Dante's Two Beloveds Olivia Holmes,2008-01-01 Re examining key passages in Dante s oeuvre in the light of the crucial issue of moral choice this book provides a new thematic framework for interpreting the Divine Comedy Olivia Holmes shows how Dante articulated the relationship between the human and the divine as an erotic choice between two attractive women Beatrice and the other woman Investigating the traditions and archetypes that contributed to the formation of Dante s two beloveds Holmes shows how Dante brilliantly overlaid and combined these paradigms in his poem In doing so he re imagined the two women as not merely oppositional condensations of apparently conflicting cultural traditions but also complementary versions of the same This visionary insight sheds new light on Dante s corpus and on the essential paradox at the poem s heart the unabashed eroticism of Dante s turn away from the earthly in favor of the divine **Animals** ,1913

Realism and Space in the Novel, 1795-1869 Rosa Mucignat,2016-04-01 Posing new questions about realism and the creative power of narratives Rosa Mucignat takes a fresh look at the relationship between representation and reality As Mucignat points out worlds evoked in fiction all depend to a greater or lesser extent on the world we know from experience but they are neither parasites on nor copies of those realms Never fully aligned with the real world stories grow out of the mismatch between reality and representation those areas of the fictional space that are not located on actual maps but still form a fully structured imagined geography Mucignat offers new readings of six foundational texts of modern Western culture Goethe s Wilhelm Meister s Apprenticeship Jane Austen s Mansfield Park Alessandro Manzoni s The Betrothed Stendahl ss The Red and the Black Charles Dickens s Great Expectations and Gustave Flaubert s Sentimental Education Using these texts as source material and supporting evidence for a new and comprehensive theory of space in fiction she examines the links between the nineteenth century novel s interest in creating substantial life like worlds and contemporary

developments in science art and society Mucignat s book is an evocative analysis of the way novels marshal their technical and stylistic resources to produce imagined geographies so complex and engrossing that they intensify and even transform the reader s experience of real life places Handbook of Halal Food Production Mian N.
