in Old Age Lia Fernandes,Huali Wang,2018-11-30 Improving psychological well being and cognitive health is now listed as
the priority on the healthy aging agenda Depression and cognitive impairment are great challenges for the elderly population
There have been numerous studies on depression and cognitive impairment and dementia However the neural correlates of
depression and cognitive impairment have not yet been elucidated With the development of neuroscience and relevant
technologies studies on anatomical and functional neural networks neurobiological mechanisms of mood and cognition in old
age will provide more insight into the potential diagnosis prevention and intervention in depression and cognitive impairment
For example longitudinal neuroimaging studies depicting the trajectories of patterns of structural and functional brain
networks of mild cognitive impairment may provide potential imaging markers for the onset of dementia Population based
studies have addressed the potential interaction between mood and cognitive impairment in old age However there are few
studies to explore the potential neural mechanism of the relationship between depression and cognitive impairment in old
age In all of this process the contribution of multiple biological events cannot be neglected particularly the underlying
influence of chronic diseases and concomitant polymedication as well as the geriatric conditions like frailty frequently
present in this elderly population which also compromise the cognitive function and mood determining depression and
conducting to worse outcomes with more morbidity and mortality **Employee and Union Member Guide to Labor Law**
