Mastering ArcGIS Enterprise Administration Chad Cooper, 2017-10-27 Learn how to confidently install configure secure and fully utilize your ArcGIS Enterprise system About This Book Install and configure the components of ArcGIS Enterprise to meet your organization's requirements Administer all aspects of ArcGIS Enterprise through user interfaces and APIs Optimize and Secure ArcGIS Enterprise to make it run efficiently and effectively Who This Book Is For This book will be geared toward senior GIS analysts GIS managers GIS administrators DBAs GIS architects and GIS engineers that need to install configure and administer ArcGIS Enterprise 10.5.1 What You Will Learn Effectively install and configure ArcGIS Enterprise including the Enterprise geodatabase ArcGIS Server and Portal for ArcGIS Incorporate different methodologies to manage and publish services Utilize the security methods available in ArcGIS Enterprise Use Python and Python libraries from Esri to automate administrative tasks Identify the common pitfalls and errors to get your system back up and running quickly from an outage In Detail ArcGIS Enterprise the next evolution of the ArcGIS Server product line is a full featured mapping and analytics platform It includes a powerful GIS web services server and a dedicated Web GIS infrastructure for organizing and sharing your work You will learn how to first install ArcGIS Enterprise to then plan design and finally publish and consume GIS services You will install and configure an Enterprise geodatabase and learn how to administer ArcGIS Server Portal and Data Store through user interfaces the REST API and Python scripts This book starts off by explaining how ArcGIS Enterprise 10.5.1 is different from earlier versions of ArcGIS Server and covers the installation of all the components required for ArcGIS Enterprise We then move on to geodatabase administration and content publication where you will learn how to use ArcGIS Server Manager to view the server logs stop and start services publish services define users and roles for security and perform other administrative tasks You will also learn how to apply security mechanisms on ArcGIS Enterprise and safely expose services to the public in a secure manner Finally you will use the RESTful administrator API to automate server management tasks using the Python scripting language You will learn all the best practices and troubleshooting methods to streamline the management of all the interconnected parts of ArcGIS Enterprise Style and approach The book takes a pragmatic approach starting with installation configuration of ArcGIS Enterprise to finally building a robust GIS web infrastructure for your organization

Mastering ArcGIS Server Development with JavaScript Ken Doman, 2015-09-18 Transform maps and raw data into full fledged web mapping applications using the power of the ArcGIS JavaScript API and JavaScript libraries About This Book Create and share modern map applications for desktops tablets and mobile browsers Present and edit geographic and related data through maps charts graphs and more Learn the tools tips and tricks made available through the API and related libraries with examples of real world applications Who This Book Is For This book is intended for intermediate developers who want to design web mapping applications You should have some experience with geographic information systems especially with ArcGIS products such as ArcGIS Server It also helps to have some experience

with HTML CSS and JavaScript What You Will Learn Create single page mapping applications lining up data from different sources Search for and display geographic and tabular information based on locations and attributes Customize maps and widgets to deliver the best user experience Present location data intuitively using charts and graphs Integrate mapping applications with your favorite JavaScript frameworks Test the working of your web map application and take advantage of cloud services such as ArcGIS Online Create modern looking web maps through styling tips and tricks In Detail ESRI and its ArcGIS line of software have been an industry leader in digital map production and publication for over 30 years ArcGIS Server lets you design configure and publish maps that can be viewed and edited through the Internet After designing basic maps you may want to find out new and innovative ways to represent information using these maps In this book you ll work through practical examples experiencing the pitfalls and successes of creating desktop and mobile map applications for a web browser using the ArcGIS Server platform The book begins by introducing you to ArcGIS Server and ESRI s JavaScript API You ll work with your first web map and then move on to learn about ESRI s building blocks A Dojo AMS style widget will help you create your own widgets for a map and then see how to collect geographic data Furthermore you will learn different techniques such as using Dojo Charts to create charts and graphs to represent your data Then you will see how to use ESRI JavaScript API with other JavaScript libraries and different styling methods to make your map stand out By the end of the book you will discover how to make your application compatible with different devices and platforms and test it using testing libraries Style and approach An in depth guide that explores web application development using ArcGIS Server and the ArcGIS JavaScript API Topics are explained in the context of developing two applications for fictional clients Details of application development including possible pitfalls and best practices are included in this book **Mastering ArcGIS** Maribeth Hughett Price,2006 Accompanying CD ROM includes video clips with audio instructions to demonstrate step by step tutorials and reference material as well as complete data for following the tutorials and doing the independent exercises

Rural Teacher Education Michael Corbett,Dianne Gereluk,2020-02-15 This book examines challenges associated with the education of teachers in and for rural places It offers a new perspective with respect to how Canadian educators are shifting the conversation toward a hopeful discourse concerning how educators can foster meaningful rural learning environments which will contribute to building stronger rural communities and regions A central focus of the book is emerging reconceptualization of education place and indigeneity in Canadian education in the wake of the Truth and Reconciliation Commission Though the challenge of addressing rural teaching and learning lies partly in the nuances and complexities of unique places there are also common threads that affect virtually all communities in rural regional and remote educational cultural economic and social geographies Chapters in this collection provide current research in Canadian rural education including examples and stories from the field contributed by teachers administrators and superintendents on the challenges and creative opportunities that they have discovered in their own rural context giving hope and inspiration for what is

possible The book will appeal to all readers interested in rural education and teacher education as well as to those concerned with educational inequality and indigenous education Topographic Mapping John N. Hatzopoulos, Despina J.

Hatzopoulos, 2024-10-01 This book is addressed to students and professionals and it is aimed to cover as much as possible the broader region of topographic mapping as it has evolved into a modern field called geospatial information science and technology More emphasis is placed on using scientific methods and tools materialized in algorithms and software to produce practical results For this reason beyond the written material there are also many educational and professional software programs written by the first author to help comprehend the individual methodologies developed The Target of this book is to provide the people who work in fields of applications of topographic mapping environment geology geography cartography engineering geotechnical agriculture forestry geointelligence etc a source of knowledge for the broader region so that to help them in facing relevant problems as well as in preparing contracts and specifications for such type of work assigned to professionals and evaluating such contracting results It also aims to be a reference for theory and practice for professionals in Topographic Mapping This book applies a didactics method where with a relatively small effort someone can digest a large volume of simple or complicated knowledge material at a desirable scientific depth within a relatively short time interval The objective that educated people must be smarter than the machine and not treat the machine as a black box being button pushers has been achieved through the first author's experience in the USA and Greece with relative success by adopting this didactics technique There are 14 chapters including Reference systems and Projections Topographic instruments and Geometry of coordinates Conventional construction of a topographic map Design and reproduction of a thematic map Digital Topographic mapping GIS Digital Terrain Models DTM DEM GPS GNSS methods of Photogrammetry Remote Sensing new technologies LIDAR IFSAR Augmented reality Mapping with UAS UAV Drones the method of Least Squares adjustment and Description of educational software accompanying the text ArcGIS Pro 2.x Cookbook Tripp Corbin, 2018-02-27 Creating and Sharing Maps and Data using ArcGIS Pro Key Features Leverage the power of ArcGIS to build beautiful 2D and 3D maps Work with ArcGIS to analyze and process data Extend the power of ArcGIS to ArcGIS Online to create and edit content Book Description ArcGIS is Esri's catalog of GIS applications with powerful tools for visualizing maintaining and analyzing data ArcGIS makes use of the modern ribbon interface and 64 bit processing to increase the speed and efficiency of using GIS It allows users to create amazing maps in both 2D and 3D quickly and easily If you want to gain a thorough understanding of the various data formats that can be used in ArcGIS Pro and shared via ArcGIS Online then this book is for you Beginning with a refresher on ArcGIS Pro and how to work with projects this book will quickly take you through recipes about using various data formats supported by the tool You will learn the limits of each format such as Shapefiles Geodatabase and CAD files and learn how to link tables from outside sources to existing GIS data to expand the amount of data that can be used in ArcGIS You will learn methods for editing 2D and 3D data using ArcGIS Pro and how topology can be used to ensure data

integrity Lastly the book will show you how data and maps can be shared via ArcGIS Online and used with web and mobile applications What you will learn Edit data using standard tools and topology Convert and link data together using joins and relates Create and share data using Projections and Coordinate Systems Access and collect data in the field using ArcGIS Collector Perform proximity analysis and map clusters with hotspot analysis Use the 3D Analyst Extension and perform advanced 3D analysis Share maps and data using ArcGIS Online via web and mobile apps Who this book is for GIS developers who are comfortable using ArcGIS and are looking to increase their capabilities and skills will find this book useful

Google Maps JavaScript API Cookbook Alper Dincer,Balkan Uraz,2013-12-26 Google Maps API Cookbook follows a fast paced high level structured cookbook approach with minimal theory and an abundance of practical real world examples explained in a thorough yet concise manner to help you learn quickly and efficiently Google Maps API Cookbook is for developers who wish to learn how to do anything from adding a simple embedded map to a website to developing complex GIS applications with the Google Maps JavaScript API It is targeted at JavaScript developers who know how to get by but who are also seeking the immediacy of recipe based advice Advancements in Architectural, Engineering, and Construction Research and Practice AbdulLateef Olanrewaju,Silvana Bruno,2024-10-03 This book offers a captivating discussion into the cutting edge developments at the intersection of architecture engineering construction and technology With a focus on the power of big data analytics and computational design this book delves into the transformative potential of these domains in shaping the built environment and business This book discovers the fusion of architectural and engineering innovations with the capabilities of big data analytics machine learning and AI and explores how this parallelism is revolutionizing the design process enhancing efficiency and opening new horizons for creativity This book steps into a world where predictive models statistical algorithms and what if scenarios drive advancements in architectural and engineering practices and witnesses the seamless integration of technology in design generation data visualization task automation and performance testing It is an essential read for researchers and professionals seeking to leverage the potential of big data analytics to transform the built environment maintaining the central role of humans **Mastering Tableau** David Baldwin,2016-12-06 Master the intricacies of Tableau to create effective data visualizations About This Book Arm yourself with an arsenal of advanced chart types and geocoding to efficiently and engagingly present information Map a grid over a network node diagram and use that grid to demonstrate loads processing time and more in Tableau Integrate R with Tableau by utilizing R functions libraries and saved models Who This Book Is For If you are a business analyst without developer level programming skills then this book is for you You are expected to have at least a fundamental understanding of Tableau and basic knowledge of joins however SQL knowledge is not assumed You should have basic computer skills including at least moderate Excel proficiency What You Will Learn Create a worksheet that can display the current balance for any given period in time Recreate a star schema from in a data warehouse in Tableau Combine level of detail calculations with table

calculations sets and parameters Create custom polygons to build filled maps for area codes in the USA Visualize data using a set of analytical and advanced charting techniques Know when to use Tableau instead of PowerPoint Build a dashboard and export it to PowerPoint In Detail Tableau has emerged as one of the most popular Business Intelligence solutions in recent times thanks to its powerful and interactive data visualization capabilities This book will empower you to become a master in Tableau by exploiting the many new features introduced in Tableau 10.0 You will embark on this exciting journey by getting to know the valuable methods of utilizing advanced calculations to solve complex problems These techniques include creative use of different types of calculations such as row level aggregate level and more You will discover how almost any data visualization challenge can be met in Tableau by getting a proper understanding of the tool's inner workings and creatively exploring possibilities You'll be armed with an arsenal of advanced chart types and techniques to enable you to efficiently and engagingly present information to a variety of audiences through the use of clear efficient and engaging dashboards Explanations and examples of efficient and inefficient visualization techniques well designed and poorly designed dashboards and compromise options when Tableau consumers will not embrace data visualization will build on your understanding of Tableau and how to use it efficiently By the end of the book you will be equipped with all the information you need to create effective dashboards and data visualization solutions using Tableau Style and approach This book takes a direct approach to systematically evolve to more involved functionalities such as advanced calculation parameters sets data blending and R integration This book will help you gain skill in building visualizations previously beyond your capacity

Digital Twin Adoption and BIM-GIS Implementation Samad Sepasgozar, Sara Shirowzhan, 2024-08-09 The aim of this edited book volume is to present new concepts and applications of Digital Twin and relevant tools in the built environment context The book identifies key organisational factors that influence the adoption of technology within the architectural service industry setting the stage for a deeper understanding of the shift towards digital methodologies The book introduces the Digital Twin Readiness Level framework a modified metric system with ten levels of risk based maturity and an empirical development of a Digital Twin Adoption Model Furthermore the text ventures into immersive virtual environments and their applications showcasing innovative practices that enhance learning and operational efficiency Additionally the book examines the integration of Building Information Modelling BIM and Geographic Information Systems GIS revealing new workflows for creating 3D models of cities A focus on Australia's government funded infrastructure projects offers insights into the values and acceptance criteria for these technologies providing a comprehensive overview of their practical implications and future potential This book is essential reading for practitioners engineers and managers involved in any phase of the built environment from design to operation and other architectural engineering and construction AEC stakeholders who are a part of digital transformations as well as researchers educators and students interested in the field
