang,2023-12-11 This book informs best practice for enhancing young children s STEM learning experiences in formal settings such as preschool environments and less formal settings such as home environments It is the first collection of multidisciplinary and multinational studies on early STEM programs worldwide and presents diverse authentic and current STEM relevant scenarios that address two fundamental problems where are we in early STEM education and where shall we go The book explores factors that influence young learners abilities to make informed choices in authentic problem based STEM relevant scenarios and how those abilities have been identified documented and enhanced Chapters address topics related to

curriculum and pedagogy teacher education and professional development family environment and inclusive education from a variety of international settings including Australia Germany Hong Kong Mainland China Singapore and the United States Each chapter is based around a research project and describes relevant background information from the research literature details of how the study was designed findings from the study and discussion as to what the findings mean for practical implementation Developing Culturally and Developmentally Appropriate Early STEM Learning Experiences will be a key resource for researchers and practitioners of early childhood education and care STEM education educational psychology educational research and educational technology This book was originally published as a special issue of the journal Early Education and Development Resources in Education ,2001-04 **Research in Early Childhood Education for**

Sustainability Julie Davis,Sue Elliott,2014-06-20 Sustainability is a global issue that urgently needs addressing and for which the most serious consequences are for children and future generations This insightful research text tackles one of the most significant contemporary issues of our times the nexus between society and environment and how early childhood education can contribute to sustainable living By offering international and multidisciplinary research perspectives on Early Childhood Education for Sustainability each chapter explores and investigates the complex topic of sustainability and its relationship to early childhood education A particular emphasis that runs through this text is young children as empowered citizens capable of both contributing to and creating change for sustainability The chapter authors work from or are aligned with a transformative education paradigm that suggests the socio constructivist frameworks currently underpinning Early Childhood Education require reframing in light of the social transformations necessary to address humanity s unsustainable unjust and unhealthy living patterns This research text is designed to be provocative and challenging in so doing it seeks to encourage exploration of current understandings about Early Childhood Education for Sustainability offers new dimensions for more deeply informed practice and proposes avenues for further research in this field **Teaching in the**

Standards-based Classroom ,2001 Virtually every national standards document every state framework and every local set of standards calls for fundamental changes in what and how teachers teach The challenge for teachers is to implement the vision for mathematics and science classrooms called for in the standards This issue describes that vision and suggests ways to use the standards mandated in your school to improve your practice to help you teach in your standards based classroom

Children's Exploration and Cultural Formation Mariane Hedegaard,Elin Eriksen Ødegaard,2020-02-28 This open access book examines the educational conditions that support cultures of exploration in kindergartens It conceptualises cultures of exploration whether those cultures are created through children s own engagement or are demanded of them through undertaking specific tasks within different institutional settings It shows how the conditions for children s exploration form a web of activities in different settings with social relationships local landscapes and artefacts The book builds on the understanding of cultural traditions as deeply implicated in the developmental processes meaning that local

considerations must be reflected in education for sustainable futures Therefore the book examines and conceptualises exploration and cultural formation through locally situated cases and navigates toward global educational concepts The book provides different windows into how children may explore in everyday practice settings in kindergarten and contributes to a loci based ecological integral knowledge relevant for early childhood education

Investigating Light and Shadow With Young Children (Ages 3-8) Beth Dykstra Van Meeteren, 2022 Children are intrigued by switches that power a light source and by items that reflect light and sparkle and they take notice of personal shadows cast on the playground Many fields in STEM draw upon understanding of light and shadow such as astronomy biology engineering architecture and more This second volume in the STEM for Our Youngest Learners Series shows teachers how to engage children ages 3-8 with light and shadow in a playful way building an early foundation for the later more complex study of this phenomena and possibly piquing the curiosity of children that will ultimately lead to professions within the field of STEM The text offers guidance for integrating literacy learning and investigations and for building partnerships with administrators Each volume in this new series includes vignettes showing educators and children engaging in inquiry learning guidance for selecting materials and arranging the learning environment modifications and accommodations for diverse learners establishing adult learning communities to support professional development and more
