Medieval Capital Markets C. J. Zijderduijn,2009 Institutions that allow for the accumulation of capital were as crucial to economic growth throughout history as they are today But whereas historians often focus on the precursors of modern banking institutions little is known of any alternatives that may have served similar purposes prior to their rise This study focuses on the institutional framework of markets for renten a type of long term debt that enabled economic development in much of Northwest Europe in the late Middle Ages In the county of Holland these markets allowed large segments of the public and private sectors to reallocate capital This study thus uncovers the medieval capital markets in the region that was to become the core of the Dutch Republic Geschiedenis van Dordrecht: Geschiedenis van Dordrecht tot 1572 ,1996

Between Saint James and Erasmus: Studies in Late-Medieval Religious Life - Devotion and Pilgrimage in the Netherlands
Jan van Herwaarden,2021-10-25 This volume is divided into four sections late medieval devotion in the Netherlands medieval Christian pilgrimage the medieval cult of St James the Great and Erasmiana Variety and coherence sound the keynote in the title and the contents of the book Religious concepts and expressions of religious faith such as pilgrimages and indulgences are representative of late medieval Christianity In this book they refer specifically to the medieval cult of St James the Great while for Erasmus they were an object of his critical consideration The whole book can be read in the light of the debate about the tension between an appreciation for outward signs of faith and the inward experience of religious belief which Erasmus considered an absolute necessity Political Competition, Innovation and Growth Peter Bernholz,Manfred E. Streit,Roland Vaubel,2012-12-06 This volume confronts an important historical hypothesis with empirical evidence from selected periods of history The hypothesis in question states that competition among political and legal organisations in developing rules has been a crucial condition for liberty innovation and growth in the history of mankind It is due to Immanuel Kant Edward Gibbon and Max Weber and has been revived and further developed by Nobel Laureate Douglass C North who contributes the first chapter The volume brings together political economists historians and legal scholars to discuss the role of political competition in the rise and decline of nations both in theory and in a large number of case studies
