Learning Objectives

- At standard atmospheric conditions, all gases have approximately the same kinetic energy, and are made up of molecules that behave as independent particles (the postulates of the kinetic molecular theory).
- At standard atmospheric conditions, all gases have the same average kinetic energy.
- At standard atmospheric conditions, all gases have the same average molecular mass.

Model 1: Representation of Gases in Different Phases

The following figure illustrates the representation of particles in three different phases of matter.

Figure 1: Representation of particles in different phases of matter

Model 1 represents the particles in different phases of matter. The particles in the gas phase are scattered, while the particles in the liquid phase are clustered together, and the particles in the solid phase are arranged in a regular grid.
