Educational sociologists have paid relatively little attention to children in middle childhood ages 6 to 12 whereas developmental psychologists have emphasized factors internal to the child much more than the social contexts in explaining children's development. *Children Schools and Inequality* redresses that imbalance. It examines elementary school outcomes e.g. test scores, grades, retention rates in light of the socioeconomic variation in schools and neighborhoods, the organizational patterns across elementary schools, and the ways in which family structure intersects with children's school performance. Adding data from the Baltimore Beginning School Study to information culled from the fields of sociology, child development, and education, this book suggests why the gap between the school achievement of poor children and those who are better off has been so difficult to close. Doris Entwisle, Karl Alexander, and Linda Olson show why the first grade transition, how children negotiate entry into full time schooling, is a crucial period. They also show that events over that time have repercussions that echo throughout children's entire school careers. Currently the only study of this life transition to cover a comprehensive sample and to suggest straightforward remedies for urban schools, *Children Schools and Inequality* can inform educators, practitioners, and policymakers as well as researchers in the sociology of education and child development.      **Appalachia**

, 1998      *The Educator* journal, 1911      *The Complex Web of Inequality in North American Schools* Gilberto Q. Conchas, Briana M. Hinga, Miguel N. Abad, Kris D. Gutierrez, 2019-08-22. *The Complex Web of Inequality in North American Schools* analyzes and challenges the critical gaps and inequalities that persist in the American school system. Showing how historical biases have been inherited in current policies relating to non-dominant youth, the text calls for educational reforms that perform in the name of social justice. This edited collection carefully interrogates how technocratic educational policies and reforms are often unequipped to address the interplay of political, social, economic, ideological factors that are at the roots of educational injustice. Considering the most vulnerable student populations, original case studies explore how inadequate structures, practices, and beliefs have increased marginalization and highlight those instances in which policy has proved effective in reducing opportunity gaps between economically rich and poor students, between white, Asian, Black, and Latino youth, between native English speakers and second language learners, highlighting racial integration and unequal American Indian education and for students with special educational needs. The insights into such policies shed light on the complex web of historically embedded inequities that continue to shape the construction, roll out, and consequences of education policy for the most marginalized youth populations today. This volume will be of interest to graduate and postgraduate students, researchers, and academics in the fields of education policy, sociology of education, economics of education, and history of education, and well as policy evaluation.      *Bulletin*, 1917      **Summer Gets to Work (American Girl Girl of the Year 2025)** Clare Hutton, 2025-01-28.
